

World Regions in Global Context: Peoples, Places, and Environments

6th Edition

World Regions in Global Context

Lectures by:
Christa Ann Smith

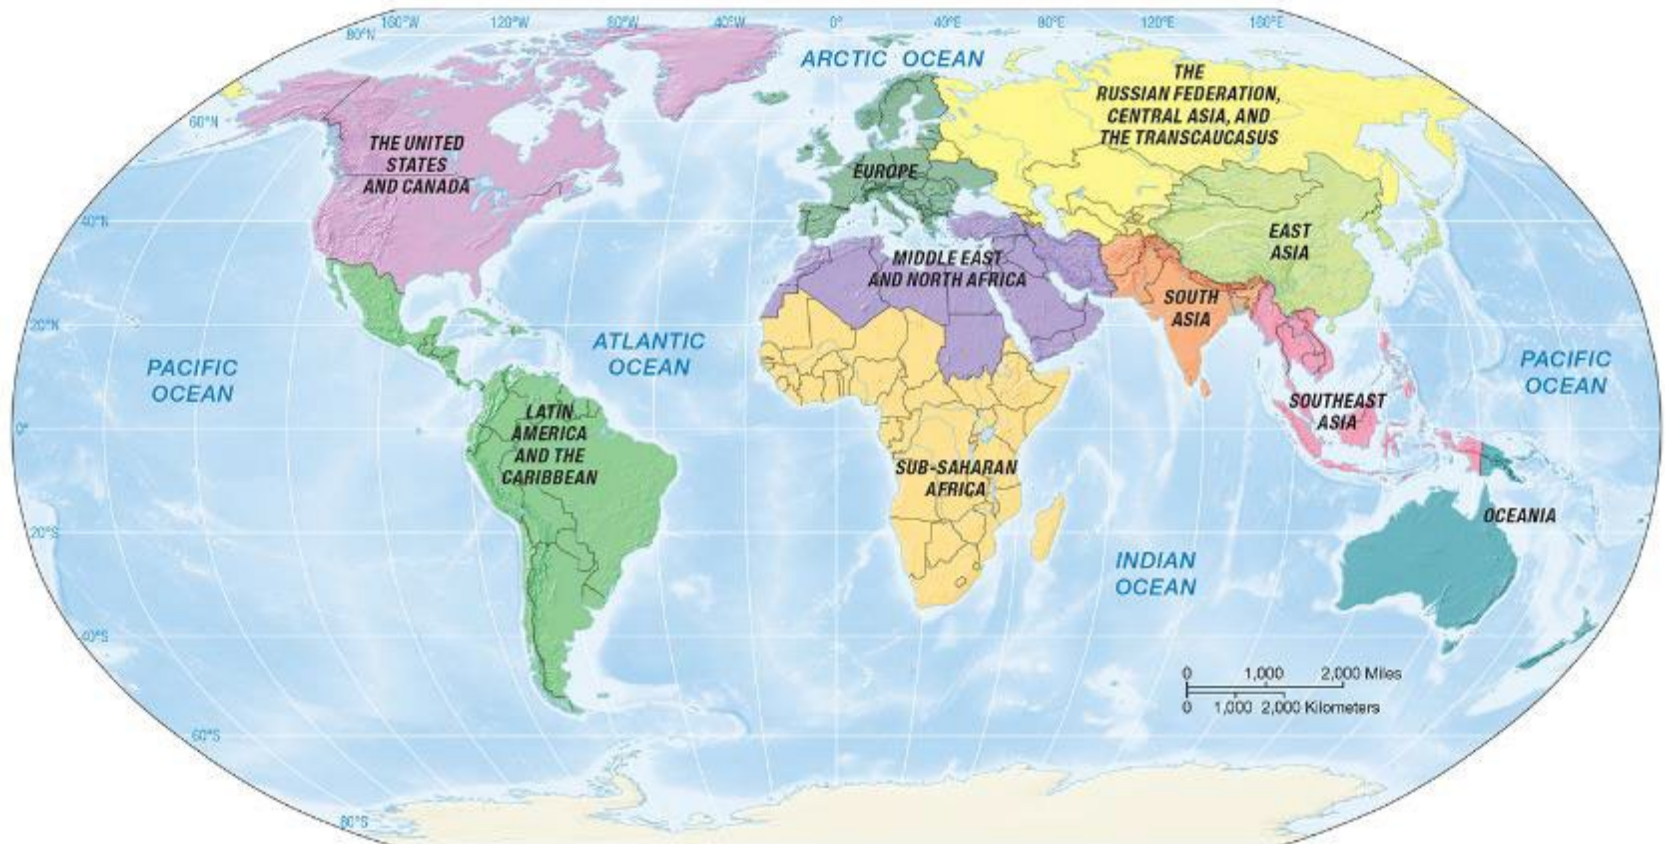

Thinking Like a Geographer

- **Geography**
 - global relationships
 - human/environment interactions
- **Physical geography**
 - climate, landforms, ecology
- **Human geography**
 - spatial organization
- **Environmental geography**
 - connects human/physical geography

Thinking Like a Geographer, (cont)

- **World regional geography**
 - examines geographical processes
 - explains why and how patterns emerge

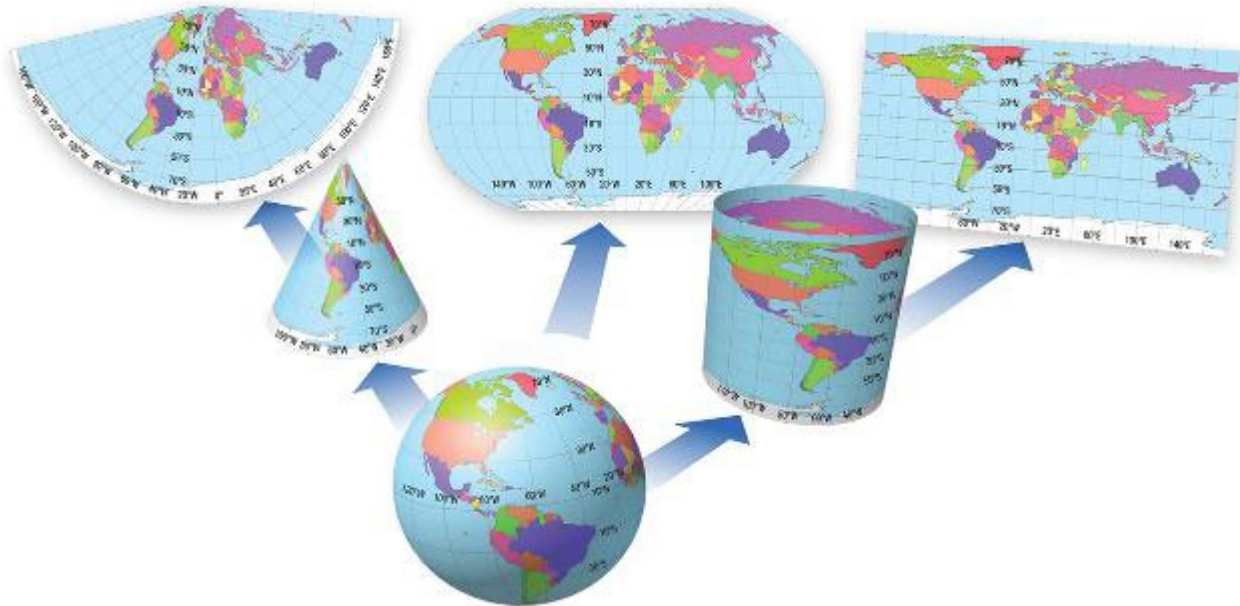

Place and the Making of Regions

- **Regions**
 - aggregation of **places**
 - connections between places over time
- **Regionalism**
 - strong feeling of collective identity

Maps and Mapping

- **Map**
 - visual representation of Earth's surface
 - important geographic tool
- **Grid system**
 - latitude
 - longitude
 - projections

Globalization and Regionalization

- **Globalization**
 - system of elements linked together
- **Regionalization**
 - why new regions emerge

A World of Regions

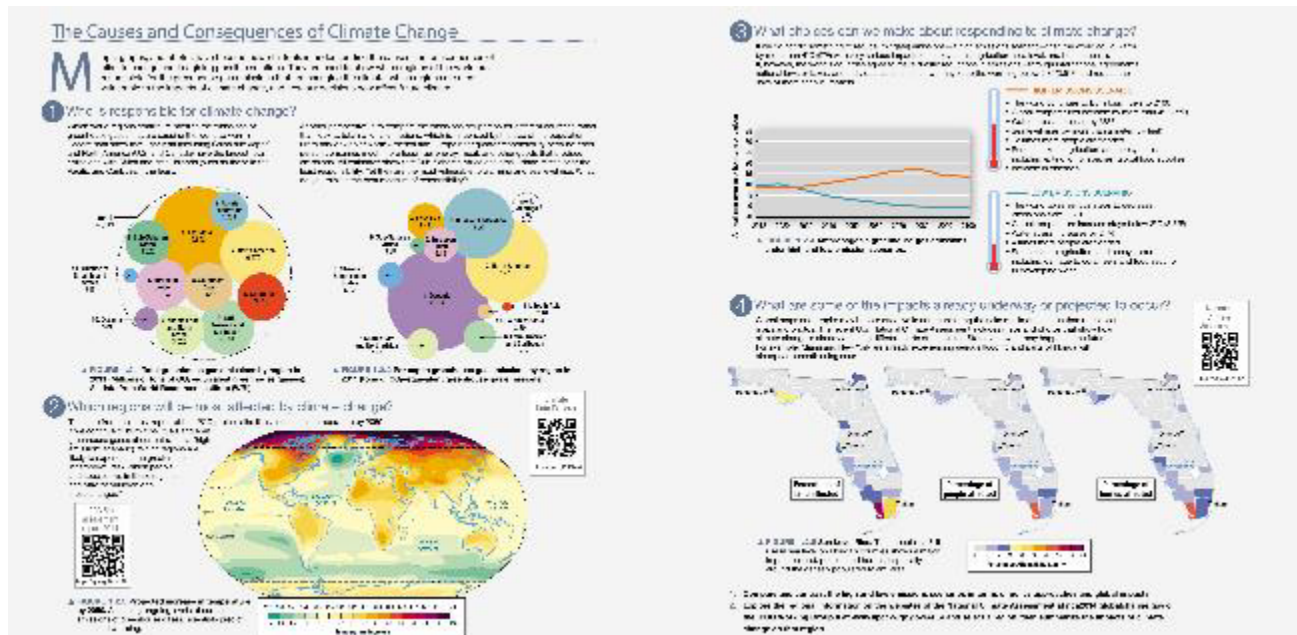

Organizing and Exploring the World's Regions

- Framework for studying regions
 - Environment, Society, and Sustainability
 - History, Economy, and Territory
 - Culture and Populations
 - Future Geographies

Environment, Society, and Sustainability

- **Environment:** everything that surrounds us
 - very little untouched nature
- Human impact on Earth's system
 - now live in **Anthropocene**
 - human activity dominates earth system

Climate and Climate Change

- **Weather**

- current precipitation/temperatures

- **Climate**

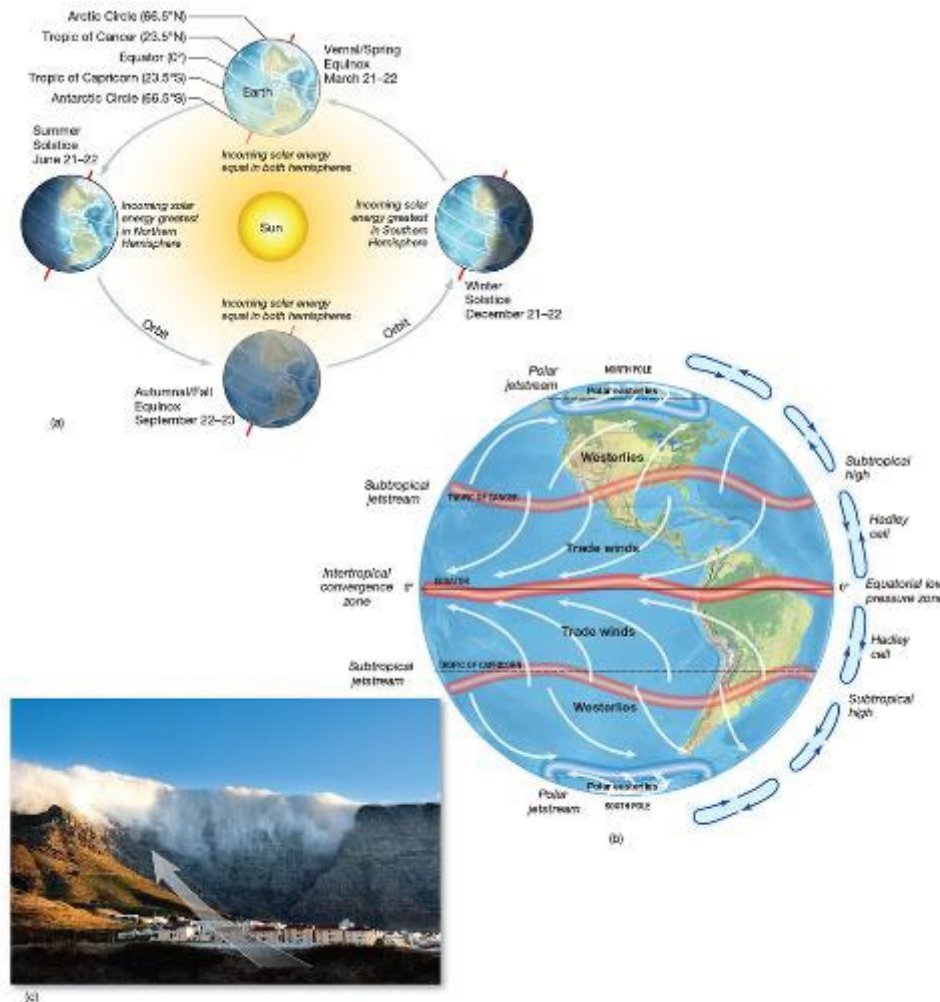

- average weather at a location over time

- **Climate systems**

- solar interaction with atmosphere, hydrosphere, lithosphere, biosphere.

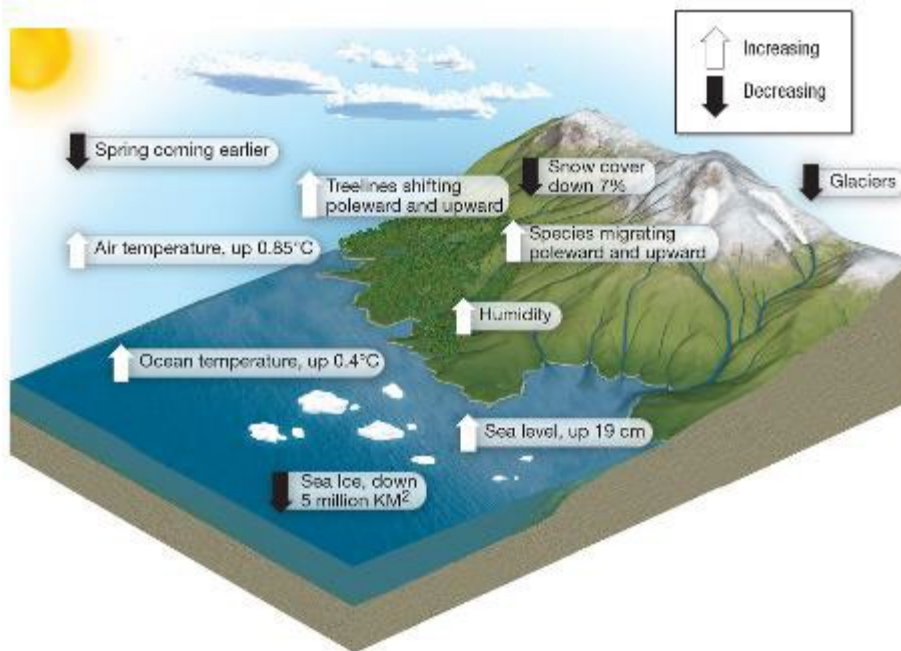

- **Atmospheric circulation**

- air and ocean currents
- transports heat and moisture from one place to another

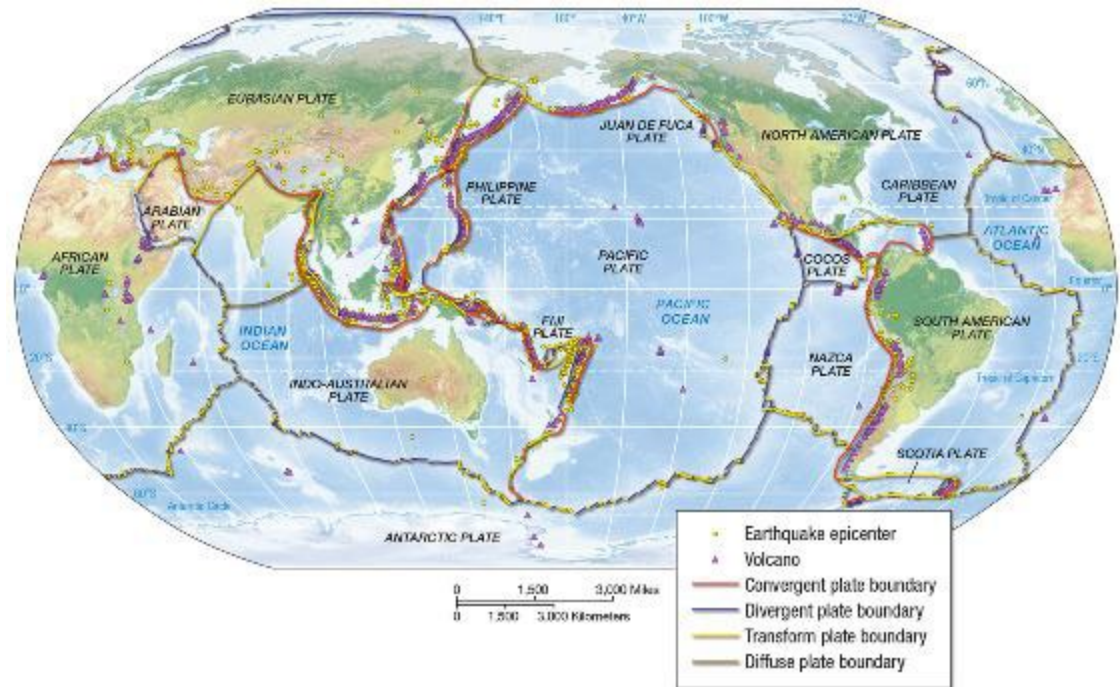

Ecological Landscapes (cont.)

- **Greenhouse gases**
- **Global warming**
 - heat trapped in atmosphere
 - climate extremes

Furs

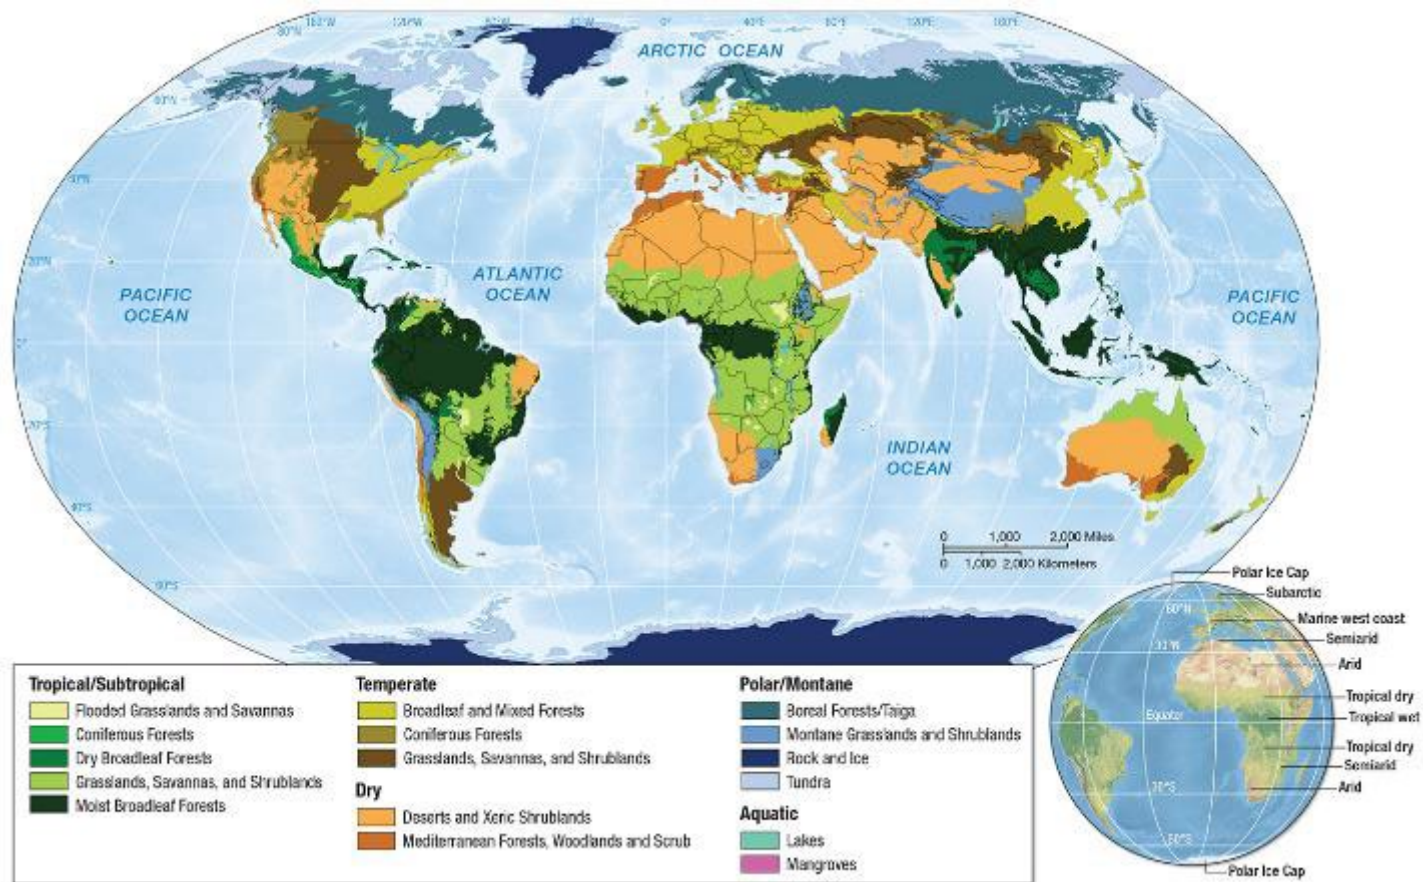

- **Geomorphology**
 - physical processes that shape landforms
- **Plate tectonics**
 - convergent
 - divergent
 - transform

Ecology, Land, and Environmental Management

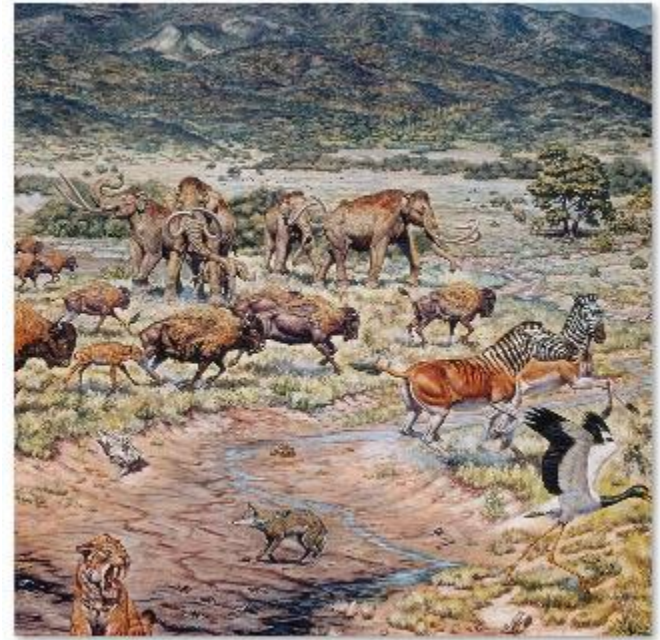

- **Biomes**

- large regions of similar climates/physical conditions

Ecology, Land, and Environmental Management, (cont)

- **Biodiversity**
 - species variation
- **Ecosystem services**
- **Rewilding**
 - reintroduction of wild species
- **Invasive species**

Sustainability and the Future

- **Sustainability**

- triple bottom line: serving profit, people, and the planet
- growing local food
- water conservation
- recycled compost

(a)

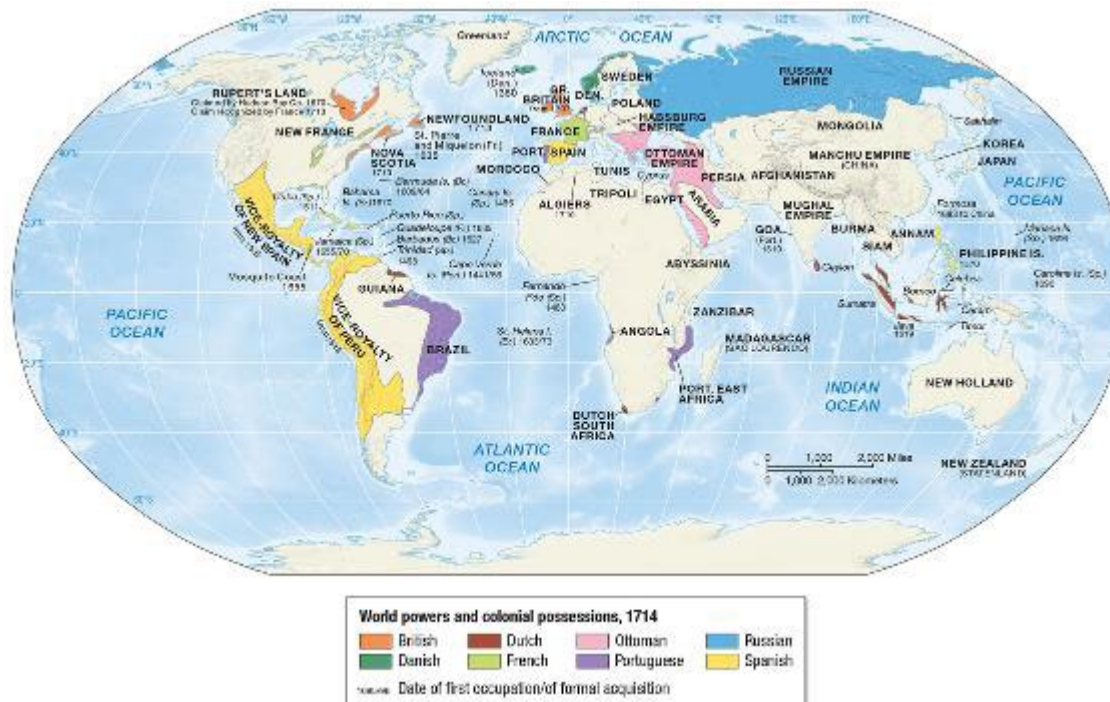

(b)

(c)

History, Economy, and Territory

- **Colonialism**
 - regions and societies dominated by external society
- **First wave**
 - European investment in port cities
 - **plantation economies**

History, Economy, and Territory, (cont)

- Second Wave
 - Africa/Asia/Australia
 - imperialism
 - Industrial Revolution
 - capitalism

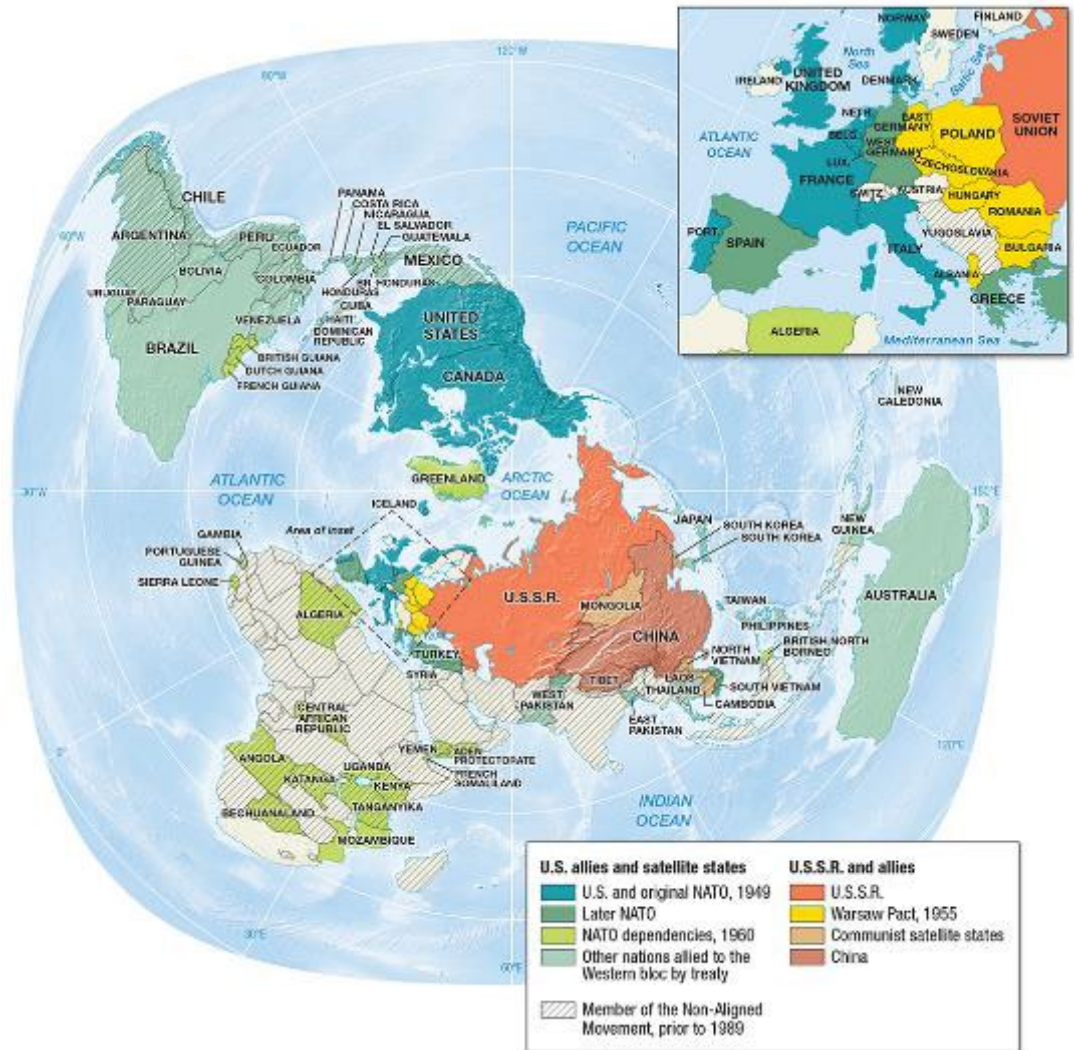

World powers and colonial possessions, 1914

Belgian	Dutch	Italian	Russian
British	French	Ottoman	Spanish
Danish	German	Portuguese	U.S.

Source: Date of first occupation or formal acquisition

History, Economy, and Territory, (cont)

- Decolonization
- Communism
- Cold War

Economy, Accumulation, and the Production of Inequality

- Primary
- Secondary
- Tertiary
- Quaternary
- MNCs

Extractive

Primary activities are any form of natural resource extraction. These include agriculture, mining, fishing, and forestry.

Manufacturing

Secondary activities are concerned with manufacturing or processing. These include steelmaking, food processing, furniture making, textile manufacturing, and garment manufacturing.

Services

Tertiary activities are those that involve the sale and exchange of goods and services. These include: warehousing, retail stores, personal services such as hairdressing, commercial services such as accounting and advertising, and entertainment.

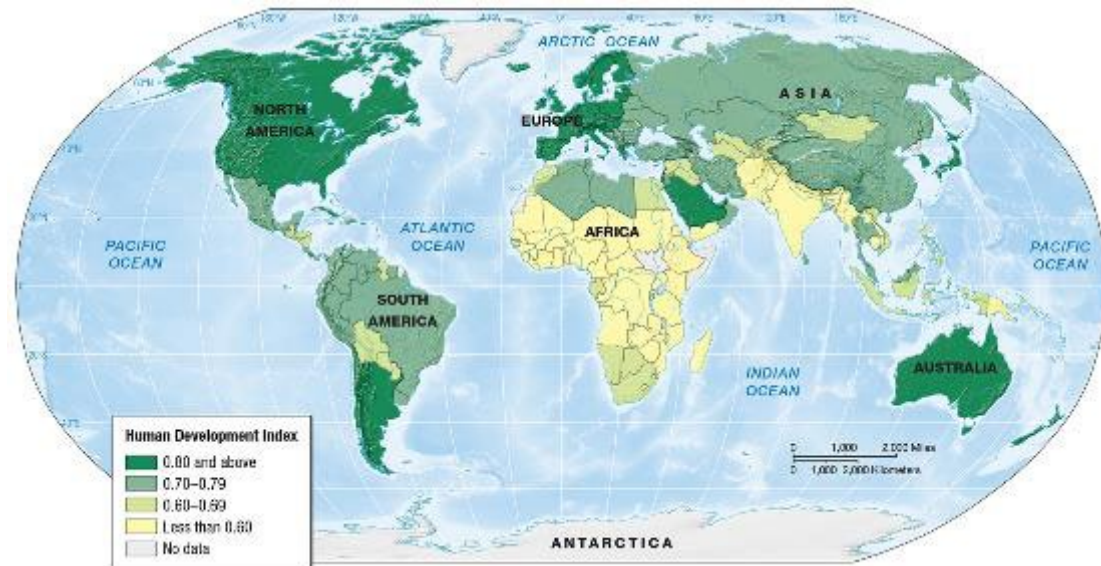

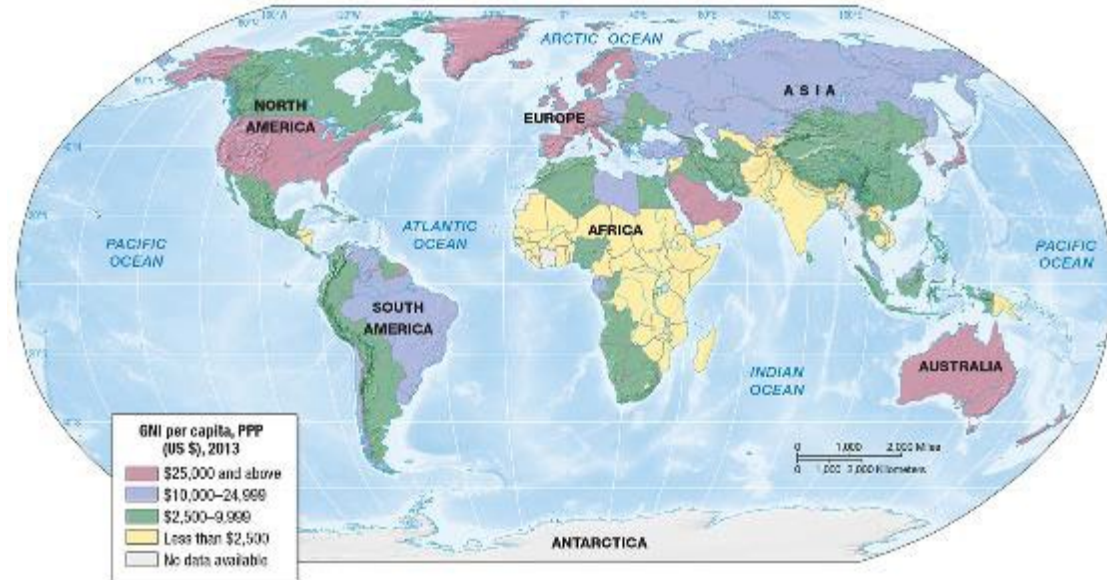

Information

Quaternary activities include handling and processing knowledge and information. Examples include data processing, information retrieval, education, and research and development (R&D).

Economy, Accumulation, and the Production of Inequality, (cont)

- **Gross Domestic Product (GDP)**
- **Gross National Income (GNI)**
- **Purchasing Power Parity (PPP) per capita**
 - Corrective measure
- **Global north/global south**
- **HDI**

Territory and Politics

- Sovereign state vs nation
- Nation-state
- Failed state
- Supranational organizations
- NGOs

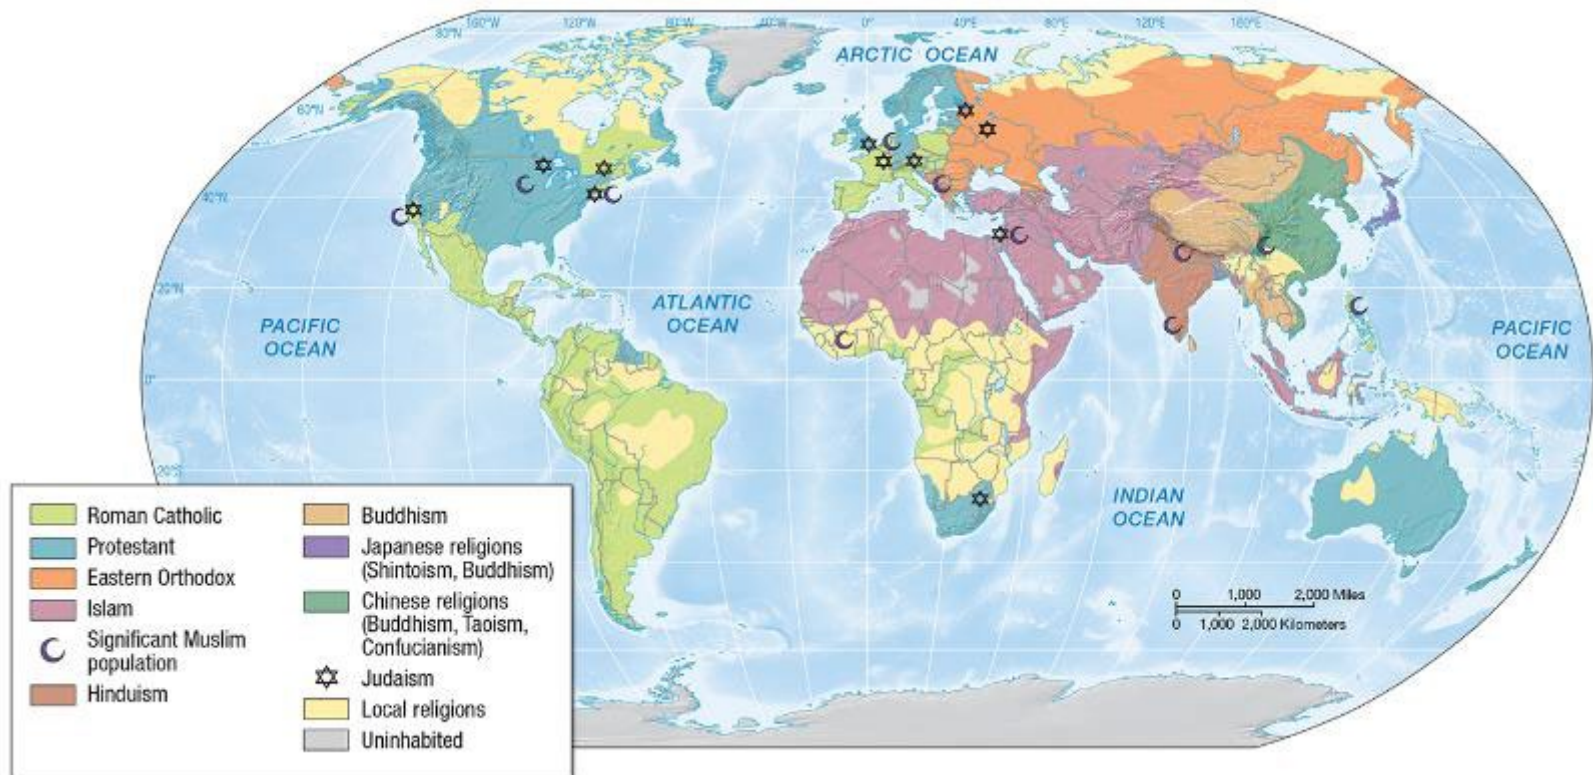

Culture and Populations

- **Culture**
 - shared set of meanings and practices
- **Demographics**
 - population densities
 - population movements

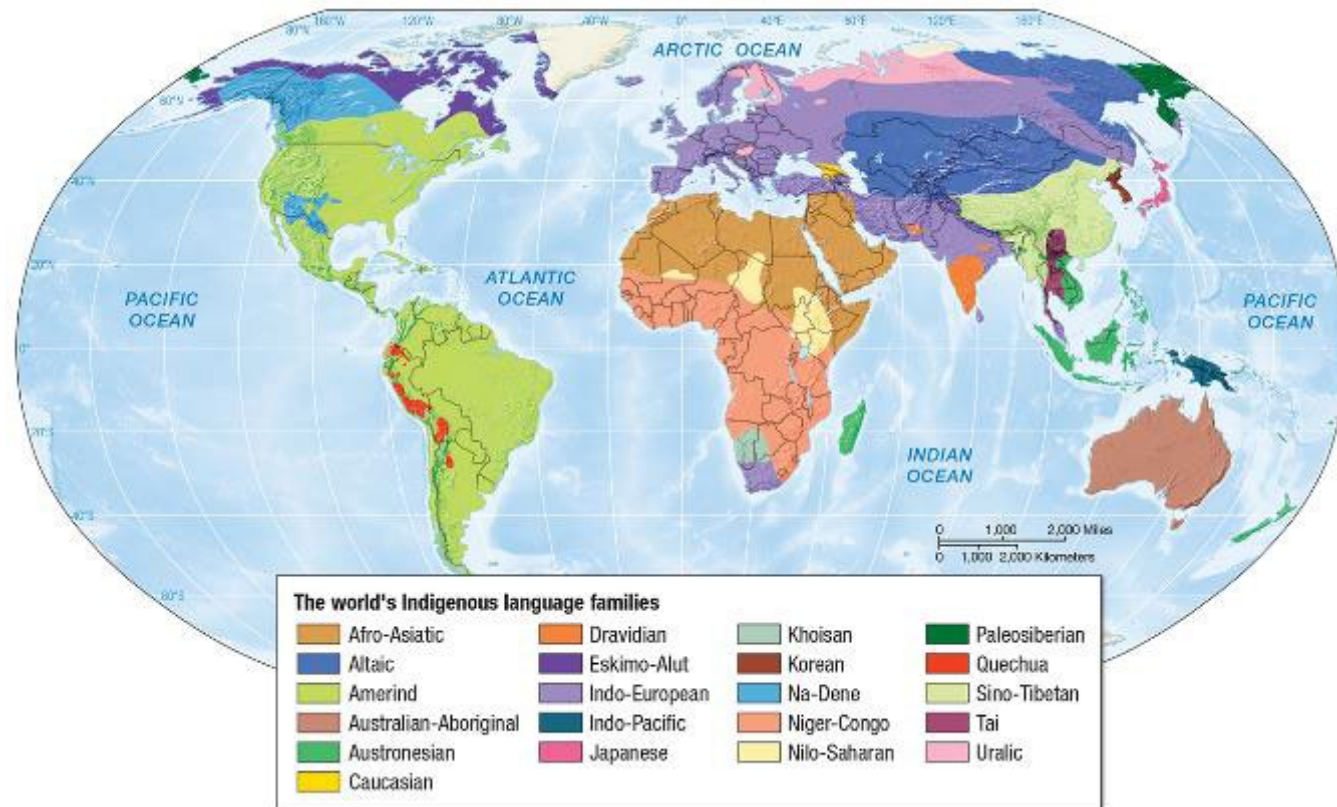

Culture, Religion, and Language

- Geographies of religion
 - diffusion
 - global distribution
 - spread of religious fundamentalism

Culture, Religion and Language, (cont)

- Geographies of language
 - global distribution
 - **dialects**
 - **lingua franca**

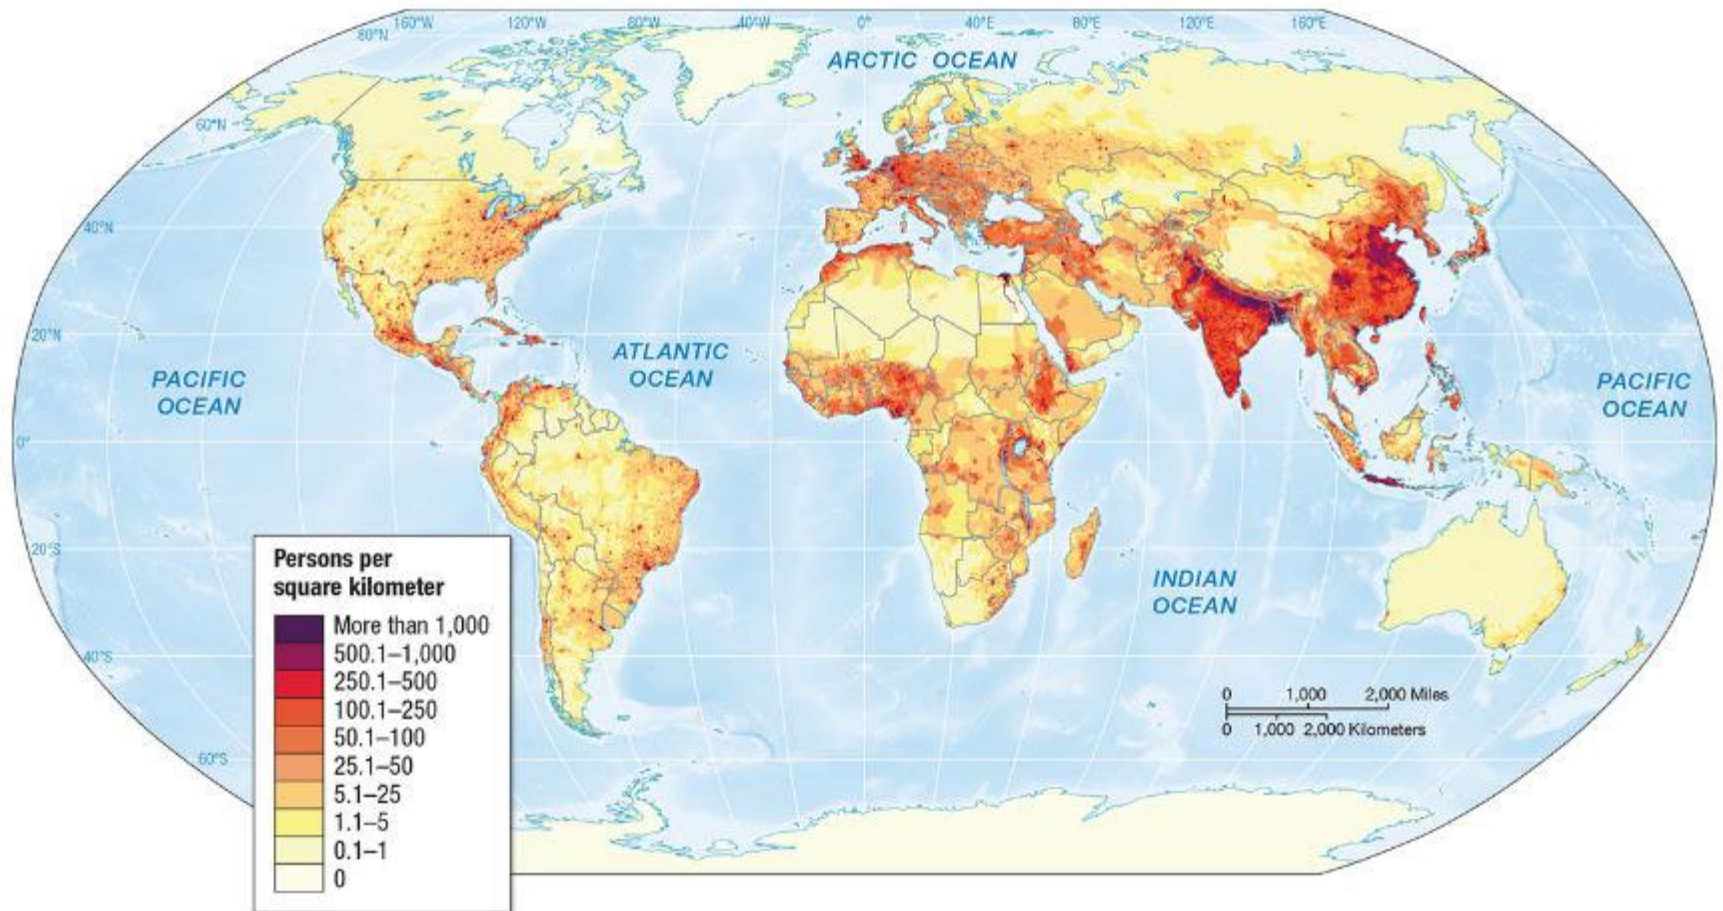

Cultural Practices, Social Differences, and Identity

- **Ethnicity**
 - community identity
- **Race**
 - problematic
- **Gender**
 - socially learned differences between men/women
- **Class**
 - based on wealth and access to resources
- **Sexuality**

Demography and Urbanization

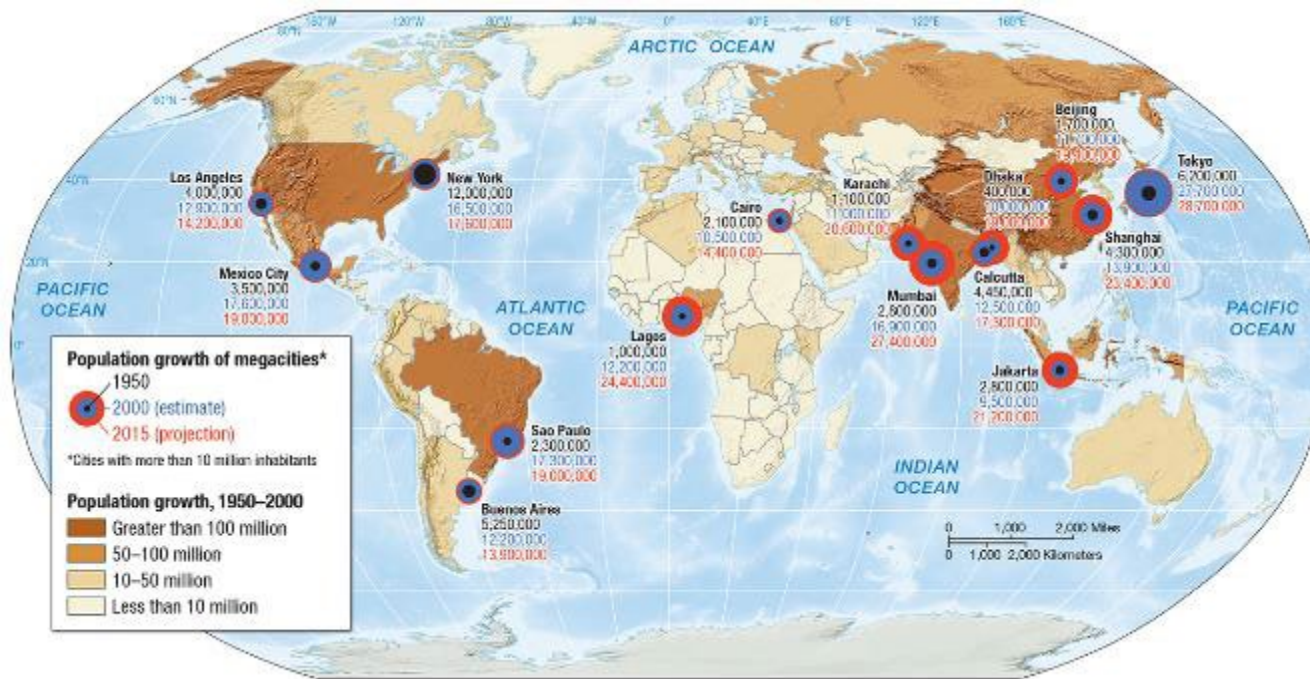

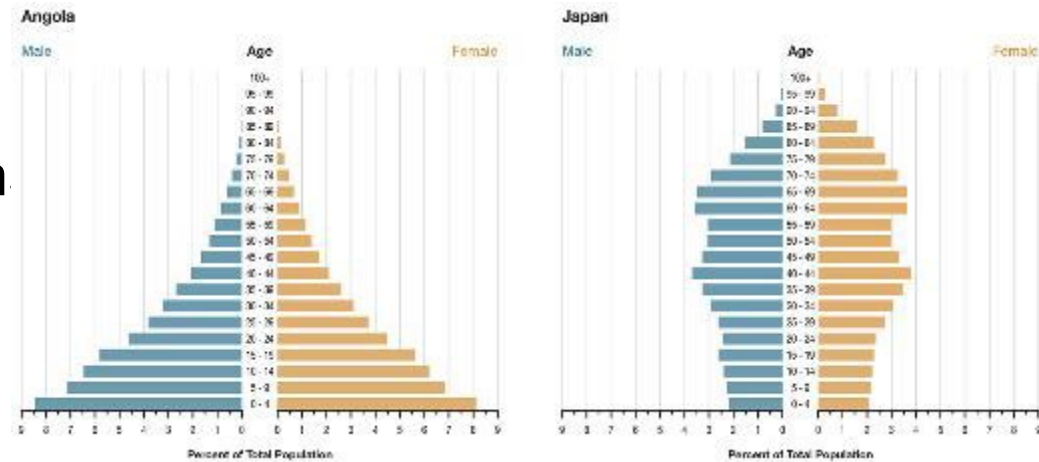

- Uneven distribution
 - 7 billion global population

Demography and Urbanization, (cont)

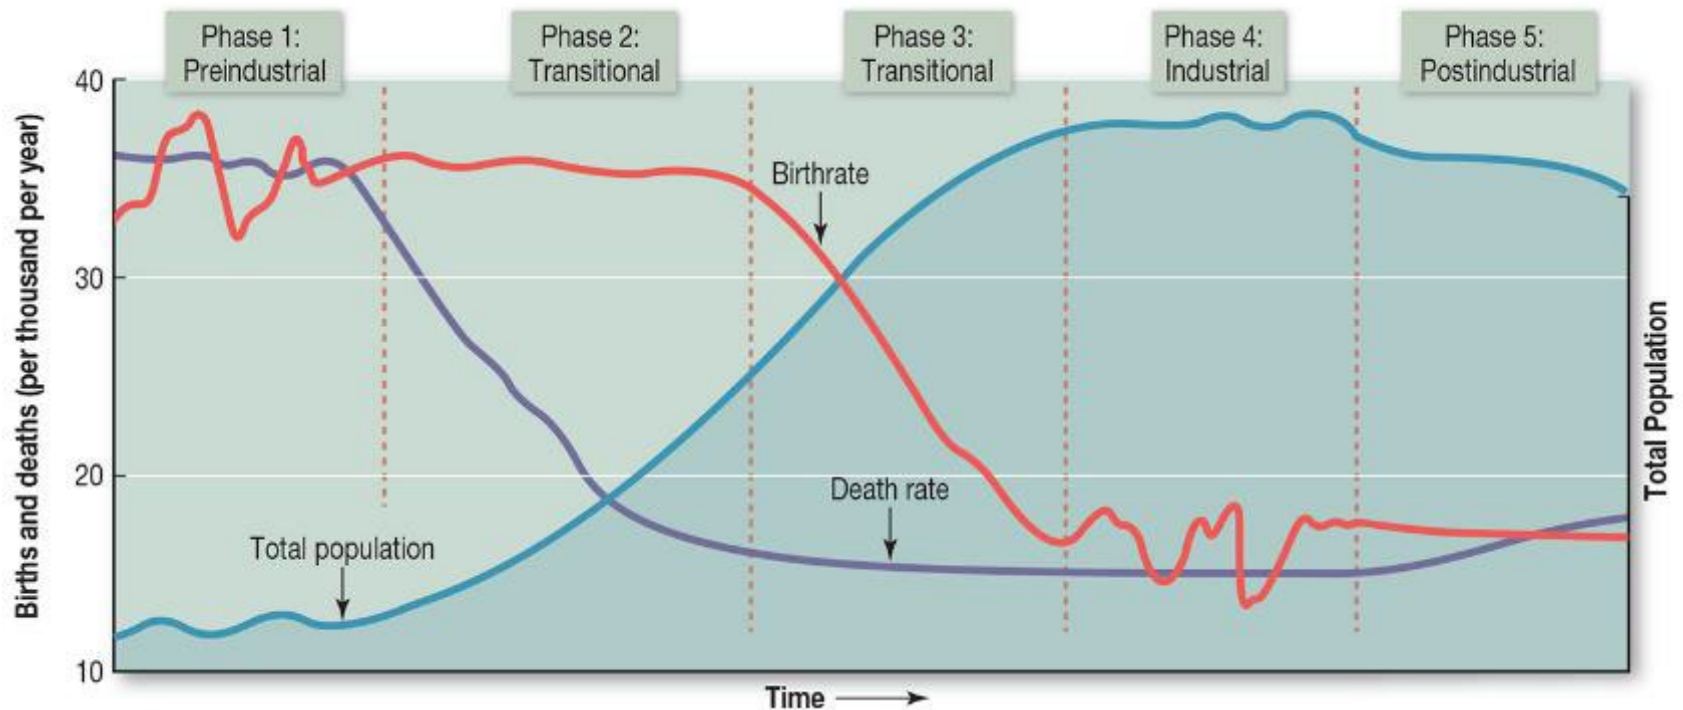

- **Megacities**

- rural to urban migration
- birth rates
- death rates
- population pyramids

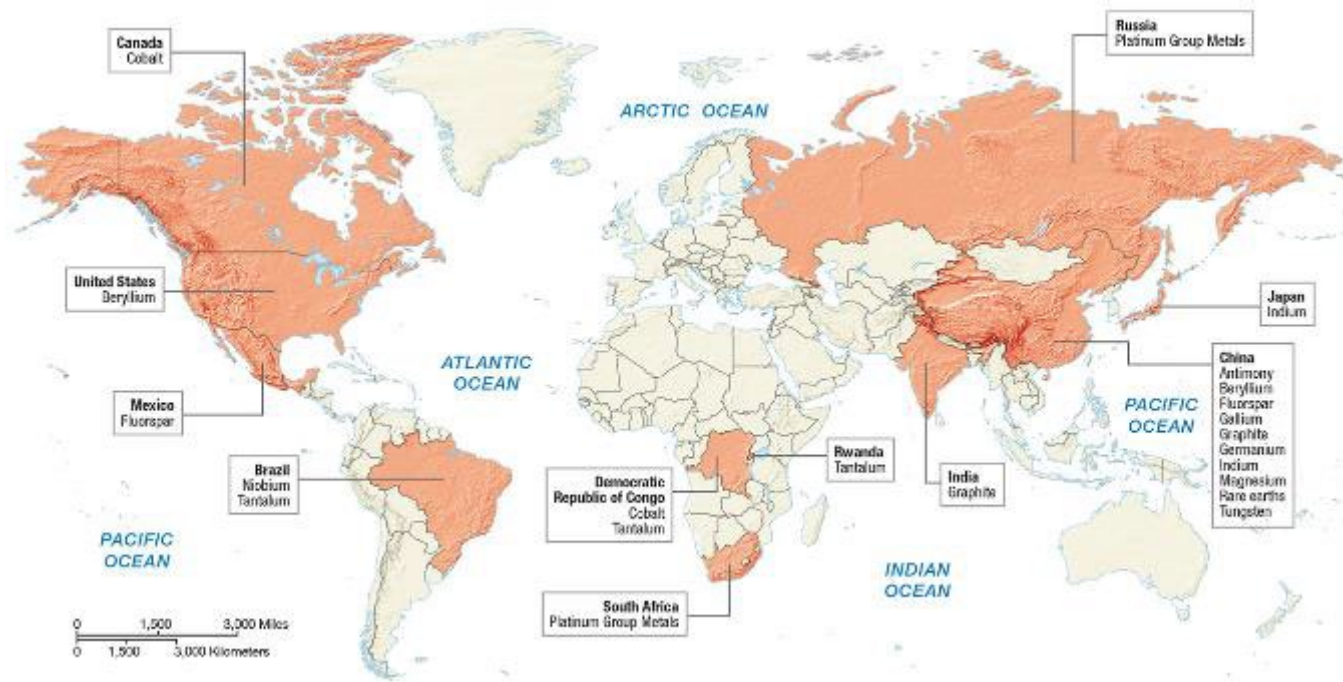

Modeling Demographic Change

- **Demographic transition**
 - predicts patterns of change over time
 - women's status and fertility
- **Population pyramids**

Future Geographies

- **Population Boom or Bust?**
 - regional decreases
 - regional increases
- **Emerging Resource Regions**
 - globalization of resources
 - new resource regions

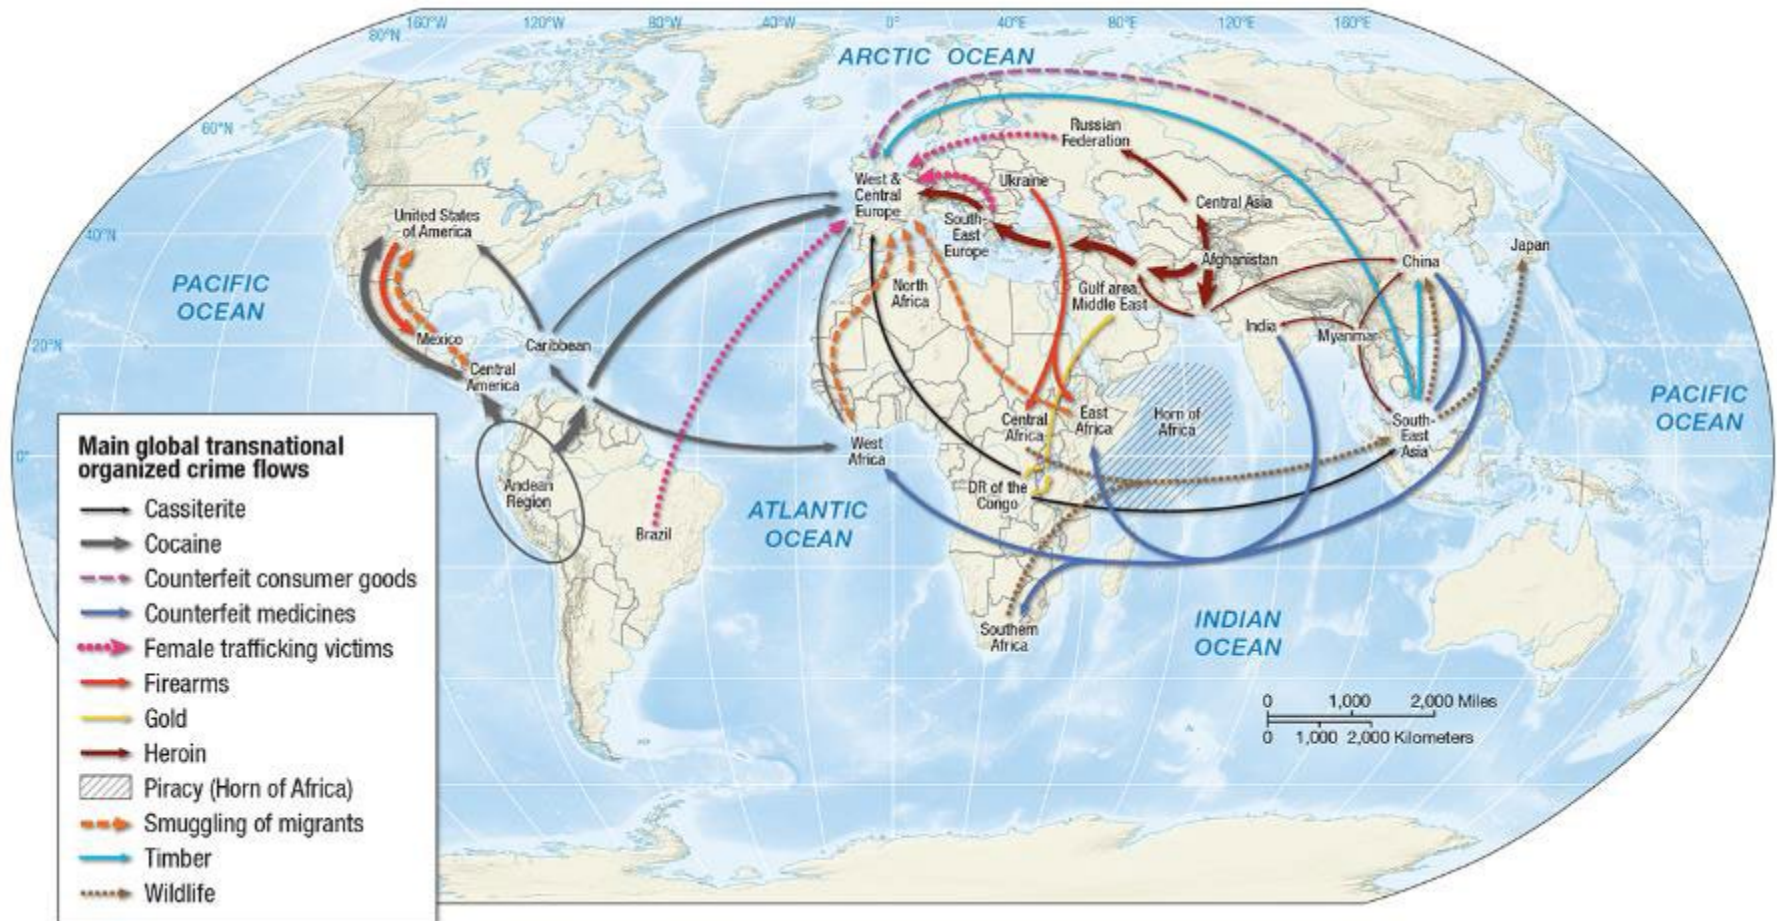

Economic Globalization and Challenges to Regional Governance

- Supranational organizations
 - NAFTA
 - EU
 - WTO
- Goal of creating global trading areas
 - states/cities increasingly making connections with supranational organizations

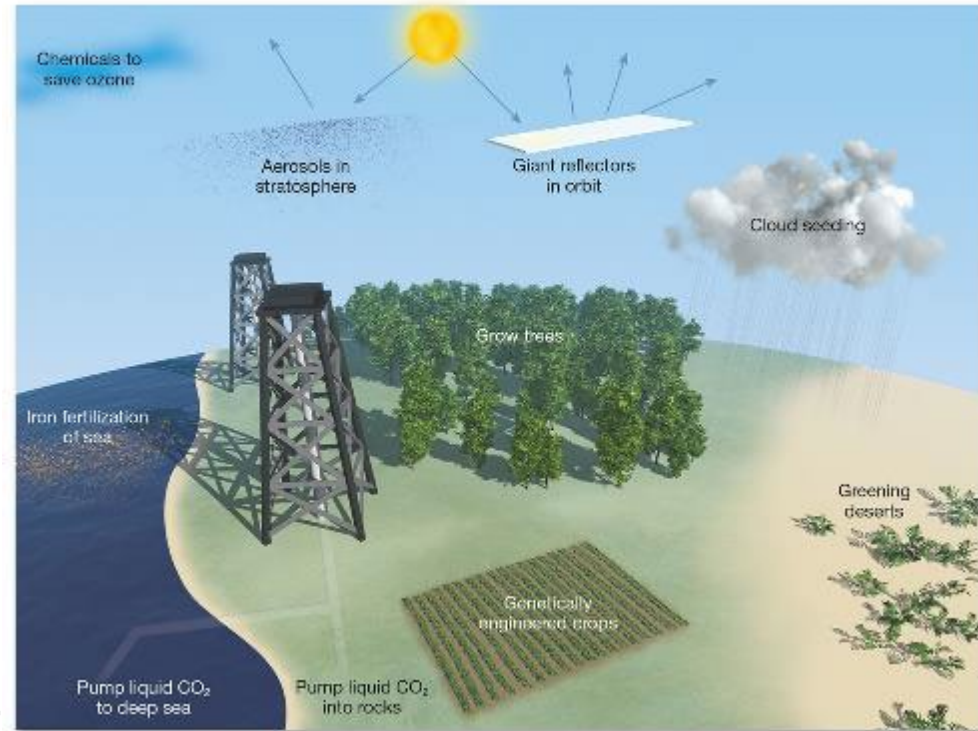

New Regions of Insecurity and Crime

- Internationalization of crime

Future Environmental Threats and Global Sustainability

- Multiple threats to the environment
 - loss of biodiversity
 - water and air pollution
 - greenhouse gas emissions
- **Geoengineering**
 - block incoming sunlight
 - carbon storage

End of Chapter 1
