

World Regions in Global Context: Peoples, Places, and Environments

6th Edition

Europe

Lectures by:
Christa Ann Smith

Learning Outcomes

- Analyze how Europe's landscapes developed around regions of distinctive geology, relief, landforms, soils, and vegetation.
- Explain the rise of Europe as a major world region and understand how Europeans established the basis of a worldwide economy.
- Describe the reintegration of Eastern Europe.
- Summarize the importance of the European Union and its policies.

Learning Outcomes

- Identify the principal core regions within Europe.
- Assess the importance of language, religion, and ethnicity in shaping ongoing change within Europe.
- Describe Europe's patterns of demographic change and urban development.

Environment, Society, and Sustainability

- Central location
- Peninsulas and islands
- Navigable rivers
 - Danube
 - Dnieper
 - Elbe
 - Rhine
 - Seine
- **Watersheds**
(drainage areas)

Climate and Climate Change

- Northwestern Europe
 - moderating effect of the sea
- Eastern Europe
 - seasonal extremes
- Mediterranean Europe
 - cool winters and hot, dry summers
- Climate change
- **UN Kyoto Protocol**
 - **Emissions Trading Scheme (ETS)**

Geological Resources, Risk, and Water

- Four principal **physiographic regions**
- Landscape product of centuries of human adaptation
 - aspect

Geological Resources, Risk, and Water (cont.)

- Northwestern Uplands
 - oldest rocks in Europe
 - **uplands** (high, hilly)
 - **cirques** (deep, bowl mountainside basins)
 - **fjords**
 - **moraines**
- Alpine Europe
 - agriculture
 - tourism

Geological Resources, Risk, and Water (cont.)

- Central Plateaus
 - Europe's coal field
 - massif
 - forests
- North European Lowlands
 - flat or gently undulating
 - region of farming and settlements
 - **loess**
 - **steppe**

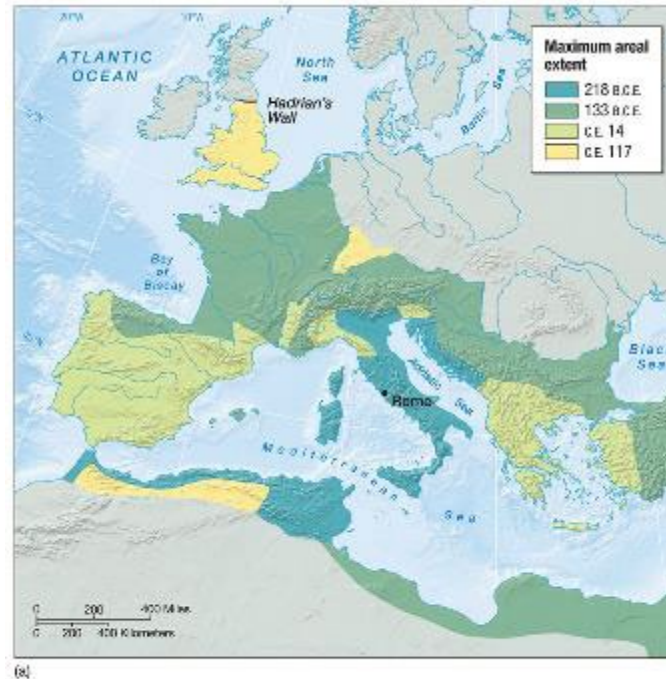

Ecology, Land, and Environmental Management

- Medieval Europe
 - significant transformation
 - drainage schemes
 - **Little Ice Age**
- Modern Landscape
 - **polders** (low-lying areas reclaimed from the sea)
- Industrialization
 - mining
 - pollution
 - **acid rain**

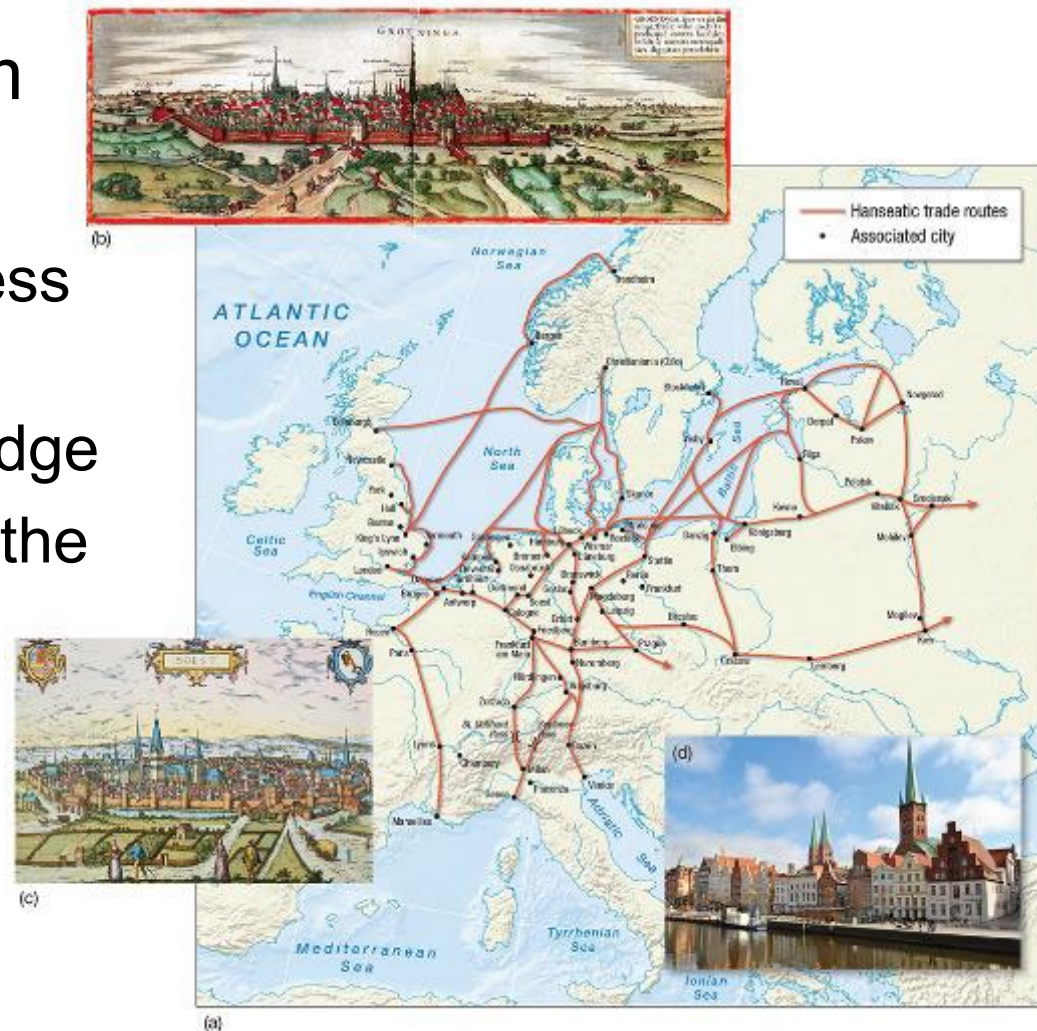

History, Economy, and Territory

- Europe's foundations laid by Greeks and Romans
 - cities
 - agriculture
 - self-sufficiency
- Decline of Roman Empire
 - **feudal system**

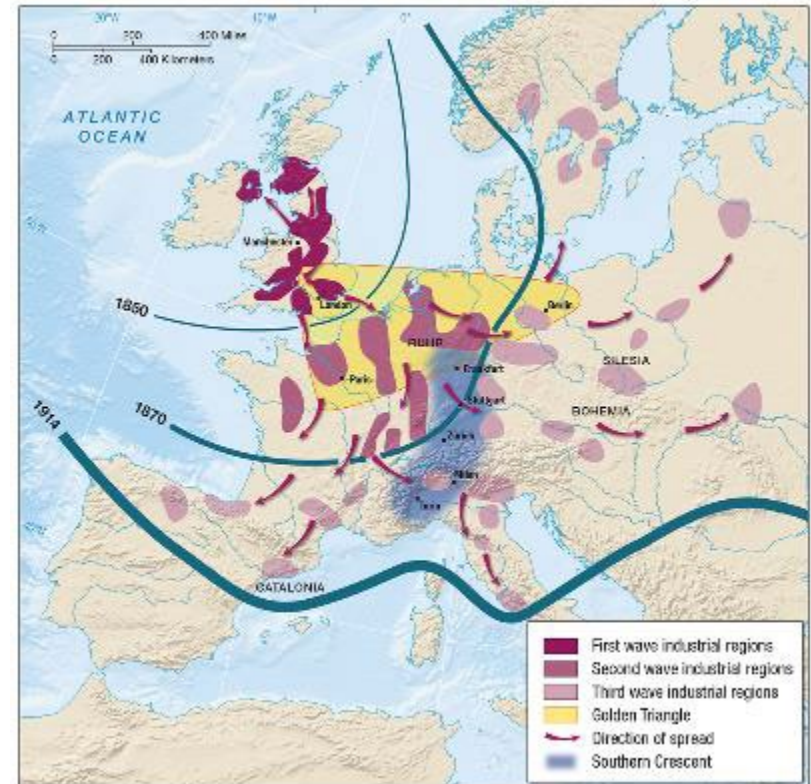

Historical Legacies and Landscapes

- Mercantile capitalism
- Age of Discovery
 - innovations in business and technology
 - geographical knowledge
 - shift in orientation to the Atlantic
 - **entrepôt**

Historical Legacies and Landscapes (cont.)

- Colonization
 - resource extraction
 - improvements in navigation and weaponry
 - rise in industrial capitalism
- Industrialization
 - **technology systems**
 - **first wave**
 - **second wave**
 - **third wave**

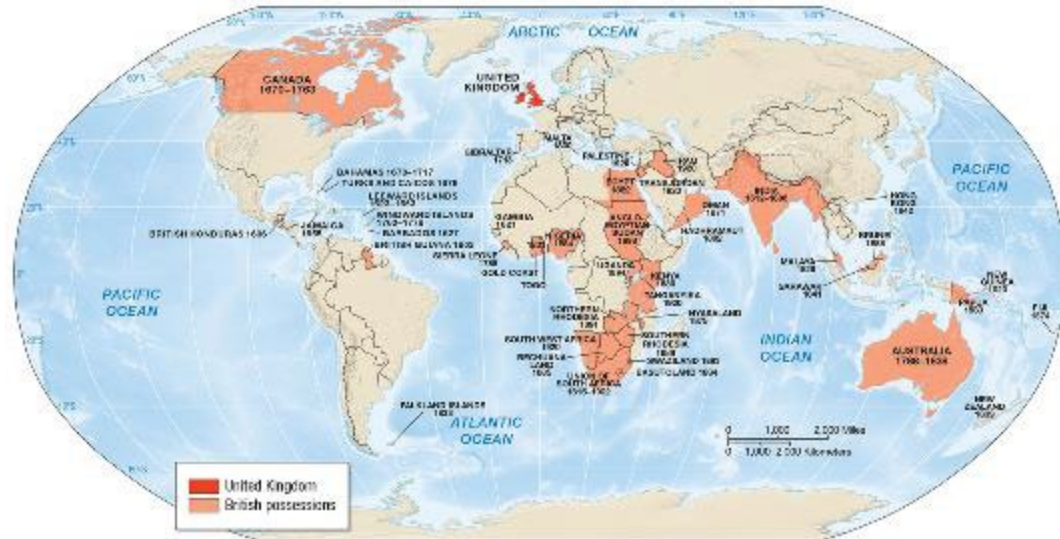

(a)

(b)

Historical Legacies and Landscapes (cont.)

- **Imperialism**
- **Disruption**
 - WWI
 - **Great Depression**
 - WWII
- **Rebuilding**
 - **Marshall Plan**
 - **state socialism**

Historical Legacies and Landscapes (cont.)

- Eastern Europe becomes a **buffer zone**
 - Iron Curtain
- **Satellite states**
 - command economies
 - **COMECON**
 - industrial growth, but drab cityscapes

Historical Legacies and Landscapes (cont.)

- Fall of state socialism
- Market reforms
- Reintegration
 - cheap land and labor has brought in foreign investment
 - inflation, unemployment, and homelessness appeared quickly
 - countries still struggling
 - countries well integrated

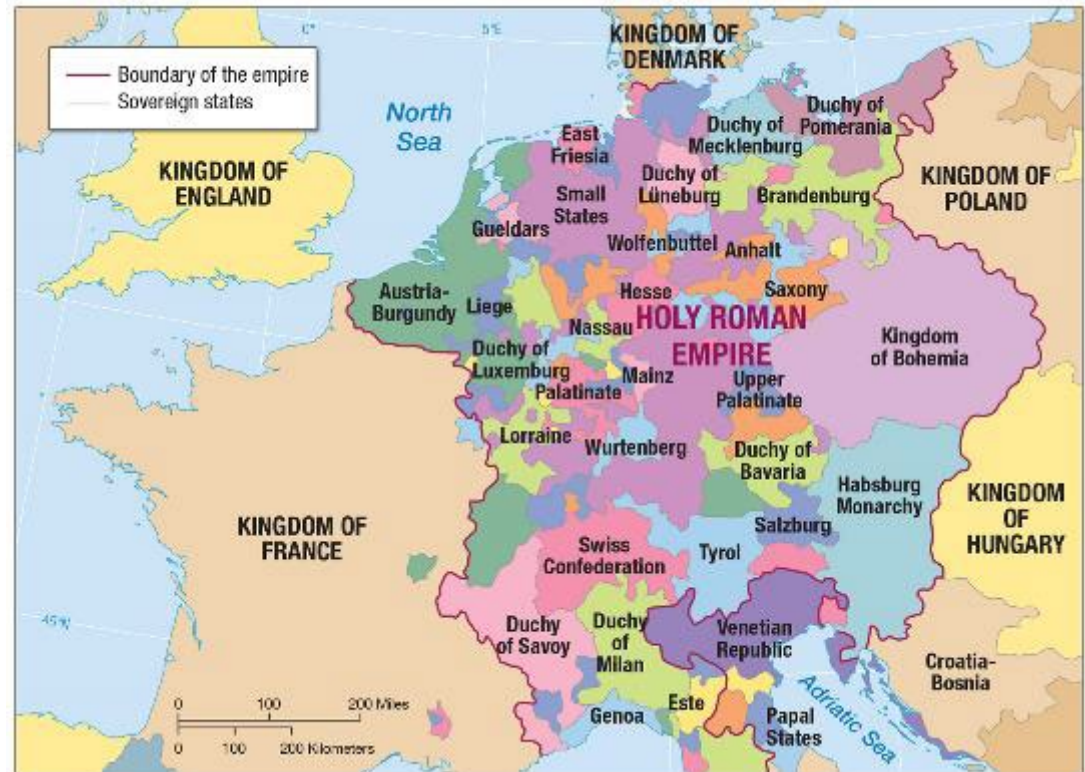

Economy, Accumulation, and the Production of Inequality

- 35% of world's exports
- 33% of the world's aggregate gross national income (GNI)
 - welfare state
 - social housing
- **European Union (EU)**
 - common agriculture policy
- **Maastricht Treaty**
 - euro

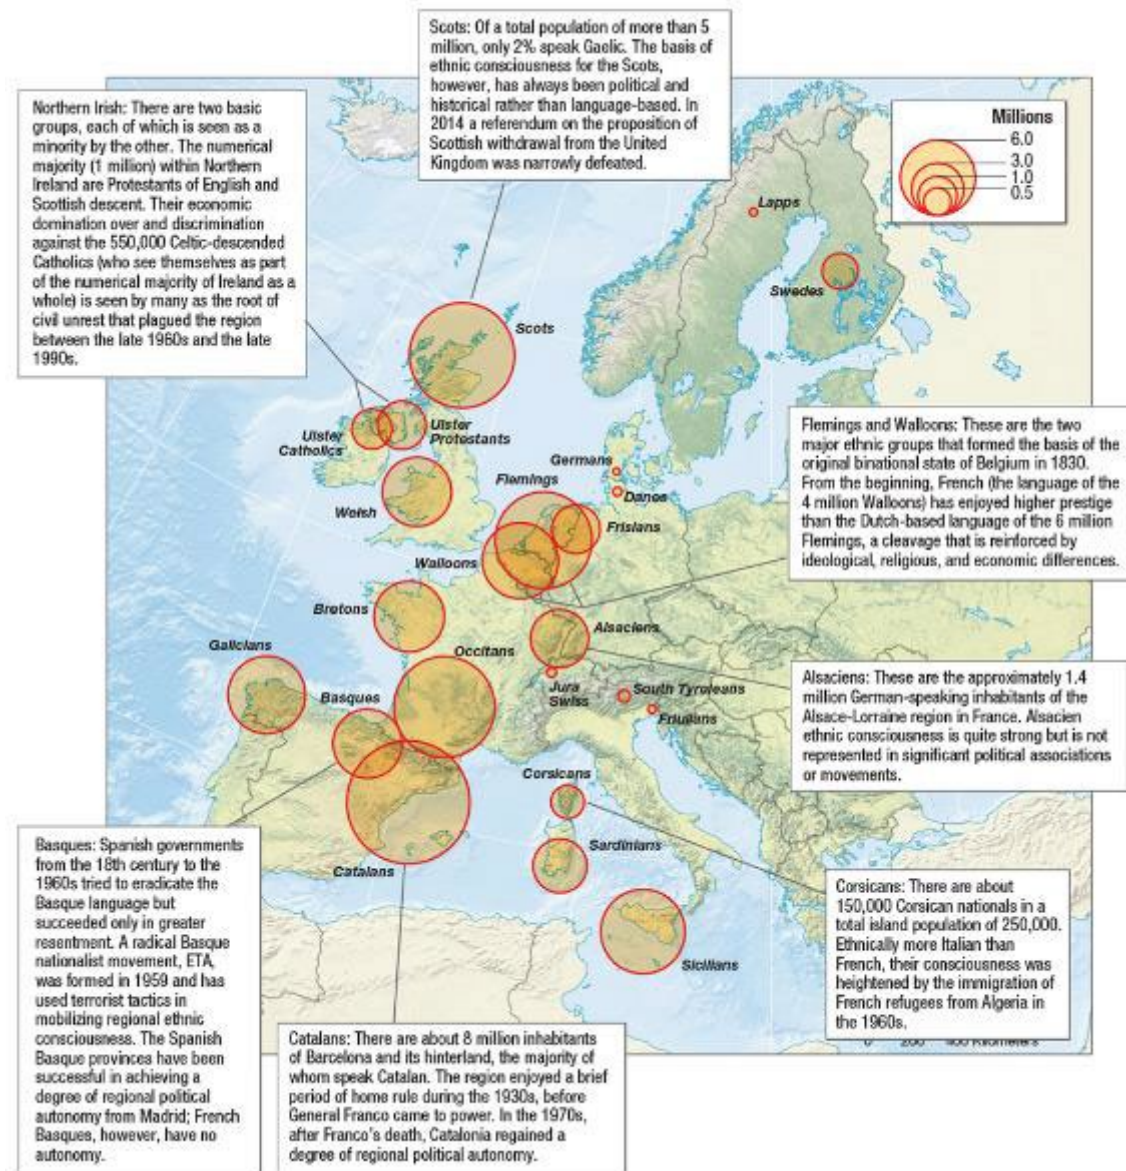

Territory and Politics

- Enlightenment
 - rise of nation–states
- Regionalism
 - ethnic minorities
 - violence and political autonomy
 - **irredentism**

Territory and Politics (cont.)

- Ethnic conflict
 - balkanization
 - enclaves and exclaves
 - ethnic cleansing
 - Kosovo

Cultures and Populations

- Religion
 - Roman Catholic
 - Protestant
 - immigrants and Islam
 - rise of secularism
- Language
 - Romance
 - Germanic
 - Slavic

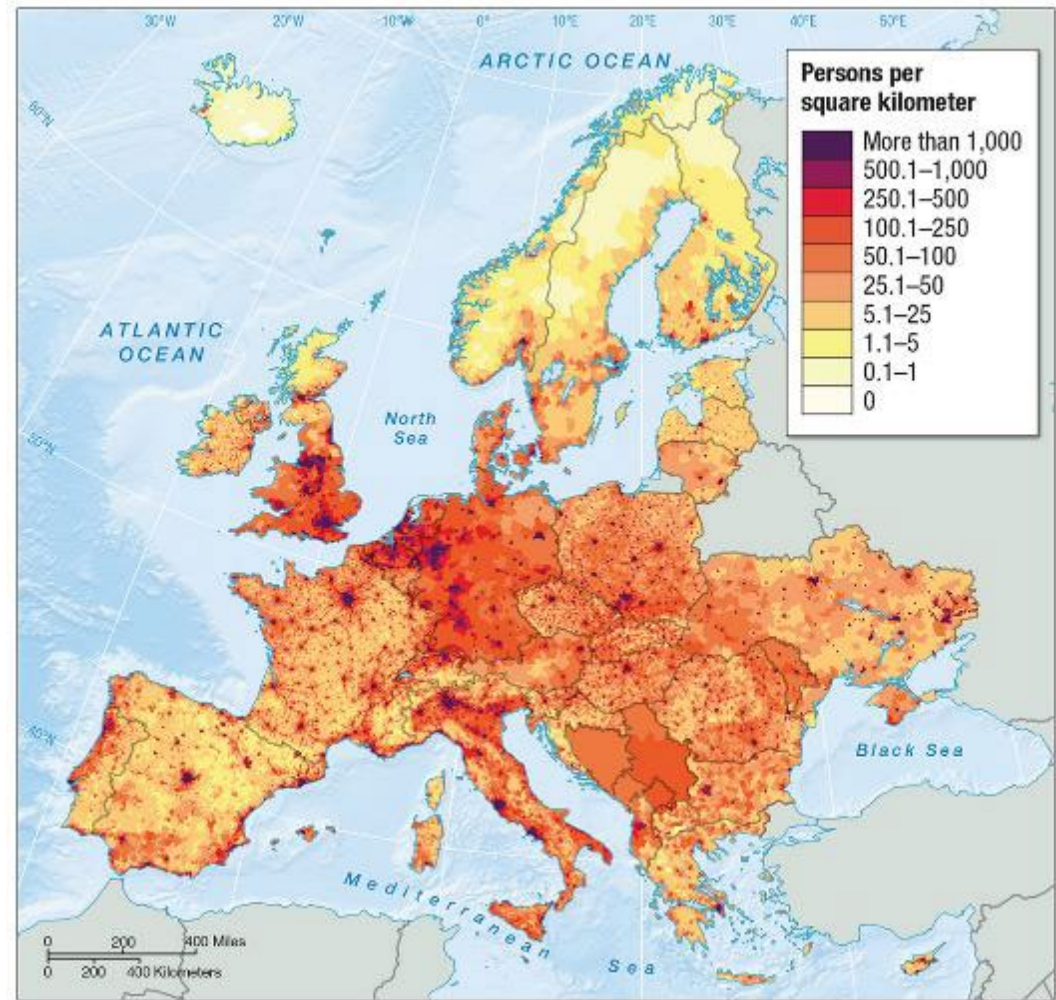

Cultural Practices, Social Differences, and Identity

- Modernity
- European identity
 - immigration law
 - **xenophobia**
- Women in European society
 - gender inequality
 - income gaps

Demography and Urbanization

- Densely populated
- Stable growth
- Baby bust
- Increased life expectancies

Demography and Urbanization (cont.)

- European diaspora
- Migration within Europe
 - industrialization and conflict
 - rural to urban
- Recent migration streams
 - labor migrants
 - war and persecution

Europe's Muslims

- Western European cities
 - migrant workers
 - asylum seekers
 - refugees
- Resistance to cultural assimilation
 - discrimination

Europe's Towns and Cities

- Highly urbanized
- **World cities**
- Traditional market towns

Future Geographies

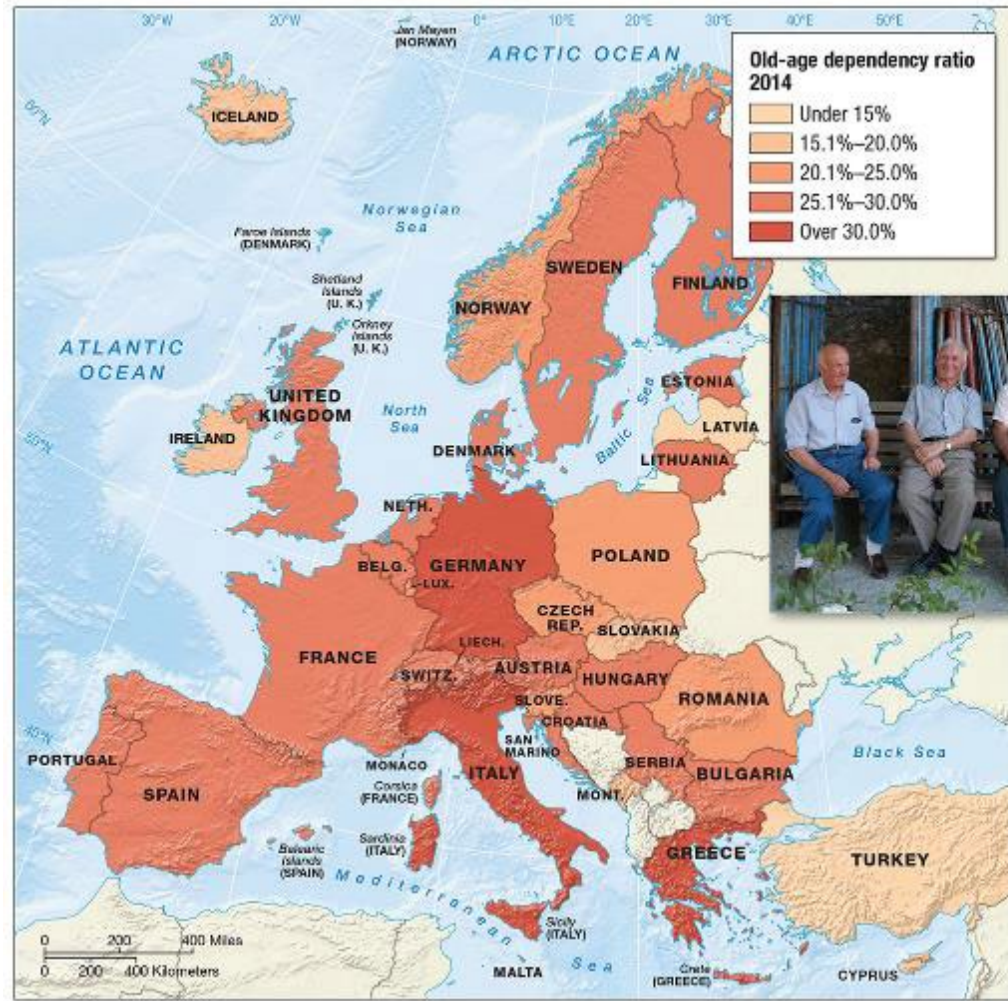

- Coping with aging populations
- Economics and politics of immigration

(a)

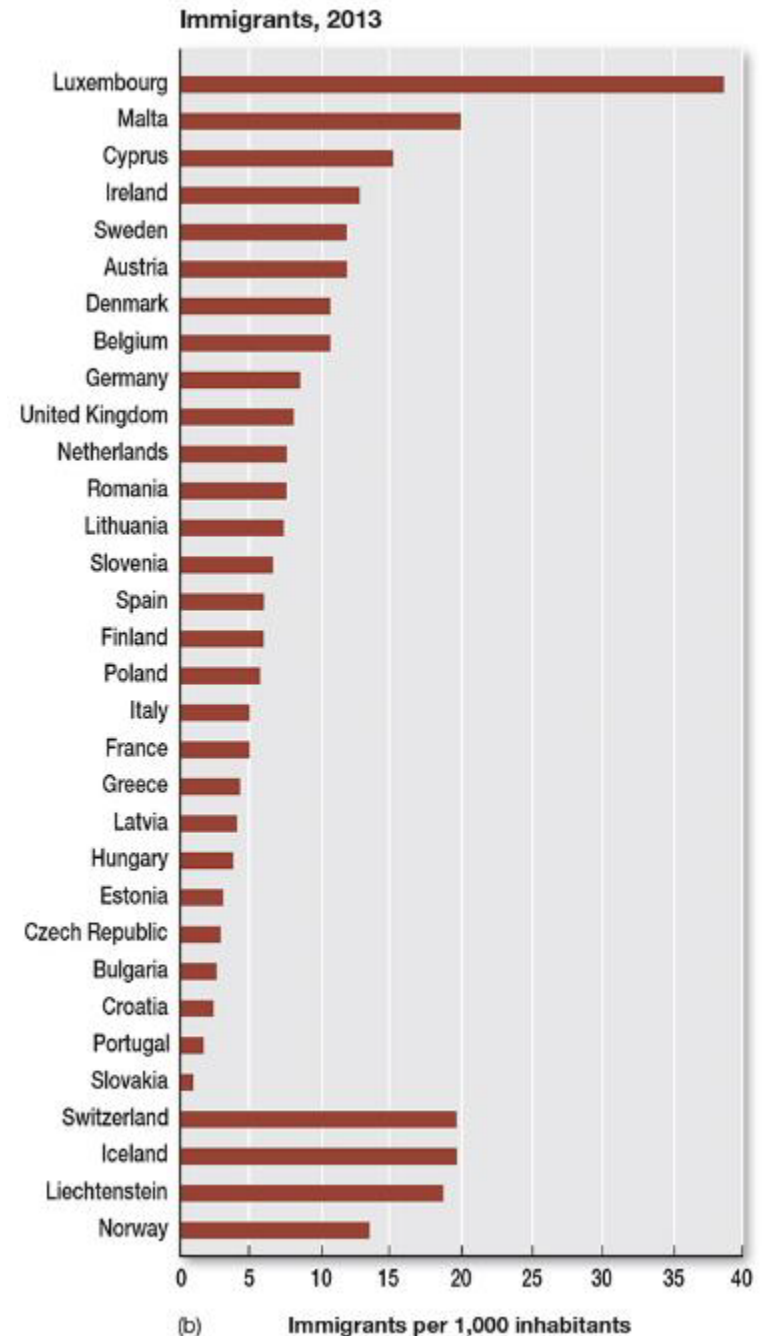

Coping with Aging Populations

- Europe has 19 of the world's 20 oldest countries
- Old-age dependency ratios increasing

Coping with Immigration

- North Africa/Middle East immigrants
- Growing Muslim population
 - social and cultural conflict

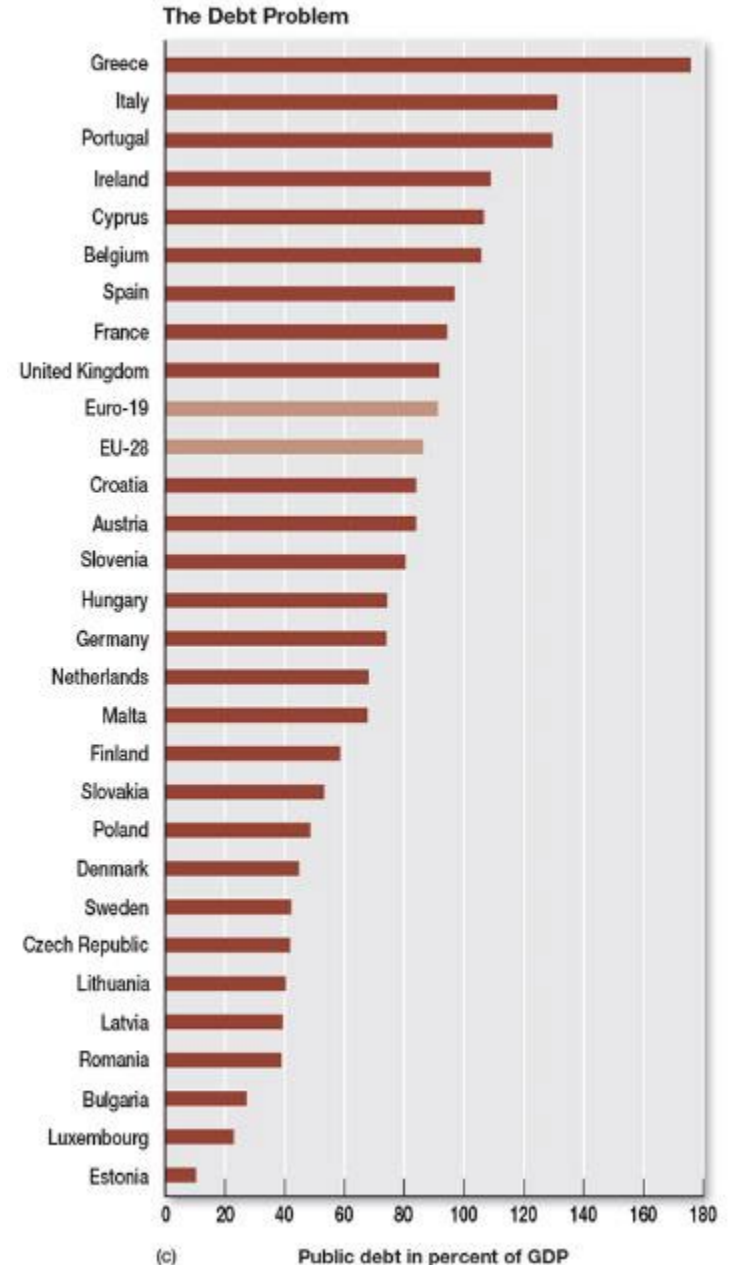

The EU: Costs of Expansions

- Expansion of EU costly
 - EU subsidies to new member countries account for more than 40% of total budget

The EU: Problems of Indebtedness

- Weak European countries tied to stronger ones through the Eurozone

End of Chapter 2
