

Directions: Be sure to save an electronic copy of your answer before submitting it to Ashworth College for grading. Unless otherwise stated, answer in complete sentences, and be sure to use correct English, spelling, and grammar. Your sole resource for responding to the three essay topics is your text: *Ethics for the Information Age* (8th Edition). Respond to the topics for this writing assignment using your own words. Design your responses as if you are explaining facts, concepts, and ideas to someone who is not familiar with the subject matter. Be sure to include creative examples wherever they may be appropriate. Also, be sure to provide a title for each of your essay responses.

This assignment requires you to write essays in response to all of the following:

Part 1: In your own words, describe early milestones in information storage and retrieval, beginning with the Greek alphabet and proceeding to the advent of Ted Nelson's creation of the hypertext system.

Part 2: Explain Rawls' theory of justice, including basic concepts of his thought experiment, and in particular the idea of one's original position, the veil of ignorance, and the difference principle.

Part 3: Describe evidence that Internet addiction exists based on your personal experience followed by a summary of expert opinion offered in our text. In that context, discuss factors that contribute to Internet addiction.
