Important

This catalog is to be read by all Ashworth College Students per student's enrollment agreement.

Ashworth College 2026 Catalog Copyright 2026 Ashworth College. All rights reserved.
No part of this catalog and/or materials may be reproduced in any form or by any means without written permission.

Purpose: The Catalog is the official document for all academic policies, practices, and program requirements. The general academic policies and policies govern the academic standards and accreditation requirements to maintain matriculated status and to qualify for a degree, diploma, or undergraduate certificate.
Ashworth has adopted a 'grandfather clause' policy such that students have a right to complete their academic programs under the degree requirements that existed at the time of their enrollment, to the extent that curriculum offerings make that possible. If program changes are made that effect student programs of study, every
effort will be made to transition students into a new program of study that meets new graduation requirements. Students proceeding under revised academic policies must comply with all requirements under the changed program.

Reservation of Rights: Ashworth College reserves the right to make changes to the provisions of this catalog and its rules and procedures at any time, with or without notice, subject to licensing requirements.
This catalog is not a contract but merely a general outline of the programs being operated presently by the school.
Certain policies may be grandfathered in at the time of enrollment and other revised policies supersede prior policies.

Introduction

Greetings,

Welcome to Ashworth College. Since 1987, we have been setting new standards of excellence in education and providing education “on your terms.”

Today we are a respected, worldwide leader in self-guided distance learning. We bring the finest, most comprehensive instruction, in the most flexible way possible. Ashworth also offers a broader array of study options than other online schools by providing more career- focused instruction and support, greater accessibility to teachers and academic advisors, more opportunities to connect with other students, more affordable tuition, and easier payment plans. Overall, you can look forward to a first-class educational experience that meets your highest expectations.

It takes discipline to complete a degree or certificate program as a distance education student. For more than 25 years, Ashworth has been educating busy people like you. In fact, hundreds of thousands of students have entrusted us to help them achieve a better life. Stay focused and set a specific time to study on a regular basis and you will be able to achieve your desired degree or certificate.

Your courses have been carefully prepared, using the finest textbooks and eBooks available. The faculty and staff at Ashworth College are exceptional in their fields and in developing and supporting distance learning programs.

Please read this catalog carefully. It provides helpful study guidance and information on our policies and programs.

As a reminder we must receive proof of completion of your high school education (see page 25 for additional information). We will also need your official college transcripts if you plan to transfer any credits. Please act as soon as possible so you can continue to study uninterrupted.

Let Ashworth College help you study smarter, advance faster, and reach your goals. Here's to your new life!

Cordially,

Kermit Cook
Chief Executive Officer Ashworth College

History

Since its founding in 1987, the Professional Career Development Institute ("PCDI") has developed a large selection of distance-learning programs. The PCDI started as a career school that offered one career course. Early programs focused on vocational and avocational education pathways for students, with the school exceeding 50 career diploma programs today.

James Madison High School ("JMHS") was established in 1996 to assist students, who needed a flexible approach to earning a high school diploma. JMHS offers the curriculum needed for students to complete one to four years of high school, ultimately leading to a high school diploma.

In 2000, the PCDI established Ashworth College to offer associate degree programs; in 2004 it offered master's degree programs; and in 2007, it offered bachelor's degree programs.

In 2004, the PCDI purchased the Distance Education Company ("DEC"), which operated both the New York Institute of Photography and the New York Institute of Art and Design (formerly Sheffield School). In 2017, the DEC opened the New York Institute of Career Development

The PCDI Canada division began in 2005. This division offers Ashworth career diploma programs and the JMHS general diploma program to Canadian students.

In 2007, all schools under PCDI merged under the Ashworth College umbrella.

All Ashworth course and program offerings are accredited by the Distance Education Accrediting Commission ("DEAC"). The DEAC is listed by the U.S. Department of Education as a recognized accrediting agency. The DEAC is also recognized by the Council for Higher Education Accreditation or CHEA. In addition, James Madison High School is accredited by Cognia.

Students can begin their high school education at JMHS and continue to pursue their career and college aspirations through flexible, affordable, and accredited distance education programs all through Ashworth College.

Accreditation and State Licensing

Accreditation

Ashworth College is accredited by the Distance Education Accrediting Commission (DEAC). The DEAC is listed by the U.S. Department of Education as a recognized accrediting agency. The DEAC is recognized by the Council for Higher Education Accreditation (CHEA).

There are different types of accreditation; therefore, students seeking to use their Ashworth experience to transfer to another institution or apply for a job or license should confirm that DEAC accreditation will be accepted. Licensing, certification, training, and other requirements vary by vocation and state. Students should check with their state, local government and/or licensing board to find out which requirements are applicable in their state.

Distance Education Accrediting Commission
1101 17th Street, NW, Suite 808
Washington, DC 20036
202-234-5100
202-332-1386 (Fax)
www.deac.org

State Licensing

Ashworth College is authorized by the State of Georgia Nonpublic Postsecondary Education Commission to offer instruction in career programs, as well as associate and bachelor's degree programs.

State of Georgia Nonpublic Postsecondary Education Commission
2082 East Exchange Place, Suite 220
Tucker, Georgia 30084-5305
770-414-3300

770-414-3309 (Fax)
www.gnpec.georgia.gov

National Council for State Authorization Reciprocity Agreements

Ashworth College is approved by Georgia to participate in the National Council for State Authorization Reciprocity Agreements. NC-SARA is a voluntary, regional approach to state oversight of postsecondary distance education.

Student Tuition Recovery Fund Fee and Disclosure: California Residents Only

The State of California established the Student Tuition Recovery Fund (STRF) to relieve or mitigate economic losses suffered by a student in an educational program at a qualifying institution, who is or was a California resident while enrolled, or was enrolled in a residency program, if the student enrolled in the institution, prepaid tuition, and suffered an economic loss. Unless relieved of the obligation to do so, you must pay the state-imposed assessment for the STRF, or it must be paid on your behalf, if you are a student in an educational program, who is a California resident, or are enrolled in a residency program, and prepay all or part of your tuition.

You are not eligible for protection from the STRF and you are not required to pay the STRF assessment if you are not a California resident, or are not enrolled in a residency program. It is important that you keep copies of your enrollment agreement, financial aid documents, receipts, or any other information that documents the amount paid to the school. Questions regarding the STRF may be directed to the Bureau for Private Postsecondary Education, 1747
N. Market Blvd, Suite 225, Sacramento, CA 95834, (916) 574-8900 or (888) 370-7589.

To be eligible for STRF, you must be a California resident or enrolled in a residency program, prepaid tuition, paid or deemed to have paid the STRF assessment, and suffered an economic loss as a result of any of the following:

1. The institution, a location of the institution, or an educational program offered by the institution was closed or discontinued, and you did not choose to participate in a teach-out plan approved by the Bureau or did not complete a chosen teach-out plan approved by the Bureau.

2. You were enrolled at an institution or a location of the institution within the 120- day period before the closure of the institution or location of the institution or were enrolled in an educational program within the 120-day period before the program was discontinued.

3. You were enrolled at an institution or a location of the institution more than 120 days before the closure of the institution or location of the institution, in an educational program offered by the institution as to which the Bureau determined there was a significant decline in the quality or value of the program more than 120 days before closure.

4. The institution has been ordered to pay a refund by the Bureau but has failed to do so.

5. The institution has failed to pay or reimburse loan proceeds under a federal student loan program as required by law or has failed to pay or reimburse proceeds received by the institution in excess of tuition and other costs.

6. You have been awarded restitution, a refund, or other monetary award by an arbitrator or court, based on a violation of this chapter by an institution or representative of an institution, but have been unable to collect the award from the institution.

7. You sought legal counsel that resulted in the cancellation of one or more of your student loans and have an invoice for services rendered and evidence of the cancellation of the student loan or loans.

To qualify for the STRF reimbursement, the application must be received within four (4) years from the data of the action or even that made the student eligible for recovery from the STRF.

A student whose loan is revived by a loan holder or debt collector after a period of noncollecting may, at any time, file a written application for recovery from the STRF for the debt that would have otherwise been eligible for recovery. If it has been more than four (4) years since the action or event that made the student eligible, the student must have filed a written application for recovery within the original four (4) year period, unless the period has been extended by another act of law.

However, no claim can be paid to any student without a social security number or a taxpayer identification number.

Mission, Values, and Student Learning Outcomes

Mission Statement

Empower students to achieve their aspirations through flexible, convenient, affordable, and highly relevant educational programs.

- Empower: enable students to take control of their lives
- Students: individuals who have taken the proactive step to study and formally engage in learning
- Aspirations: strong desire, longing, or aim
- Flexible: adaptable curriculum that allows students to study anywhere and at their own pace
- Convenient: easily accessible and easy to use
- Affordable: quality courses at a relatively low price that provide great value
- Highly relevant: pertinent content and subject matter that aligns well with real- world skills and knowledge needed in the workplace
- Educational Programs: distance education courses that enable students to learn in their areas of interest

Values

1. **Access** - We believe anyone who wants to learn should have access to affordable, quality education anytime, anyplace.
2. **Accountability** - We set measurable goals and are accountable to students and to each other for our actions, performance, and results.
3. **Integrity** - We operate with the utmost integrity and treat both our fellow colleagues and our students with dignity and respect.
4. **Passion** - We believe we can make a difference in people's lives and want to help each student, faculty, and staff member in our diverse community realize their individual potential.
5. **Teamwork** - We are committed to collaboration and communication among students, faculty, and staff, as both are essential to achieving great outcomes for students and our company.
6. **Excellence** - We strive to uphold high standards in our academic programs, student experience, and support services, and are continually seeking ways to improve each of these areas.

Student Learning Outcomes

By incorporating the following learning and career outcomes into its programs, Ashworth ensures that graduates are prepared to succeed in a variety of professional, civic, and personal settings.

1. **Effective Communication**
   Graduates will demonstrate competence in written communication skills that lead to the clear and purposeful expression of ideas, information, and logical reasoning.

2. **Critical Thinking**
   Graduates will demonstrate critical thinking skills to analyze problems, search for evidence to support conclusions, reflectively process information, and formulate solutions.

3. **Job-Specific and Technical Skills**
   Graduates will demonstrate competence in program specific technical skills and an understanding of the common body of knowledge associated with a specific program.

4. **Professional and Life Skills**

Graduates will demonstrate competent professional and life skills that include responsibility, self-motivation, and will make progress toward becoming engaged and self-reliant learners.

5. **Qualifications for Advancement**
   Graduates will have the skills and credentials to apply for jobs, change careers, advance in their current workplace, or pursue advanced education.

Academic Year, Holidays, Contact Information, Hours of Operation

Academic Year

Students may enroll in Ashworth College's open enrollment programs at any time of the year. There are no set class start dates, and students do not have to wait until the beginning of a new session or new semester. All courses offered are flexible and self-paced, with students setting their own schedules within certain maximum allowable time frames per semester and/or program.

Effective October 31, 2022, Ashworth College stopped accepting new enrollments from veterans or their dependents who wish to use their GI Bill® or VR&E benefits as payment for their educational program(s). This change also impacts students who planned to re-enter after a withdrawal from school or those who are considering changing their program of study.

Holidays

Ashworth is closed on the following holidays:

- New Year's Day
- Memorial Day
- Juneteenth
- Independence Day
- Labor Day
- Thanksgiving Day
- Day after Thanksgiving
- Christmas Eve
- Christmas Day

Contact Information

The following information may be used to contact Ashworth College. Students should provide their name and student number on all communications with Ashworth staff.

Academic Freedom

Ashworth College adheres to the following principles of academic freedom. As a higher education institution, Ashworth College holds the pursuit of education in highest regard and strives to provide an environment that promotes the pursuit of truth and mutual respect to support the generation of new knowledge and reasoned argument based on scholarly justification.

Students and faculty are expected to adhere to academic honesty, the highest ethical standards, and professional conduct in all processes and practices. It is reasonable that the teaching and learning environments will be open to diverse opinions and voices and that the same course content can be presented in multiple ways in order to achieve the same outcome goals. Teaching and learning styles may differ and it is not unexpected that differences in styles, opinions, and approaches may occur. Academic freedom and student conduct policies are appropriately balanced to produce a harmonious learning environment.

Toward these ends and in respect for diversity, the following guidelines should be followed.

- Ashworth College recognizes that each faculty and instructional team member will express their opinions and philosophies freely without censorship.

- Concurrently, it is important that faculty and instructional team members realize their responsibility to the college to make their students understand that their expression does not represent the opinions of Ashworth College.

- The thorough discussion of topics from diverse perspectives within the faculty and instructional team members' subject areas is encouraged. However, the discussion of controversial subject matter outside of each faculty and instructional team member's area of expertise is strongly discouraged within courses.

- Noting that debate is at the heart of academic freedom, faculty and instructional team members have a particular obligation to promote conditions of free inquiry and to further public understanding of academic freedom.

- Ashworth College expects its faculty and instructional team members to maintain high standards of professional conduct in all communications with students at all times.

Admissions Policy

Credit-Bearing Programs

Applicants to undergraduate certificate, associate degree, and bachelor's degree programs must have completed a high school diploma program, earned a GED or equivalent, or completed at least 12 semester credit hours of college coursework. Homeschooled applicants must provide documentation confirming that their homeschool program is recognized by their school district, county, or state. Ashworth College does not require SAT or ACT scores.

Undergraduate

Undergraduate Certificate Programs

Undergraduate certificate candidates enroll in and pay for one semester at a time under a separate enrollment agreement. Applicants to these programs must also have completed a high school diploma program or earned a GED or equivalent. Applicants may self-certify their high school completion by providing the full name of their high school and the city, state, and year of graduation.

Associate Degree

Associate degree candidates enroll in and pay for one semester at a time under a separate enrollment agreement. Applicants must provide official documentation of secondary school completion and may not self-certify.

Bachelor Degree

Bachelor degree candidates enroll in and pay for one semester at a time under a separate enrollment agreement. Applicants must provide official documentation of secondary school completion and may not self-certify.

Required Documentation

Students may begin course work as soon as they receive their course materials. To maintain student status, students must submit one of the following to Ashworth College to maintain their student status:

- An official high school transcript
- A copy of the high school diploma
- An official homeschool transcript and a copy of the approval document or letter from the local school board, county, or state official
- An official college transcript showing at least 12 semester credit hours of college coursework with a minimum grade of “C” or higher for each course
- An official transcript showing proof of passing the GED, HiSET, or TASC Exam

International Students

Applicants to undergraduate certificate, associate degree, and bachelor's degree programs who attended a secondary or postsecondary institution outside the United States must submit official transcripts that have been translated into English and evaluated by a qualified third party. Ashworth College accepts evaluations from any agency holding membership in the National Association of Credential Evaluation Services (NACES). Ashworth College also accepts an official translated transcript with an equivalency evaluation issued by the college or university that granted the credential, or by the Ministry of Education or embassy of the country where the credential was issued.

Applicants whose native language is not English must demonstrate English language proficiency. Ashworth College accepts any of the following:

- 500 on the paper-delivered Test of English as a Foreign Language (TOEFL PBT) or 61 on the Internet-Based Test (iBT)
- 6.0 on the International English Language Testing System (IELTS)
- 44 on the Pearson Test of English Academic Score Report
- 95 on the Duolingo English Test
- 53 on the four-skill Michigan English Test (MET)
- 650/LP on the Michigan Examination for the Certificate of Proficiency in English (ECPE)

Applicants who earned a degree or diploma from an accredited institution where English was the primary language of instruction meet the English language proficiency requirement by submitting official transcripts

Career Diploma and Career Certificate Programs

Applicants to career diploma and career certificate programs must be at least 16 years old and have completed eighth grade.

Child Development Associate Career Certificate

Applicants to this program must also have completed a high school diploma program or earned a GED or equivalent. Applicants may self-certify their high school completion by providing the full name of their high school and the city, state, and year of graduation. Ashworth College populates this information in the enrollment agreement, and applicants verify that it is true and accurate.

Student Identify Verification Policy

Student numbers are issued to specific people for the purpose of conducting Ashworth College business. Any abuse of these numbers (including obtaining for malicious use or attempting to obtain for malicious use, and false identification or attempted false identification) shall be cause for permanent dismissal from Ashworth College.

Learner Center Access

Students are required to create a password to access the Learner Center. The Learner Center is where a student can view their academic and personal records and should only be accessed by the student. Students should protect their password from others and not share it with anyone else (i.e., Academic Honesty Policy). School employees do not know student passwords and can only reset them upon their request. If a student's password is reset, the student will be instructed to create a new one before being allowed to access their account.

eBooks

Ashworth College may use Vital Source to deliver eBooks in its courses. Students will be required to create a separate password for their eBook account the first time they access their eBook account. School employees do not know student passwords and cannot reset them. If a student forgets their password or needs it reset, they will need to contact Vital Source directly.

E-mail

Ashworth College will use the e-mail listed on a student's account to send academic and school updates. These communications can be personal in nature and for this reason it is recommended that students use an e-mail that is not shared with others.

Proctored Examinations

Degree and Undergraduate Certificate Programs

Ashworth College requires students enrolled in undergraduate certificate, Associate Degree, and Bachelor's Degree programs to verify their identity at the end of each semester, including the final semester before Ashworth College deems them eligible for graduation. Ashworth College verifies identity at the point of the semester examination, which students complete in Brightspace, its learning management system. Students complete the verification through Integrity Advocate, Ashworth College's remote proctoring partner by capturing an image of a valid photo ID and a photograph of themselves, and Integrity Advocate compares the two images to confirm they match. Only after Ashworth College confirms identity through both steps do students proceed to the semester examination.

For additional information about the proctoring process, device requirements, and what to expect during an assessment, visit Integrity Advocate: What to Expect.

Student Account Security

If Ashworth College suspects that a student's account has been compromised, access to the student account may be blocked until the student's identity has been verified. This process is done only to protect the student's interest. Students are responsible for all comments, exams, and assignments posted on their account. If a student believes that their account was compromised by someone else, they must change their password immediately and notify the school.

Transfer Credits

Maximum Allowable Transfer Credits Undergraduate
Students may receive transfer credit for up to 75 percent of their associate or bachelor's degree or undergraduate certificate program as a combination of transfer credits from other programs/institutions and prior learning assessment.

In the associate degree program, students may receive credit for 15 courses out of 20 (45 credit hours out of 60) as a combination of transfer credits and prior learning assessment.

In the bachelor's degree program, students may receive credit for 30 courses out of 40 (90 credit hours out of 120) as a combination of transfer credits and prior learning assessment.

In the undergraduate certificate programs, students may receive credit for 3 courses out of 5 (9 credit hours out of 15) as a combination of transfer credits and prior learning assessment.

Ashworth College does not have a recency requirement for general education or elective credits to be eligible for transfer. Courses that are not general education or electives and are more than 10 years old may require further review before transfer credit is awarded. This may involve requiring more information from the institution at which the course was taken, such as a course description or syllabus, to ensure that the material covered in the subject is still current. Content equivalency is required of any course that the student wishes to transfer. All credits must be from an accredited institution or evaluated by the American Council on Education (ACE), Joint Services Transcript (JST), The College Board (CLEP or AP), and the student must have earned a grade of C or higher.

Applying for Transfer Credits
Students may request to have previously earned, college-level transfer credits applied toward their Ashworth College degree or undergraduate certificate program by submitting all official transcripts from other colleges. An official college transcript is one that comes directly from the former college(s) to the Registrar's office at Ashworth College. Students who do not submit official transcripts will not be granted transfer credits. The Ashworth College Transcript Center of Excellence will evaluate transfer credit eligibility and determine a degree plan to ensure that the student takes the minimum number of courses required to graduate.

Students must complete the following steps to apply for transfer credit. After receiving a student number, send the College Transcript Request Form, located in the student portal Learner Center, to all college(s) previously attended, along with any associated fees. Students must include their maiden name and/or any other previously used names on the form if their name has changed since attending college. The College Transcript Request Form should not be sent to Ashworth College; we are not responsible for obtaining official transcripts. It is the student's responsibility to verify that transcripts have been sent to Ashworth. Upon receiving the transcripts, the Transcript Center of Excellence will transfer all applicable credits that are shown on the transcript.

This will prevent students from taking any courses that may potentially be transferred into Ashworth College. Students must notify Ashworth College if they expect to be awarded transfer credit for a course in their first semester by contacting Student Services by submitting a support ticket via the Student Portal. If students fail to notify Ashworth of their plans to apply for transfer credit, and are enrolled in

courses that are later accepted for transfer credit, they will be charged a $50 fee for each course that they were erroneously enrolled in.

Credits being transferred must be equivalent to course offerings at Ashworth College. Students may be required to send copies of the course syllabi, college catalogs, or other information to help in the evaluation process. Students should send these items to Ashworth College only if the Transcript Center of Excellence specifically requests them. Students may view the transfer credit that was accepted by Ashworth College by logging into the Student Portal and clicking on the Transcripts box, then expanding the information for each transcript that was evaluated.

Students who wish to appeal their transfer credit may do so by contacting Ashworth within 30 days of the evaluation. By submitting a case via their Learner Center.

Other Important Transfer Information

- Unless evaluated by ACE or Joint Services Transcript (JST), no credits will be awarded for on-the-job training, including specialized training and certificates received.
- Students may submit official transcripts from The College Board for exam scores from College-Level Examination Program (CLEP) or A P E x a m s for transfer credit.
- Some subjects are required as a two-part course series at Ashworth College. Transfer credit will be awarded only if both parts of "paired courses" have been satisfied at the prior school. Partial credit will not be awarded for only one course in a two-part course series.

Academic Information

Instructional Model

Ashworth College aims to provide students with engaging, comprehensive, and high-quality curriculum in a flexible and convenient online learning environment. The school strives to meet the educational goals of its students while giving them the opportunity to set the pace of their learning on a schedule that is compatible with their lifestyles and personal and professional commitments.

Ashworth College's enrollment model is an open enrollment track wherein students can enroll in programs and courses at any time without having to wait for a semester or class start date. The learning model is self-paced within certain maximum time limits per semester and/or program. Ashworth's instructional model is comprised of an instructional team approach. The instructional team includes qualified and experienced faculty, subject matter experts, course designers, and support staff. Ashworth's team is available to work with students as needs arise. The team approach allows Ashworth to customize support to individual student needs. The Learner Center provides information on contacting your faculty and the Learner Success support team. Ashworth reserves the right to modify the instructional model at their discretion for continual improvement and to better meet student learning outcomes. From time to time, pilot studies may be conducted, e.g., enhanced practices and new technologies.

Open Enrollment Model

Students may enroll in Ashworth College's open enrollment programs at any time of the year. There are no set class start dates, and students do not have to wait until the beginning of a new session or new semester. All courses offered are flexible and self-paced, with students setting their own schedules within certain maximum allowable time frames per semester and/or program.

Course Load

Degree Programs

Students generally take one (1) course at a time, in a specified sequence within each degree program or certificate. Except in cases where transfer credits are being applied, course orders within a program or semester should be followed to ensure proper learning progression and sequencing through cumulative learning.

Students must complete the following mandatory first course within each associate or bachelor's degree program, OR110 Achieving Academic Excellence. No transfer credit will be accepted for this course. Students who do not earn a passing score in this course will be academically dismissed from their program of study.

Career Certificate

To earn an Ashworth College career certificate, a student must complete all lessons in the program with a minimum overall grade of 70. The number of lessons in career certificate programs varies depending on the program.

Career Diploma

To earn an Ashworth College career diploma, a student must complete all lessons in the program with a minimum overall grade of 70. The number of lessons in career diploma programs varies depending on the program.

Undergraduate Programs

Undergraduate Certificate

To earn an Ashworth College undergraduate certificate, a student must complete and pass 15 credit hours (5 courses of 3 credit hours each). This is a one-semester program of 5 courses; each course in a semester is worth 3 credits. The program includes 1 to 3 required courses. Students are able to choose the remaining courses as electives. There is a proctored final exam at the end of this one-semester program.

Associate Degree

To earn an Ashworth College associate degree, a student must complete and pass 60 credit hours (20 courses of 3 credit hours each). The associate degree program is comprised of 4 semesters, and each semester has 5 courses. Each course in a semester is worth 3 credits; there are a total of 20 courses in each program. There is a proctored final exam at the end of each semester.

Bachelor's Degree

To earn an Ashworth College bachelor's degree, a student must complete and pass 120 credit hours (40 courses of 3 credit hours each). The bachelor's degree program is divided into 8 semesters, and each semester has 5 courses. Each course in a semester is worth 3 credits; there are a total of 40 courses in each program. There is a proctored final exam at the end of each semester.

Enrollment Status

The school provides students with many mechanisms to help students stay on track for timely completion of program and graduation requirements. In the Learner Center students can view their number of completed courses and outstanding courses to view their progression through their program.

There are three status states for students depending on their progression through the enrollment and graduation processes. "Enrolled" status is someone who has submitted an enrollment agreement and is financially current with Ashworth College; applicants may be denied admission after review of their admissions documentation and first course progress. " "Active" status is someone who, in addition to being enrolled, is regularly submitting assessments in academic courses. "Academic Complete" status is someone who has completed all academic requirements of their program but still has outstanding financial requirements needing to be met. To be considered graduated, students must be both academically and financially complete.

Students can request a "status letter" to verify their enrollment status by contacting the Learner Success Advocate Team or also download a copy directly from their Learner Center Portal. . Students can view their program of study, progress report and grades in the Learner Center.

Transcripts and Grade Reports

Copies of your official Ashworth College transcript are available in your Learner Center Access the Parchment Ordering Service via your Learner Center, where you can order digital and/or paper copies of your transcript. Transcripts may be sent directly to you or to someone else (e.g. an employer or another school). You will need to have available the email or physical address where the transcript will be sent to complete the order. It is a $15.00 fee for all transcript orders.

Changing Program of Study

A student may switch from one Ashworth College degree program into another at any time. Each degree program has different course requirements. Students will have to pay for any additional courses necessary to complete the required credit hours needed for graduation in the new program. Students can contact the Learner Success Advocate Team for more information.

Account Access
Ashworth College students access their student account information, online courses, program schedule, transcripts, and grades in the Learner Center. All online courses reside on a custom version of the Learning Management System. Ashworth's online courses are designed to be engaging, user-friendly, and easy to navigate. Students can perform the following tasks online via the Learner Center and learning management system.

1. Set up student accounts; view and edit account information
2. View account balances and make tuition payments
3. Access online courses and course materials for current and completed courses
4. Submit assignments, multiple-choice exams, and proctored semester exams
5. View assignment and exam grades
6. Access the Ashworth online library and Learning Resource Center
7. View program/transcript upon evaluation
8. Download school forms and college catalog

Communication with Students
Students are required to set up and maintain their profile information within the Ashworth College Learner Center (http://learn.ashworthcollege.edu. It is the responsibility of the student to ensure that the information within the student profile is accurate and current. All e-mail correspondence from Ashworth College will be sent to the e-mail address listed on the student profile. Also, where applicable, materials will be shipped to the address on the student profile. Ashworth is not responsible for shipments or correspondence sent to the incorrect shipping address or e-mail address.

Textbooks and Shipments
Each course consists of online or printed course materials, usually accompanied by a textbook or eBook from a national publisher. For courses that include eBooks, an eBook can be accessed immediately upon entry into the course. For courses that include textbooks, a textbook will be automatically shipped to the student when approximately two-thirds of the current/prior course has been completed, as long as payments are current. Students should note that there are no textbook shipments for the first two courses in most degree programs.

Shipment Errors
Students who receive an incorrect or incomplete shipment should call the Learner Success Advocate Team for assistance.

Academic Status
There are four categories of academic standing: academic good standing, academic review, academic probation, and academic dismissal. To remain in academic good standing, a student must do the following.

- Complete the first mandatory course in the associate or bachelor's program with a passing score (OR110 Achieving Academic Excellence)

- Earn a grade of at least 60 percent in each course to avoid being subject to
- academic review

A student will be placed on academic review when it is questionable whether the student will be successful in the program. Being placed on Academic review can delay subsequent course shipments by up to 30 days.

Students are placed on academic review if they do any of the following.

- Fail a lesson in the first course of their associate or bachelor's degree program (OR110 Achieving Academic Excellence)
- Fail any exam(s) or assignment(s) in the undergraduate programs
- Disregard Ashworth's academic honesty and/or student conduct policy

Students may be on under academic probation if they do any of the following:

- Fail a course
- Violate Ashworth's academic honesty and/or student conduct policy

Academic dismissal will result if students do any of the following.

- Fail the first course in the associate or bachelor's degree program (OR110 Achieving Academic Excellence)
- It is determined that the overall academic performance is unacceptable
- Violate Ashworth's academic honesty and/or student conduct policy

Students who are academically dismissed will not be allowed to enroll in any other degree or undergraduate certificate programs at Ashworth College in the future. A student who is dismissed for academic reasons will be required to pay the full contract tuition amount incurred. A student may appeal dismissal for academic or any other reasons by submitting an appeal to the Academic Review Board, within 10 days of being notified by Ashworth College of the dismissal. Decisions rendered are final and the student will be notified within 30 days of receipt of the appeal.

Students are provided online access to their first course immediately upon enrollment, Students can begin their courses immediately upon enrollment but are free to set their own pace of study as long as they meet the maximum completion times for each semester or program.

Each course is composed of lessons. Each lesson typically contains lecture notes, assignments, and/or multiple-choice exams. Multiple-choice exams are auto-graded immediately upon submission and students can view their grades immediately. Writing assignments are graded within 7-10 business days from date of student's submission and students can view their grades along with faculty feedback and comments.

Students can track their shipments, access their online courses, submit assignments, take exams, and view grades via the Ashworth Learner Center.

Students generally take one (1) course at a time, in a specified sequence within each degree program or undergraduate certificate. Except in cases where transfer credits are being applied, course orders within a program or semester should be followed to ensure proper learning progression and sequencing through cumulative learning.

Students are strongly advised to write and save their work in a Word document prior to submitting them in the online classroom. By following this process, students will be able to spell check their work and have access to their work should the learning management system timeout on a student. Saving one's work on a Microsoft Word document will prevent students from losing any work, should the system timeout for any reason. Once students have saved their work in a Word document, they should highlight their assignment, copy (hold down "Ctrl" and "C") and paste their submission (hold down "Ctrl" and "V") into the appropriate location in the online classroom or submit the document as an attachment. Ashworth is not responsible for any lost work, time or efforts that may result from system timeout issues that occur in Brightspace.

End-of-Course Survey
Students are to complete End-of-Course Surveys for each course that they have completed. The End-of-Course Survey includes questions on student engagement, student readiness, teacher and academic advisors support, technology, curriculum, resources, and other support. Student feedback through the End-of-Course Survey is an opportunity for students to have a voice in their program of study and is an essential part of our process of continual improvement.

Completion Time

Ashworth degree programs are self-paced, and students are encouraged to set their own schedules for completing coursework. However, setting and maintaining a regular study schedule will enable students to complete their coursework within the prescribed time limits detailed below. Students who do not complete their programs of study within the prescribed time limits should contact Student Services to seek an extension. The Learner Center has a Progress Tracker where students can monitor their progression through their program on a regular basis. Students may request 6-month extensions at $125.00 each (This amount is subject to change).

Upon meeting graduation requirements, students will be awarded either a certificate or diploma based on their program of study. No assurance is made of eligibility for college admission or job placement. Acceptance for transfer of academic credits is determined by the receiving institution.

Undergraduate Certificate
An undergraduate certificate program can be completed in approximately six months; however, students are allowed a maximum of one (1) year from the date of enrollment to complete their program.

Associate Degree
An associate degree program can be completed in approximately two years (no more than 12 months for one semester); however, students are allowed a maximum of six (6) years from the date of enrollment to complete their program.

Bachelor's Degree
A bachelor's program can be completed in approximately four years (no more than 12 months for one semester); however, students are allowed a maximum of eight (8) years from the date of enrollment to complete their program.

Career Diploma
The Career Diploma program can be completed in approximately four (4) months; students are allowed a maximum of twelve (12) months from date of enrollment to complete their program. Upon meeting

graduation requirements, students will be awarded their diploma. No assurance is made as to job placement.

Career Certificate
The Career Certificate program can be completed in approximately three (3) months; students are allowed a maximum of eight (8) months from date of enrollment to complete their program. Upon meeting graduation requirements, you will be awarded your diploma. No assurance is made as to job placement.

Academic Policies

Academic Honesty Policy

Academic integrity is the hallmark of excellence and the foundation of higher education which requires honesty in scholarship, research, and all course work. Students are expected at all times to submit their own work for all assignments, to present their own work and ideas in all discussions, and to properly cite original authors and others when referring to sources used. Students must succeed in their classes and programs without violating the Academic Honesty Policy.

To preserve the integrity of Ashworth College's programs and maintain the high quality of education, the Faculty and Administration must address any charge of a violation of the academic honesty policy. At each penalty level the case is reviewed by the Academic Review Board. The due process procedures include a formal request for inquiry and research to prove or disprove the charge. A proven violation carries academic penalties. Students who violate the Academic Honesty Policy will receive a warning on a first offense, will be placed on probation for a second offense, and will be dismissed from the institution on a third offense. Students may appeal the dismissal but may not appeal the warning or the probation. If an egregious violation occurs students may be immediately academically dismissed from their program. The Academic Review Board reserves the right to issue any penalty subject to the severity of the violation.

Academic Honesty Violations

The following violation types deserve close attention because they summarize various violations of academic honesty. This list below is not exhaustive but captures the predominant violations which occur. Students must strive to honor the regulations to preserve the integrity of their grades and degrees.

Plagiarism and Cheating

Plagiarism and cheating are acts of stealing and are types of fraud.

Plagiarism is an act of taking someone else's words or ideas and using them or representing them as one's own work. This includes not properly citing the source of the words or ideas. When students use direct quotations, they must use quotation marks and cite the relevant sources. When students paraphrase material, quotation marks are not used, but the sources still must be cited. Students must also cite sources for any use of language, ideas, theories, data, figures, graphs, programs, electronic information, or illustrations.

Cheating is an act of breaking rules of honest and original work. Cheating includes purchasing essays, copying another person's assignment, posting assignments online asking for solutions, or paying someone to do one's work. It also includes sharing one's own work, with another person or organization

by allowing them to copy all or part of one's paper. Students are not permitted to share one's student username and/or password with others or an organization. Students are not permitted to receive, knowingly give, or attempt to give any unauthorized assistance in the preparation of any work required to be submitted for credit as
part of a course.

Plagiarism Policy

Plagiarism refers to deliberately using someone else's work or ideas and presenting them as one's own without proper attribution or citation. This may be intentional or accidental. If a student is found to have plagiarized a written assignment, the following guidelines apply:

1. Instructors and graders use Grammarly to assess for plagiarism.
2. Grading follows the assignment rubric and awards or deducts points accordingly. Deductions for APA formatting should not exceed the percentage specified by the formatting section of the rubric if one exists.
3. As subject matter experts, it is imperative that instructors and graders focus on grading the totality of the written assignment. While using Grammarly is required, it does not replace the instructor's or grader's knowledge and discernment skills. The goal is to increase a student's understanding and comprehension of the materials and not to merely highlight instances of plagiarism in written assignments.
4. If plagiarism is less than 20%, the paper should be graded based on the rubric, and the student provided with feedback to make improvements. However, if plagiarism results from the "copy and paste" type process, where an entire section is copied, the guidelines in section five below should be used.
5. If plagiarism of 20% or above is found, the paper should be graded with a 1% along with an academic warning. It should also include information on resources in each school's Learning Resource Center (LRC), such as Penn Foster Writer's Block or Ashworth Writing Lab.
6. Different programs may have individual guidelines regarding the allowable level of plagiarism and allowable attempts. Check with your program for specifics.

Ashworth College has the right, at its discretion, to review any exams/assignments that have already been graded and to change the grade if plagiarism is found.

The result of the investigation may lead to the following disciplinary action that can include but is not limited to:

Warning

- Documented counseling by staff
- Attend training workshop, write a paper on academic integrity
- Revision and resubmission of work with possible grade penalty
- Submission of alternative assignment

Probation

- Documented counseling by staff
- Attend training workshop, write a paper on academic integrity
- Revision and resubmission of work with possible grade penalty
- Submission of alternative assignment

- Fail the assignment
- Dismissed from course, suspended from the institution

Academic Dismissal

- Academic dismissal from Ashworth College

Policy on the Use of Artificial Intelligence in Assignments Purpose

This policy outlines expectations for the responsible and ethical use of Artificial Intelligence (AI) tools, such as ChatGPT, in academic coursework. It supports academic integrity while recognizing that AI can serve as a valuable learning aid when used appropriately.

Policy Statement

Students may use AI tools in the completion of coursework unless otherwise specified by the assignment or instructor. However, all use of AI must be clearly cited in the submitted work. This means acknowledging any content, ideas, or assistance provided by AI tools in a manner consistent with academic citation practices. Failure to disclose and cite the use of AI-generated content—whether in part or whole—may be considered a violation of the institution's academic integrity policy.

Assignments are intended to evaluate each student's individual understanding, critical thinking, and communication skills. Overreliance on AI tools can undermine learning outcomes and diminish the educational value of the assignment. Thoughtful and ethical use of AI is supported in this policy.

Guidelines for Acceptable Use

Acceptable uses of AI tools include, but are not limited to:

- Generating ideas or brainstorming
- Structuring responses or developing outlines
- Clarifying complex topics
- Summarizing or paraphrasing material
- Practicing citation formats

If AI is used to complete any substantive portion of an assignment, such as drafting, rewording, or summarizing content, the use must be clearly cited. Refer to the Artificial Intelligence Learning Resource Center for citation examples and guidance.

Caution on AI Accuracy

AI tools may provide inaccurate, outdated, or misleading information ("hallucinations"). They must not be used as the sole or primary source for academic work. Students are responsible for verifying the accuracy of all information submitted.

Need Help? Visit the Artificial Intelligence Learning Resource Center

Students are encouraged to use AI as a supportive tool, not a substitute for their own learning. For examples of acceptable AI use and proper citation formats, please visit the Artificial Intelligence Learning Resource Center.

Unauthorized Access to Official Ashworth College Materials

Students may not take, attempt to take, or in any unauthorized manner gain access to, alter, or destroy any materials pertaining to the administration of the educational process (including exams, grade

records, answer keys, etc.). Unauthorized access includes sharing one's student username and/or password with another person or organization who is not authorized or enrolled as a student and is grounds for dismissal from the program.

Misrepresentation, Falsification of Ashworth College Records or Academic Work Students will not knowingly provide false information when completing Ashworth College forms or applications (including admissions forms, enrollment agreements, use of false or counterfeit transcripts, etc.) or in any work submitted for credit as part of a course.

Malicious/Intentional Misuse of Computer Facilities and/or Services
Students are strictly prohibited from the malicious or intentional misuse of computer facilities and/or services. Violations of state and federal laws (including copyright violations, unauthorized access of systems, alteration/damage/destruction or attempted alteration/damage/destruction, use for profit, etc.) or Ashworth College's rules regarding computer usage (including account violations, damage or destruction of the system and/or its performance, unauthorized copying of electronic information, use of threatening or obscene language, etc.) will result in immediate disciplinary action including and up to academic dismissal.

Student Identification Numbers
Student numbers are issued to specific people for the purpose of conducting Ashworth College business. Any abuse of these numbers shall be cause for permanent dismissal from the Ashworth College. Abuse includes but is not limited to obtaining student numbers, usernames, and/or passwords for malicious use or attempting to obtain for malicious use, false identification or attempted false identification, sharing student number with any other person or organization.

Academic Honesty Appeal Process
Students have the opportunity to appeal Academic Dismissal decisions through the Academic Honesty Appeal process. Requests for appeal must be sent to the Academic Review Board within 10 days of receiving the academic dismissal. An appeal form will be sent to the student when they are advised of dismissal. Student's account must be current prior to any appeal review.

Submitting an appeal does not guarantee re-instatement. If the decision on the appeal is to deny reinstatement, then that decision is final, and no further appeal is allowed. If it is decided that student will be reinstated, then student will remain on Academic Probation until the necessary improvements are made in student's academic performance. Failing to meet the Ashworth College standard may result in a second academic dismissal from the program. After a second dismissal as a result of academic performance, a student will forfeit their right to an appeal and will remain dismissed permanently.

Academic Review Board (ARB) Process
The Academic Review Board (ARB) is tasked with reviewing student academic records and conduct to determine appropriate action in cases where the student has displayed poor academic performance and/or when a student has violated policies regarding Academic Integrity or Student Code of Conduct policies. The ARB has the full range of disciplinary decision authority up to and including cancellation/dismissal.

This is a standing committee, meeting as needed.

1. The ARB Request is submitted by a faculty member and forwarded to the ARB Chair. Other appropriate documentation/verification of intervention measures, etc., should also be attached for review.
2. Each member reviews the student's record and indicates his/her decision recommending cancellation or retention.
3. A majority of the board members must agree to dismiss the student.
4. If the ARB opts for dismissal, the ARB Chair will email an ARB dismissal letter, with appeal options included, to the student.
5. A warning letter will be emailed to the student in certain situations.
6. Decisions regarding financial liability are made by the Program Director, the Regulatory member, and Student Services Escalation Specialist. Financial resolution is generally a flat cancel; these decisions are made on a case-by-case basis.
7. The student has a period of 10 days from dismissal in which they can appeal the decision.
8. The student can appeal the ARB's final decision on the student appeal through the grievance process outlined in the appropriate student handbook.

Degree Programs Grading Policy

Grading System and Scale

Ashworth College degree courses are graded using a grade-weighted average of the exams and assignments completed in the course.

The undergraduate grading scale is:
A = 4.00 (Excellent)
B = 3.00 (Good)
C = 2.00 (Satisfactory)
D = 1.00 (Poor)
F = 0.00 (Failing)

Incomplete, Withdrawals, and Grade Appeals

For degree programs, **I = Incomplete** is used only while the course is in progress; when the course is completed, the I grade is replaced by the earned grade or becomes an F.

W = Withdrawn is used only if a student withdraws during the drop/add period or is called up to military service. Final course grades are posted two weeks after the end of the term, and any remaining I grades are replaced at that time unless a course extension has been approved.

Grade Challenge Policy

If a student believes a final course grade was the result of capricious or unprofessional grading, the student must first discuss the concern with the faculty member within 7 days of the final grade being posted. If the issue is not resolved, the student may obtain a Grade Challenge Form in the Student Portal and submit it within 30 days of the final grade posting date. Supporting documentation is reviewed, and submitted materials become part of the permanent record.

Rapid Progression Policy

Ashworth monitors student progress through a Weekly Rapid Progression Report. We recommend completing no more than 15 exams in a 7-day period (a calendar week runs Sunday through Saturday). Completing 25 or more will result in appearing on the Weekly Rapid Progression Report. If a student appears on the report three consecutive times, their coursework will be reviewed by the Academic Director of their Program. The outcome of the review may result in intervention by the Director of Academic Policy, with possible referral to the Academic Review Board (ARB).
**This policy does not supersede any program completion requirements*.

Graduation Requirements for Undergraduate Programs

Undergraduate Certificate

To earn an Ashworth College undergraduate certificate, a student must complete 15 credit hours with a minimum GPA of 1.00. This is a one-semester program of 5 courses; each course is worth 3 credits. The program includes 1 to 3 required courses. Students can choose the remaining courses as electives. There is a proctored exam at the end of this one- semester program to verify the student's identity. In addition, students must fulfill all financial obligations with Ashworth by paying the tuition balance in full.

Associate Degree

To earn an Ashworth College associate degree, a student must complete 60 credit hours with a minimum GPA of 1.00. The associate degree program comprises 4 semesters, with 5 courses per

semester. Each course in a semester is worth 3 credits; there are 20 courses in each program. There is a proctored exam at the end of each semester to verify the student's identity. In addition, students must fulfill all financial obligations with Ashworth by paying the tuition balance in full.

Bachelor Degree

To earn an Ashworth College bachelor's degree, a student must complete 120 credit hours with a minimum GPA of 1.00. The bachelor's degree program is divided into 8 semesters, with 5 courses per semester. Each course in a semester is worth 3 credits; there are 40 courses in each program. There is a proctored exam at the end of each semester to verify the student's identity. In addition, students must fulfill all financial obligations with Ashworth by paying the tuition balance in full.

Graduation with Honors

Ashworth College awards degrees with honors to candidates who meet specified standards of academic excellence. Graduation with Honors is awarded to eligible undergraduate degree-seeking students. The honor is awarded upon graduation from a degree program.

Graduates will be recommended for graduation with honors based on their overall grade point average for all college-level work attempted at Ashworth College. Respective standards are as follows.

Undergraduate Degree Designations

Honors Designation	Required Overall GPA	
Summa Cum Laude	3.90	4.00
Magna Cum Laude	3.75	3.89
Cum Laude	3.50	3.74

Academic Dismissal

Academic dismissal refers to the disenrollment of a student from a course or program of study by Ashworth College. Reasons for academic dismissal include, but are not limited to, the following.

- Failure to provide acceptable proof of high school graduation or equivalent within 90 days of enrollment.
- Failing the first mandatory course in the program of study (OR110, Orientation)
- Poor or unacceptable performance and grades in courses
- GPA falling below acceptable thresholds
- Acts of plagiarism and academic dishonesty
- Posting homework and/or answers to homework online or requesting answers to assignments
- Sharing student usernames and/or passwords with other persons or organizations
- Unprofessional communications with Ashworth faculty, staff, and other students

Students who have been academically dismissed from Ashworth College are not eligible for reinstatement or readmission unless they submit an appeal to the Academic Review Board Chair, which is accepted by the Program Director.

Administrative Cancellation

Administrative cancellation refers to the cancellation of a student's enrollment in a program of study at the student's request. Students whose accounts have been canceled (but have not been academically dismissed) are eligible for reinstatement or readmission.

Students who are administratively canceled from the identified course(s) will receive the grade of AC on their academic record. The AC grade has no effect on the student's academic GPA. The student will be notified of the Administrative Course Cancellation to their primary e-mail from Student Services.

Students who choose to cancel their enrollment may be entitled to a refund or may owe the school additional tuition. The tuition amount due is based on the enrollment period, number of lessons completed, and the amount paid. The tuition balance or refund that is due will be determined by the Tuition Protection Agreement printed on the back of Ashworth's Enrollment Agreement.

Academic Standing and Related Policies

Ashworth College uses Satisfactory Academic Progress (SAP) standards to monitor academic standing. For undergraduate programs, students must maintain a CGPA of 1.0. If a student's GPA falls below 1.0, the student is placed on academic probation. If the student remains on probation after the subsequent term, the Academic Review Board reviews the student to determine continued enrollment.

Career Programs Grading Policy

Grading System and Scale

Ashworth College career courses are also graded by a **grade-weighted average** of exams and assignments.

The career grading scale is:
A = 90–100 (Excellent)
B = 80–89 (Good)
C = 70–79 (Satisfactory)
F = below 70 (Failing)

Exam/Assignment Retake Policy

Students are allowed to retake an exam but are not required to if their final course average is above 70.

Rapid Progression Policy

Ashworth monitors student progress through a Weekly Rapid Progression Report. We recommend completing no more than 15 exams in a 7-day period (a calendar week runs Sunday through Saturday). Completing 25 or more will result in appearing on the Weekly Rapid Progression Report. If a student appears on the report three consecutive times, their coursework will be reviewed by the Academic Director of their Program. The outcome of the review may result in intervention by the Director of Academic Policy, with possible referral to the Academic Review Board (ARB).
**This policy does not supersede any program completion requirements*.

Graduation Requirements

To earn a Career diploma or certificate from Ashworth, students must meet the following requirements:

- Complete all lessons with a passing score
- Meet all financial obligations with Ashworth by paying the tuition balance in full

Graduation with Honors

Students who graduate with 3.50 or higher will be eligible for Ashworth's Honor Society and will receive special recognition on their diploma.

Academic Dismissal

Academic dismissal refers to the disenrollment of a student from a course or program of study by Ashworth College. Reasons for academic dismissal include, but are not limited to, the following.

- Poor or unacceptable performance and grades in courses
- Students who fail two or more lessons in the first lesson group
- Acts of plagiarism and academic dishonesty
- Unprofessional communications with Ashworth instructors, staff, and other students

Students who have been academically dismissed from Ashworth College are not eligible for reinstatement or readmission unless they submit an appeal to the Academic Review Board and the Program Director accepts it.

Administrative Cancellation

Administrative cancellation refers to the cancellation of a student's enrollment from a course and program of study per the student's request. Students whose accounts have been canceled (but have not been academically dismissed) are eligible for reinstatement or readmission.

Students who are administratively canceled from the identified course(s) will receive the grade of AC on their academic record. The AC grade has no effect on the student's academic GPA. The student will be notified of the Administrative Course Cancellation through their primary e-mail from Student Services.

Students who choose to cancel their enrollment may be entitled to a refund or may owe the school additional tuition. The tuition amount due is based on the enrollment period, number of lessons completed, and the amount paid. The tuition balance or refund that is due will be determined by the Tuition Protection Agreement printed on Ashworth's Enrollment Agreement.

Career students may resubmit exams and assignments twice if they are not satisfied with their score, and failed exams or assignments do not have to be retaken if the final course average is above 70.

Academic Standing and Related Policies

Career students must complete all lessons in the program with a minimum overall grade of 70 percent. Students who fail to meet SAP requirements are subject to disciplinary action up to and including dismissal. The Academic Review Board may review poor academic performance or violations of academic integrity or conduct policies and has authority up to and including cancellation/dismissal.

Conduct and Communications Policy

The Ashworth Conduct and Communications Policy refers to the respectful conduct of Ashworth staff, faculty and students in any school communications including student's course assignments, test responses and where applicable, threaded discussions. Respectful conduct also includes following all academic honesty policies that include, but are not limited to, protection of student IDs, usernames, and/or passwords, protection of course exams and assignments, responses to exams and assignments, and not sharing these with other persons, organizations, or websites. Violations of the Ashworth Conduct and Communications Policy will lead to disciplinary action up to and including dismissal from Ashworth College.

Ashworth provides students with different communication channels for communicating with its staff and faculty and responding to assignments and tests. Communication channels include e-m ail, phone,

mail, fax, chat rooms, and the Student Community. Other communications channels include the Learner Center or Brightspace, which are used for submitting course assignments, test and threaded discussion responses and communications to faculty.

It is college policy that Ashworth staff, faculty and students maintain respectful, professional, and polite conduct in all communications at all times. All staff, faculty and students are expected to treat one another with respect. Negative emotions, rude language, and/or profanity have no place in any type of communication channels including phone, written, electronic, etc. Any staff, faculty or student using irate, sarcastic, rude, harassing, or offensive language in any types of communication channels to any staff, faculty or student at the college will be subject to disciplinary action up to and including dismissal from Ashworth College.

In order to allow continual communications with Ashworth students, it is required that students update Ashworth College with any changes to the student's account information. Student account information can be accessed through the Learner Center or students can contact Student Services with any changes to student's name, address, e-mail, or phone number.

NOTE: Ashworth official communications are sent by email or mail. Most official forms require electronic communication by e-mail, unless forms or directions state otherwise. Students are held responsible for official Ashworth communications sent to students. Students should check their email accounts regularly and respond, where needed, to any communications sent from Ashworth College.

Academic Advising

Ashworth College encourages students to take advantage of the knowledgeable academic guidance available through our Learner Success team by e-mail, case, or phone. All student questions and inquiries will be responded to in a timely manner by Ashworth academic advisors and the customer service team. Through the Ashworth online Learner Center, students may review course materials; track lesson progress, shipments, and grades; check account balances and make tuition payments; request academic guidance or customer support; and access the online library; and participate in the Student Community.

Satisfactory Academic Progress Policy

Degree Programs

Ashworth College's degree programs use a satisfactory academic progress (SAP) policy to ensure that students remain on track to complete their programs. SAP is evaluated at the beginning of the first semester and at the end of each semester. For undergraduate programs, a semester is defined as a 5-course semester of academic study. Students are required to complete each semester within 12 months of the semester start date and complete the entire program within the maximum timeframe defined in the students' Enrollment Agreement, unless 6-month extensions are requested and approved.

The cumulative grade point average (CGPA) is the qualitative measure of SAP, and only credits completed at Ashworth with a final grade of A through F are included in the CGPA calculation. Under the current catalog, undergraduate students must maintain a minimum CGPA of 1.00.

Students who do not meet CGPA requirements are placed on Academic Probation. If a student remains below the required standard after the subsequent term, the student is reviewed by the Academic Review Board (ARB) for a decision regarding continued enrollment. The catalog also states that students who fail to meet SAP requirements may be subject to academic disciplinary measures up to and including dismissal, and students who are academically dismissed are not eligible for reinstatement or readmission unless an appeal is submitted to the Academic Review Board Chair and accepted by the Program Director.

For students enrolled under the legacy term enrollment model (TEM), SAP is evaluated after the completion of each term. In that model, the qualitative measure is also CGPA, and students must maintain a 1.00 CGPA. If a student's GPA falls below 1.00, the student is placed on academic probation; if the student remains on probation in the subsequent term, the student is referred to the Academic Review Board for a continued enrollment decision.

Non-Degree Programs

Non-degree students' progress through their programs on a course-by-course basis. Before advancing to the next course, students must complete the majority of the current course or have no more than one examination remaining. Students must also complete the program within the maximum timeframe stated in the Enrollment Agreement and catalog.

Students who fail to make satisfactory progress may receive academic intervention, be referred to the Academic Review Board, be placed on probation, or be academically dismissed.

Career Programs

Ashworth College career programs also use a SAP policy, but the standards are based on a minimum overall course average of 70 percent rather than a CGPA standard. Career courses are graded by the grade-weighted average of the exams and assignments in the course. The grading scale is A = 90–100, B = 80–89, C = 70–79, and F = below 70.

To complete a career certificate or diploma, a student must complete all lessons in the program with a minimum overall grade of 70 percent. Students may resubmit exams or assignments twice if they are not satisfied with their score. Failed exams or assignments do not have to be retaken if the final course average is above 70 percent. Career diploma programs can be completed in approximately 4 months

and career certificate programs in approximately 3 months; students are allowed a maximum of 12 months for career diplomas and 8 months for career certificates, with up to two 6-month extensions available where permitted.

Career students who fail to meet SAP requirements are subject to academic disciplinary measures up to and including dismissal. Reasons for academic dismissal include poor or unacceptable performance and grades, failure of two or more lessons in the first lesson group, plagiarism or academic dishonesty, and unprofessional communications with faculty, staff, or other students. Students who are academically dismissed are not eligible for reinstatement or readmission unless an appeal is submitted to the Academic Review Board and accepted by the Program Director.

Transferring Ashworth College Credit to a Different Institution

A student may wish to transfer coursework from Ashworth College to another institution. The following is to be considered carefully.

- Each institution determines its own policy for accepting transfer credits.
- Normally, to qualify for credit in another institution, the coursework the student wishes to be considered for transfer credit must be reasonably similar to coursework that the receiving institution offers.

To transfer credits from Ashworth College, the student must request that an official transcript of completed coursework be sent to the new institution. An official transcript is one sent from the records officer at the sending institution directly to the designated records officer at the receiving institution.

The other institution may respond to a student's request for transfer credit by:

- Accepting the credit claimed (although some institutions may not give full value).
- Accepting the credit claimed when the student passes a test covering the subject matter.
- Requesting additional information to verify, e.g., a syllabus
- Not accepting the credit claimed.

Students should be sure to keep learning guides, textbooks, other study materials and printed copies of online study materials in case these materials are needed for transfer credits verification by the receiving institution.

Ashworth College does not maintain a list of colleges and universities that accept Ashworth College credits.

Awards

Students enrolled in degree and certificate programs have opportunities to earn the following academic awards.

DEAC Student of the Year Award

The DEAC Student of the Year honor is awarded by the Distance Education Accrediting Commission (DEAC) on an annual basis to students who have exhibited outstanding academic performance, overcome barriers and obstacles to learning, and have demonstrated exemplary behavior and attitude in their dealings with staff, faculty, and peers.

Delta Epsilon Tau National Honor Society
Graduating Ashworth College students who have earned an associate or bachelor's degree with a cumulative GPA of 3.5 or higher can be nominated for membership in Delta Epsilon. Delta Epsilon Tau was established by the Distance Education Accrediting Commission (DEAC) to recognize the achievements of individuals who worked diligently to acquire knowledge and skills from an accredited distance learning institution. As Delta Epsilon Tau's first chapter in the state of Georgia, Ashworth was given Alpha Chapter status. Students eligible for Delta Epsilon Tau may contact the Student Services department for application criteria.

Learning Resource Center and Library Services

Students can access both the Learning Resource Center and the library via the Learning Resources tab in the Learner Center.

The Learning Resource Center (LRC) is located on the Learner Center. The LRC provides a variety of resources to the Ashworth College community in order to encourage the achievement and success of every Ashworth student. These are found in the College School Center. The LRC's College Center provides tips, tutorials and answers for those students conducting research and writing papers. The LRC also provides resources to supplement those in the online library so that students may have access to a wider range of materials relevant to their coursework. Students may also participate in discussion forums in the LRC where they can ask questions regarding finding resources for specific assignments or subjects.

Access to the Student online library is free and provided upon enrollment.

Technology Requirements

Ashworth College requires students to have a computer (desktop, laptop, tablet, or notebook) with Microsoft Office or similar software, an active email address and an updated browser to access the Internet.

Students receive access to personalized Learning Center after enrollment to immediately begin a lesson or course.

Tuition, Fees, and Payment Options

Tuition

All students pay a one-time registration fee along with associated tuition fees for each program, as stated on the enrollment agreement. The tuition fees include all instruction and Student Services.

Ashworth College offers affordable access to quality distance education programs and encourages students to visit the program-specific webpages to see all available tuition payment options complete the program. Students retain all materials after completion of the program.

Extension Fee $ 125 (subject to change)
Transcript (Print or Electronic) $ 15

Non-Refundable Registration Fee
A non-refundable registration fee is collected upon enrollment, and it encompasses certain activities related to a student's enrollment and onboarding, such as student eligibility/acceptance review,

student record profile set-up, Learner Center access and access to course content, and official transcript evaluation, if applicable.

Tuition information and details are listed by program on the Ashworth website at www.ashworthcollege.edu.

Cancellation and Refund Policy

Students may cancel their enrollment via telephone, email, or first-class mail to the physical address listed in the student catalog.

Students may also cancel their enrollment in the "Help Center" of the Learner Center.

If you cancel within 5 days after midnight of the day you enroll, you will receive a refund of all monies paid to Ashworth College.

Ashworth College calculates refunds using the date of withdrawal. Ashworth determines this based on the date the student made the withdrawal request or when the student is dismissed for failure to abide by the code of conduct, to maintain satisfactory academic progress, or to meet financial obligations. maintain satisfactory academic progress, or to meet financial obligations.

If Student Cancels after 5 days and	**Amount Student Owes**
If the student has not submitted any lessons	Non-Refundable Fees + Registration Fees
If the student has submitted at least one lesson, up to and including 10% of the lessons	Non-Refundable Fees + Registration Fees + 10% of Tuition
If the student has submitted more than 10% of the lessons, up to and including 25% of the lessons	Non-Refundable Fees + Registration Fees + 25% of Tuition
If the student has submitted more than 25% of the lessons, up to and including 50% of the lessons	Non-Refundable Fees + Registration Fees + 50% of Tuition
If the student has submitted more than 50% of the lessons	Non-Refundable Fees + Registration Fees + 100% of Tuition

Below is a sample refund for a student enrolled in a Degree Program with Ashworth College. This calculation is based off a refund processed for a student in subsequent semester.

Tuition	Fees	Total
Tuition: $1,422.00	Registration: $0.00	Amount Pade by Student: $1,487.00
Lessons: 29	Shipping (If applicable): $65.00	
Lessons Taken: 13	Administrative (If applicable): $0.00	
Lesson Percentage: 26.90%		
Cancel Terms Percentage: 50.00%		

Total Due: **$711.00**	**Total:** **$65.00**	**Refund Due to Student if Cancelled:** $711.00

Any amount owed is due at the time of cancellation. All refunds will be issued within 30 days of Ashworth College's receipt of your notice of cancellation. No refunds made after 270 days from date of enrollment.

Below is a sample refund for a student enrolled in a Career Program with Ashworth College. This calculation is based off a refund processed for a student in subsequent semester.

Tuition	Fees	Total
Tuition: $721.00	Registration: $108.00	Amount Pade by Student: $454.00
Lessons: 44	Shipping (If applicable): $0.00	
Lessons Taken: 4	Administrative (If applicable): $0.00	
Lesson Percentage: 9.09%		
Cancel Terms Percentage: 10.00%		
Total Due: **$72.10**	**Total:** **$108.00**	**Refund Due to Student if Cancelled: $273.90**

Any amount owed is due at the time of cancellation. All refunds will be issued within 30 days of Ashworth College's receipt of your notice of cancellation. No refunds made after 180 days from date of enrollment.

Rights and Responsibilities

Student Responsibilities

While Ashworth College is here to provide all students an opportunity to learn in an online environment that is functional and easy to use, students also hold a responsibility to Ashworth College and their studies. All students are expected to:

- Respect their peers and instructors.
- Maintain good academic standing while at Ashworth College.
- Understand and follow all Ashworth College policies and understand the consequences for violations.
- Protect student username and/or password by not sharing with any other person or organization, this is grounds for dismissal.
- Follow all deadlines to ensure successful completion of courses.
- Complete all assignments and assessments.
- Grow academically and intellectually.

Student Privacy Policy

Information Ashworth College Collects

Ashworth College collects the following from students:

- Contact and identifying information, including name, address, telephone number, email address, and date of birth.
- Enrollment information, including the program selected, payment option, and the signed enrollment agreement with any Truth in Lending disclosures.
- Payment and financial information provided for tuition and fees.
- Proof of high school completion or other admissions documentation required for the selected program, and transcripts submitted for transfer credit evaluation.
- Academic records, including coursework, examinations, grades, instructor feedback, and progress toward completion.
- Communications between students and Ashworth College, including telephone calls, which Ashworth College records, live chat, email, and support tickets.
- Documentation students submit in support of a request for accommodation.

How Ashworth College Uses Student Information

Ashworth College uses student information to enroll students, deliver instruction, verify identity, evaluate and record academic work, maintain academic records, process payments, provide academic and administrative support, monitor academic progress, communicate with students about their studies, issue transcripts and credentials, and meet legal, regulatory, and accreditation obligations.

When Ashworth College Discloses Student Information

Ashworth College discloses student information in the following circumstances:
To instructors, graders, and staff who need the information to perform their duties.
To service providers who support Ashworth College 's operations, including the learning management system, student information system, payment processors, the identity verification provider, the transcript service, and collection agencies. These providers may use student information only to perform services for Ashworth College.

- To an employer, sponsor, or guarantor paying all or part of a student's tuition, limited to program progress, completion status, grades, grade point average, and account balance.

- To an employer or prospective employer to which the student has applied or expressed interest, limited to program progress, completion status, grades, and grade point average.
- To an educational partner through which a student enrolled, for students enrolled under that partnership.
- To accrediting, licensing, and certifying bodies as required to maintain or establish Ashworth College 's accreditation, licenses, and approvals.
- In response to a subpoena, court order, or lawful request from a government or law enforcement authority.
- Ashworth College may release the following without student consent:
- Student name, program name, dates of attendance, enrollment status, and honors and awards.
- Students who do not want Ashworth College to release this information may opt out by contacting PFdatarequest@pennfoster.edu.

Students Under 18
A student under 18 years of age must have a guarantor at least 21 years of age sign the enrollment agreement. The guarantor accepts financial responsibility for the enrollment and receives information about the student's account balance and payment obligations.

Protecting Student Records
Ashworth College assigns each student a unique student number and requires a password to access the Learner Center. Ashworth College employees do not know student passwords and reset them only at the student's request.

Students who contact Ashworth College for assistance must provide their student number or answer security questions before staff release account information or change a record.

Sharing a student number or password with another person violates the honor code and may result in disciplinary action.

If Ashworth College believes a student's account has been compromised, it may block access until it verifies the student's identity.

How Long Ashworth College Keeps Student Records
- Transcripts and enrollment agreements: permanent.
- Records in the Learner Center, including completed coursework with final grades, payments, the signed enrollment agreement with any Truth in Lending disclosures, and any document received from the student: 50 years.

Reviewing and Correcting Records
Students may view their academic records, grades, and account information in the Learner Center at any time, and may correct their contact and payment information there.

Questions
Students with questions about this policy or about their records may contact PFdatarequest@pennfoster.edu. Information Ashworth College collects from visitors to its website, including cookies, advertising, and marketing data, is covered by the Ashworth College Privacy Policy

Student Grievance Policy

Ashworth College considers a student complaint to be any expression of dissatisfaction a student raises about the institution, its personnel, its programs, or its services, including academic matters such as grading, instructor feedback, and program content, and service matters such as enrollment, billing, technology, and student support.

Most student complaints are resolved at the first point of contact with the school. Ashworth College addresses student complaints using the policies and provisions of the enrollment agreement, student catalog, and academic requirements of the school. Students who have a complaint should contact their instructor regarding academic issues or a Learner Success Advocate regarding service issues. The instructor or Learner Success Advocate will respond by telephone or in writing within three business days, using the student's preferred method of communication. If the student believes that the complaint has not been properly handled at that point, the student should use the following procedure to register a grievance. Ashworth College resolves grievances within two weeks of the date the student registers the grievance.

Ashworth College takes no adverse action against a student for filing a complaint or grievance.

When a complaint concerns an instructor, staff member, or administrator, Ashworth College gives that person an opportunity to respond before reaching a final decision. A student whose complaint concerns their first point of contact may begin at Step 1.

Steps in Grievance Procedure

1. The student should contact the Academic Team Lead for academic issues or the Manager of Learner Success for service issues, either by phone or in writing, expressing their concern within 30 days of receiving a response to the original complaint. The Academic Team Lead or Manager of Learner Success will respond either by phone or in writing within two weeks of receiving the complaint.
2. If the student feels that the issue is still unresolved, they have 30 days to express continued concerns either by phone or in writing to the Academic Program Director or the Director of Learner Success. The Academic Program Director or Director of Learner Success will respond within two weeks.
3. If the student still believes the grievance is unresolved, they may complete the school's grievance form within 30 days from receiving the response from the Academic Program Director or Director of Learner Success. Students may download the grievance form at [URL] or request it from the Learner Success Advocate Team at [Phone Number]. Ashworth College will email or mail the form to the student on request.
4. Grievance Forms
    - Academic **Grievances:** The student returns academic grievance forms to the Academic Program Director, who forwards them to the Academic Review Board. The Academic Review Board consists of [Who serves on this board?]. The Board will meet and render a decision within two weeks of receipt of the grievance form. The decision of the Academic Review Board is final and Ashworth College sends it to the student in writing.
4. **Student Services Grievances:** The student returns service grievance forms to the Learner Success Escalation Specialist decision within two weeks of receipt of the grievance form. The decision of the Learner Success Escalation Specialist is final and Ashworth College sends it to the student in writing.

5. Ashworth College retains complete files for all complaints and grievances, including the original complaint, correspondence, the institution's review, findings, and final decision, for five years from the date of filing.

External Complaints

Students may file external complaints with the following organizations:

Georgia Nonpublic Postsecondary Education Commission (GNPEC)
Address: 2082 East Exchange Place, Suite 220, Tucker, Georgia 30084
Phone: 770-414-3300
Website: https://gnpec.georgia.gov/student-resources/complaints-against-institution

Distance Education Accrediting Commission (DEAC)
Address: 1101 17th Street NW, Suite 808, Washington, D.C. 20036
Phone: 202-234-5100
Website: https://www.deac.org/student-center/complaint-process/

Students residing outside Georgia (except California)
Students who reside outside Georgia and are enrolled in an online-only program file through Georgia's State Authorization Reciprocity Agreement process using the SARA complaint form. Georgia serves as Ashworth College's SARA portal state.

- GA-SARA Student Complaint Rules: https://gnpec.georgia.gov/student-resources/complaints-against-institution/ga-sara-student-complaint-rules
- GA-SARA Online Student Complaint Form: https://gnpec.georgia.gov/student-resources/student-complaints/ga-sara-online-student-complaint-form

Students residing in California
California does not participate in the State Authorization Reciprocity Agreement. Students residing in California may file with the Bureau for Private Postsecondary Education at: https://www.bppe.ca.gov/enforcement/complaint.shtml.

Non-Discrimination Statement

Ashworth College does not discriminate in admissions, access to, operation of, treatment or employment in its programs and activities on the basis of race, color, national origin, religion, creed, ethnicity, disability, age, marital status, sex, gender, sexual orientation, gender identity, veteran status, or any other legally protected status.

Accommodating Students with Disabilities Act

Ashworth College believes in opportunity for everyone. Therefore, the school strives to meet the needs of all students by providing instructional support and student advocacy which will enable them to reach their maximum potential. The school does not discriminate on the basis of race, color, gender, religion, national origin, age, or physical disability.

Ashworth College complies with Section 504 of the Rehabilitation Act of 1973 and the implementing regulations 34 CFR part 104 (barring discrimination on the basis of disability), and the Americans with Disabilities Act (ADA) of 1990 and the implementing regulations in 29 CFR part 1630 (1991). The school will offer a reasonable accommodation for any qualified student with documented disabilities provided

the accommodation does not pose an undue hardship on the school or does not force the school to fundamentally alter the educational course, compromise its academic standards, or place the disabled individual in a better than equal position with nondisabled students. Students must complete the ADA form which is available on the Learner Center and submit it along with documented evidence of disability to ADArequest@pennfoster.edu to be eligible for any accommodations. All completed requests for accommodations will be reviewed by the ADA Review Committee within five (5) business days. Students will receive written communication outlining the decision of the committee.

Career Assistance
Ashworth College offers resources to current students and alumni to help with career planning and job search efforts. The Learning Resource Center, which is located in the library, includes guides for career planning, instructions for writing a winning resume, tips and advice to succeed at a job interview and how to follow-up after the interview, and information on negotiating and understanding compensation levels and offers. You are solely responsible for ensuring that the program and program award satisfy the education requirements of potential employers, desired postsecondary institutions, and all other relevant agencies. Neither job placement nor postsecondary admission are guaranteed to graduates upon program completion.

Master of Education, Gratz College
Bachelor of Science: Early Childhood Education, Marywood University

Undergraduate Degree Programs

Special Note: Students should be aware that programs are developed to provide foundational knowledge and/or skills. Because state regulations vary, students should contact their state agencies to determine if this course is appropriate for their career goals. This applies particularly to para-professional careers such as law, education, and health-related fields.

Curriculum

Ashworth College offers undergraduate degree programs, as well as undergraduate certificate programs.

Note: Program and course offerings are subject to change. This can include course codes, course names, program structure, and courses offered within a program.

The undergraduate programs include undergraduate certificates, associate degree programs, and bachelor's degree programs. There is one track to the associate degree programs: Associate of Science. There are two tracks to the bachelor's degree programs: Bachelor of Arts, and Bachelor of Science.

Undergraduate Certificate Programs

Ashworth undergraduate certificates provide specialized knowledge within a specific discipline at the undergraduate level. An undergraduate certificate consists of one (1) semester of course work within a specialized area of study (5 courses of 3 credit hours each, for a total of 15 credit hours). Each certificate consists of one or more required courses along with a list of elective course options to provide students with a customized and focused program of study that meets their specific needs. All credits earned in an undergraduate certificate program will transfer to the corresponding associate or bachelor's degree program.

The Undergraduate Certificate programs are designed to provide students with the opportunity to earn college credits without enrolling in a degree program.

Prerequisite: High School Diploma or GED Undergraduate Certificates are available in:

- Construction Management
- Early Childhood Education
- General Studies
- Marketing
- Paralegal Studies

Undergraduate Certificate Program Listings

Construction Management

The Construction Management program is designed to provide you with a core foundation of knowledge in construction management and career-focused skills and best practices you can apply to advance your current construction career.

Program Objectives:

- Discuss contemporary building construction principles, materials, and practices
- Identify the primary regulations and design considerations used to create safe and compliant building plans and drawings
- Outline the steps involved in creating and updating construction project plans and schedules

- Identify the primary types of building loads and the design and material elements used to manage or offset these
- Explain the importance of OSHA compliance and safety on a worksite
- Estimate the full cost of sample construction projects
- Recognize common issues that arise with project planning, scheduling, and management

Course Number	Course Title	Course Type
B01	Introduction to Construction	Core/Required
B08	Construction Management	Core/Required
Electives	**Choose 3**	
B02	Construction Materials and Methods	Elective
B03	Drawings and Specifications	Elective
B04	Safety Planning and Administration	Elective
B05	Construction Surveying Fundamentals	Elective
B06	Cost Estimating	Elective
B07	Project Scheduling	Elective

Early Childhood Education

The Early Childhood Education program is designed to provide you with a foundation of knowledge in Early Childhood Education along with career-focused skills and best practices you can use to start a career in the field or advance a current one. These studies can also be applied to the professional education requirement section of the Child Development Associate (CDA) Credential™.

Program Objectives

- Examine strategies to help children learn about the world around them as well as their emotions, health, nutrition, and safety
- Assess the needs of every child in every area of development, background, and ability
- Describe the physical and social-psychological developments of growing children and how these impact cognitive abilities
- Evaluate appropriate resources for an early childhood curriculum
- Discuss the importance of creative play, art, music, and movement in an effective early childhood curriculum
- Explain the importance of meeting the cultural needs of students and fostering good relationships with families

Course Number	Course Title	Course Type
E01	Careers in Early Childhood Education	Core/Required
Electives	**Choose 4**	
E02	Child Development	Elective
E03	Curriculum Development	Elective
E04	Guidance and Discipline	Elective
E05	Children's Literature	Elective
E06	Creative Expression and Play	Elective
E07	Art and Creative Development	Elective

E08	Health, Safety and Nutrition	Elective
E09	Home, School and Community	Elective
E10	Exceptional Children	Elective
E11	Movement and Music	Elective
E12	Cultural Diversity	Elective
E13	Early Childhood Literacy	Elective

General Studies

The General Studies program is designed to prepare you for further study in electives of your choice or for a more advanced degree in your chosen field by establishing a foundation of knowledge that ranges from hard sciences to humanities and the fine arts.

Program Objectives

- Produce college-level writing for academic assignments across content areas
- Solve real-world mathematical problems using fundamental math and algebra concepts
- Apply APA rules to correctly develop paragraphs, cite references, and note direct or indirect quotations
- Explain how fundamental chemical, biological, and ecological principles impact everyday living
- Apply high-level inquiry and problem-solving skills to analyze human behavior and systems
- Explain differing perspectives on politics and the economy
- Identify principal characteristics of the world's major civilizations

Course Number	Course Title	Course Type
EN120	English Composition I	Core/Required
C17/MA240	College Math/MA240 College Algebra	Core/Required
Electives	**Choose 3 - 1 from each category**	
	SCIENCE ELECTIVE	
SC140	Elements of Chemistry	Elective
SC160	Basic Biology	Elective
SC260	Introduction to Ecology	Elective
	BEHAVIORAL/SOCIAL SCIENCE ELECTIVE	
C04	Introduction to Psychology	Elective
C08	American Government	Elective
C11	Macroeconomics	Elective
C13	Microeconomics	Elective
SO115	Essentials of Sociology	Elective
	HUMANITIES/FINE ARTS	
HS150	World Civilization I	Elective
HS250	World Civilization II	Elective

Marketing

The Marketing Undergraduate Certificate is designed to prepare students for a career in marketing or further study in the field through engagement with marketing fundamentals and choice of electives — such as Consumer Buying Behavior, Principles of Professional Selling, Principles of Retailing, Integrated

Marketing Communications, Internet Marketing, and International Marketing — to create a customized specialization.

Program Objectives

- Explain the role and function of marketing, including the creation and communication of value and the relevance of marketing to its environment
- Discuss the importance of building and maintaining customer relationships across the full spectrum of marketing activities: retail, internet, and/or international
- Develop and analyze market differentiation strategies and components of business and marketing plans
- Create marketing, sales, and financial strategies to help businesses grow and attain targeted goals
- Discuss how perceptions, memory, education, culture, and attitudes all impact consumer buying decisions
- Use digital-age marketing techniques effectively, including social media, mobile content, email marketing, data mining, and search engine marketing
- Describe how marketing (including retail, internet, and/or international) operates within legal, social, and other regulatory environments

Course Number	Course Title	Course Type
C16	Principles of Marketing	Core/Required
Electives	**Choose 4**	
G01	Consumer Buying Behavior	Elective
G02	Principles of Professional Selling	Elective
G03	Principles of Retailing	Elective
G04	Integrated Marketing Communications	Elective
G05	Internet Marketing	Elective
G06	International Marketing	Elective

Paralegal Studies

The Paralegal Studies program is designed to prepare you for a career as a paralegal or for further study in the legal field by establishing a foundation of essential skills while allowing ample opportunity for specialization through electives.

Program Objectives

- Describe the roles and duties of paralegals and other members of a legal team
- List the elements of negligence, intentional torts, and strict liability torts
- Explain the rules that govern the progression of a lawsuit
- Discuss the protections afforded by the Fourth, Fifth, Sixth, and Eighth Amendments to the U.S. Constitution
- Distinguish real property, personal property, and fixtures from one another
- Describe the legal standards courts use when making child custody decisions
- Apply research and analysis skills to brief a case

Course Number	Course Title	Course Type
P01	Introduction to Paralegalism I	Core/Required
P02	Introduction to Paralegalism II	Core/Required
Electives	**Choose 3**	
P03	Torts	Elective
P04	Civil Litigation	Elective
P05	Criminal Law and Procedure	Elective
P06	Real Estate Law	Elective
P07	Law Office Management	Elective
P08	Family Law	Elective
P09	Legal Research and Writing	Elective
P10	Wills, Trusts, and Estates	Elective

The following Undergraduate Certificate programs are no longer accepting new enrollments:

- Accounting
- Business Management
- Criminal Justice
- Healthcare Management
- Human Resource Management

Associate Degree Programs

Ashworth College offers one associate degree track: Associate of Science.

Associate of Science

Associate of Science degrees provide students with a thorough understanding of concepts and applications in a specific concentration area. The associate programs have a strong focus on the area of specialization alongside basic general education courses. This is a 4-semester program consisting of 60 credit hours (20 courses of 3 credit hours each) of college-level study. There are 24 general education credits (8 courses of 3 credit hours each) and 36 elective and discipline credits (12 courses of 3 credit hours each). The Associate of Science programs provide a balanced focus on the core courses and basic general education with elective options in both categories. Associate of Science programs are academically oriented and provide a foundation for admission into Ashworth's Bachelor of Science degree programs without any additional academic preparation.

Prerequisite: High School Diploma or GED Associate of Science degrees are offered in:

- Accounting
- Construction Management
- Criminal Justice
- Early Childhood Education
- General Business
- Human Resource Administration
- Marketing
- Paralegal Studies
- Psychology

Associate of Science in Accounting

Program Description

The Associate of Science in Accounting program is designed to provide students with a well-rounded education by combining a core set of general education courses with specialized courses in accounting. The program lays the foundation for a broad base of knowledge with general education courses in a variety of subject areas. In addition, courses within the program discipline, such as Introduction to Accounting, Principles of Accounting, and Intermediate Accounting focus on preparing students for careers within the accounting field.

Program Objectives

1. Demonstrate an understanding of an accounting information system, the steps of the accounting cycle, and the application of GAAP
2. Apply knowledge of accounting processes and financial management principles to business situations and managerial decision making
3. Discuss how accounting rules are established, how financial statements can be used, and the components of a multiple-step income statement.
4. Demonstrate a foundation of business knowledge related to business ownership, marketing, risk management, and social responsibility
5. Identify and apply the fundamental principles of public speaking, speech criticism, audience analysis, and effective delivery techniques
6. Demonstrate a foundation of computer and information systems knowledge, technical skills, and a basic understanding of computer applications

7. Demonstrate an understanding of the broad implications of technological innovation on social organization in terms of personal, political, economic, and environmental issues
8. Demonstrate proficiency with English composition, including the ability to develop essays, revise and edit one's work, and conduct academic research
9. Demonstrate basic mathematical skill by describing mathematical reasoning and logic as the basis for data analysis, and by applying the major concepts of college-level algebra
10. Be prepared to enter Ashworth College's bachelor's degree programs without any additional academic preparation

Associate of Science in General Business

Program Description

The Associate of Science in General Business program is designed to provide students with a well-rounded education by combining a core set of general education courses with specialized courses in general business. The program lays the foundation for a broad base of knowledge with general education courses in a variety of subject areas. In addition, courses within the program discipline, such as Principles of Management, Business Ethics, and Principles of Marketing focus on preparing students for careers within the business field.

Program Objectives

1. Apply sound management principles to the functions of planning, organizing, leading, controlling, and decision making within a business
2. Identify and analyze the pertinent concepts and theories of law, ethical issues that arise, and the principles of legal reasoning
3. Demonstrate an understanding of an accounting information system, the steps of the accounting cycle, and the application of GAAP
4. Demonstrate an understanding of major theoretical perspectives and concepts, and their application to a variety of employee issues and responsibilities in contemporary business life
5. Demonstrate a foundation of computer and information systems knowledge, technical skills, and a basic understanding of computer applications
6. Identify and apply the fundamental principles of public speaking, speech criticism, audience analysis, and effective delivery techniques
7. Demonstrate an understanding of the broad implications of technological innovation on social organization in terms of personal, political, economic, and environmental issues
8. Apply fundamental processes, theories, and methods to business communication in the workplace and the overall writing initiative
9. Demonstrate basic mathematical skill by describing mathematical reasoning and logic as the basis for data analysis, and by applying the major concepts of college-level algebra
10. Be prepared to enter Ashworth College's bachelor's degree programs without any additional academic preparation.

Associate of Science in Construction Management

Program Description

The Associate of Science in Construction Management program is designed to provide students with a well-rounded education by combining a core set of general education courses with specialized courses in construction management. The program lays the foundation for a broad base of knowledge with general education courses in a variety of subject areas. In addition, courses within the program discipline, such as Cost Estimating, Project Scheduling, and Drawings and Specifications focus on preparing students for careers within the construction field.

Program Objectives

1. Discuss the history of construction, the construction team project sequencing, communication, and documentation, and the use of surveys in commercial, residential, and road construction
2. Apply knowledge of how to manage a construction project with responsibility and authority
3. Discuss the role of safety in the construction industry, including the cost and causes of accidents, workers' compensation, emergency response plans, environmental safety, and OSHA compliance
4. Display the skills of time management, critical thinking, problem solving, decision making, written comprehension, and communication
5. Identify and apply the fundamental principles of public speaking, speech criticism, audience analysis, and effective delivery techniques
6. Demonstrate a foundation of computer and information systems knowledge, technical skills, and a basic understanding of computer applications
7. Demonstrate an understanding of the broad implications of technological innovation on social organization in terms of personal, political, economic, and environmental issues
8. Demonstrate proficiency with English composition, including the ability to develop essays, and revise and edit one's work

9. Demonstrate basic mathematical skill by describing mathematical reasoning and logic as the basis for data analysis, and by applying the major concepts of college-level algebra

Associate of Science in Criminal Justice

Program Description

The Associate of Science in Criminal Justice program is designed to provide students with a well-rounded education by combining a core set of general education courses with specialized courses in criminal justice. The program lays the foundation for a broad base of knowledge with general education courses in a variety of subject areas. In addition, courses within the program discipline, such as

Criminal Law, Criminal Investigation, and Juvenile Justice focus on preparing students for careers within the criminal justice field.

Program Objectives

1. Discuss how laws are created, the history of law enforcement, the court system, and the changing philosophies of the American correctional system.
2. Use critical thinking, creative and logical analysis, strategies, techniques, and the application of theory to solve complex problems related to police officer responsibilities.
3. Discuss the ideals of justice and the ethical behavior that criminal justice professionals should exhibit in the furtherance of justice.
4. Explain the investigation process and apply specific investigative and information- gathering techniques to meet the evidentiary requirements of specific crimes.
5. Demonstrate a foundation of computer and information systems knowledge, technical skills, and a basic understanding of computer applications.
6. Identify and apply the fundamental principles of public speaking, speech criticism, audience analysis, and effective delivery techniques.
7. Demonstrate an understanding of the broad implications of technological innovation on social organization in terms of personal, political, economic, and environmental issues.
8. Demonstrate proficiency with English composition, including the ability to develop essays, revise and edit one's work, and conduct academic research.
9. Demonstrate basic mathematical skill by describing mathematical reasoning and logic as the basis for data analysis, and by applying the major concepts of college-level algebra.
10. Be prepared to enter Ashworth College's bachelor's degree programs without any additional academic preparation.

A career in this field may require students to meet certain licensing, training, and other requirements that may vary by vocation and state. Students should check with their state, local government, and/or licensing board to research the requirements that may be applicable in their state.

Associate of Science in Paralegal Studies

Program Description

The Associate of Science in Paralegal Studies program is designed to provide students with a well-rounded education by combining a core set of general education courses with specialized courses in paralegal studies. The program lays the foundation for a broad base of knowledge with general education courses in a variety of subject areas. In addition, courses within the program discipline, such as Legal Research and Writing, Torts, and Law Office Management focus on preparing students for careers within the paralegal field.

Program Objectives

1. Identify and analyze the pertinent concepts and theories of law, ethical issues that arise, and the principles of legal reasoning
2. Describe the scope of paralegal activities; legal analysis, interviewing, and investigation; legal research and writing; and the elements of litigation
3. Discuss legal forms of business ownership, expenses, timekeeping, fee structures, billing, administrative reports, and miscellaneous administrative procedures
4. Demonstrate proficiency with the use of legal research tools and techniques
5. Demonstrate a foundation of business knowledge related to business ownership, marketing, risk management, and social responsibility
6. Identify and apply the fundamental principles of public speaking, speech criticism, audience analysis, and effective delivery techniques
7. Demonstrate a basic understanding of computer applications, and the broad implications of technological innovation on social organization in terms of personal, political, economic, and environmental issues
8. Demonstrate proficiency with English composition, including the ability to develop essays, and revise and edit one's work
9. Demonstrate basic mathematical skill by describing mathematical reasoning and logic as the basis for data analysis, and by applying the major concepts of college-level algebra
10. Be prepared to enter Ashworth College's bachelor's degree programs without any additional academic preparation

Degree Plan: AS Paralegal Studies

Associate of Science in Psychology

Program Description

The Associate of Science in Psychology program is designed to provide students with a well- rounded education by combining a core set of general education courses with specialized courses in psychology. The program lays the foundation for a broad base of knowledge with general education courses in a variety of subject areas. In addition, courses within the program discipline, such as Social Psychology, Human Growth and Development, and Psychology of Personality focus on preparing students for careers within the psychology field.

Program Objectives

1. Demonstrate an understanding of psychology, including psychological research, biology and behavior, and the relationships between the environment and behavior
2. Display an understanding of human growth and development, social psychology, abnormal psychology, and the psychology of personality
3. Present the four major issues in human relations: understanding and managing one's self, dealing effectively with others, fostering career success, and managing one's personal life
4. Discuss the factors that shape personality, including biological, intrapsychic, dispositional, cognitive, and experiential, social and cultural, and adjustments to events in day-to- day life
5. Display the skills of time management, critical thinking, problem solving, decision making, written comprehension, communication, and research
6. Identify and apply the fundamental principles of public speaking, speech criticism, audience analysis, and effective delivery techniques
7. Demonstrate a basic understanding of computer applications, and the broad implications of technological innovation on social organization in terms of personal, political, economic, and environmental issues
8. Demonstrate proficiency with English composition, including the ability to develop essays, and revise and edit one's work
9. Demonstrate basic mathematical skill by describing mathematical reasoning and logic as the basis for data analysis, and by applying the major concepts of college-level algebra

The following Associate Degree programs are no longer accepting new enrollments:

Associate of Science in Healthcare Administration

Program Description

The Associate of Science in Healthcare Administration program is designed to provide students with a well-rounded education by combining a core set of general education courses with specialized courses in healthcare administration. The program lays the foundation for a broad base of knowledge with general education courses in a variety of subject areas. In addition, courses within the program discipline, such as Medical Terminology, Anatomy and Physiology, and Medical Coding focus on preparing students for careers within the healthcare field.

Program Objectives

- Apply an understanding of medical office terminology, records management, patient, and laboratory procedures, and how to respond to medical emergencies

- Present a clear understanding of the structure and chemistry of the human body, disease, and the integumentary, skeletal, muscular, nervous, and reproductive systems
- Demonstrate knowledge of the proper coding of diagnoses and medical procedures
- Display the skills of time management, critical thinking, problem solving, decision making, written comprehension, communication, and research
- Explain how medical records are used, shared, and stored by the medical office, and the relationships between these records and medical care, legal, and insurance, or billing concerns
- Identify and apply the fundamental principles of public speaking, speech criticism, audience analysis, and effective delivery techniques
- Demonstrate a basic understanding of computer applications, and the broad implications of technological innovation on social organization in terms of personal, political, economic, and environmental issues
- Demonstrate proficiency with English composition, including the ability to develop essays, and revise and edit one's work
- Demonstrate basic mathematical skill by describing mathematical reasoning and logic as the basis for data analysis, and by applying the major concepts of college-level algebra
- Be prepared to enter Ashworth College's bachelor's degree programs without any additional academic preparation

Bachelor Degree Programs

Ashworth College offers two bachelor degree tracks: Bachelor of Arts and Bachelor of Science.

Bachelor of Arts

Bachelor of Arts degrees provide a solid foundation for a liberal arts college education. These are broadly based degree programs designed to provide students with a well-rounded education by combining a core set of introductory and advanced general education courses with courses from several career-related disciplines. This is an 8-semester program consisting of 120 credit hours (40 courses of 3 credit hours each) of college-level study. There are 60 general education credits and 60 elective credits. Students can select a combination of courses from various disciplines, such as business management, criminal justice, marketing, and psychology to customize the program to meet their professional and personal goals.

Prerequisite: High School Diploma or GED
The Bachelor of Arts degree is offered in:

- General Studies

Bachelor of Science

Ashworth Bachelor of Science degrees provide students with a strong foundation of general education courses (language, arts, and sciences) followed by core and elective courses in the chosen concentration area. The program covers basic, intermediate, and advanced courses within an area of specialization. This is an 8-semester program consisting of 120 credit hours (40 courses of 3 credit hours each) of college-level study. There are 36 general education credits, 60 discipline credits, and 24 elective credits.

Prerequisite: High School Diploma or GED
Bachelor of Science degrees are offered in:

- Business Administration

- Criminal Justice
- Early Childhood Education
- Healthcare Management
- Management
- Marketing
- Psychology

Bachelor of Science in Business Administration

Program Description

The Bachelor of Science in Business Administration program is designed for students seeking to acquire a high level of knowledge from a broad base of business concepts to create solutions to contemporary business problems. Students will acquire the skills needed to integrate management, marketing, accounting, and finance concepts to develop strategies to improve short-, medium-, and long-term organizational performance.

Program Objectives

1. Demonstrate knowledge of the strategic management process and an ability to assess industry attractiveness and the competitive environment
2. Explain how effective leaders use their interpersonal skills to promote change, communicate vision, provide a sense of direction, and inspire employees
3. Successfully utilize the tools and techniques of managerial accounting to make decisions about both day-to-day operations and long-term tactics and strategies
4. Utilize the tools and methodologies needed to solve marketing problems, including developing marketing plans and the use of various marketing strategies
5. Identify and analyze the pertinent concepts and theories of law, ethical issues that arise, and the principles of legal reasoning
6. Apply fundamental processes, theories, and methods to business communication in the workplace and the overall writing initiative
7. Demonstrate proficiency with English composition, including the ability to use appropriate style, grammar, and mechanics in writing assignments and to conduct academic research
8. Demonstrate an understanding of computer applications and proficiency with the managerial applications of Internet technology, including the application of management principles to business-to-consumer, business-to-business, and intrabodies commercial ventures
9. Identify and apply fundamental math concepts for operations and problem solving and apply basic statistical concepts and tools in order to correctly interpret the results of statistical analyses

* Business Ethics is a required course to complete a bachelor's degree in business administration.

Bachelor of Science in Criminal Justice

Program Description

The Bachelor of Science in Criminal Justice program is designed for students who want to gain knowledge of the multidisciplinary components that comprise American criminal justice. This program provides a broad base of traditional liberal arts and science courses, as well as courses that examine the functional components of criminal justice such as American law and procedure, criminal investigation and practice, and correctional settings. The program is geared toward students interested in such areas as law, law enforcement, corrections, and security, whether the student is already in the field or preparing for a career in a criminal- justice related area.

Program Objectives

1. Discuss the development of criminal law in the United States, including the elements of due process, rule of law, and the role of the Constitution in protecting rights
2. Describe the dynamics of courthouse justice, the court process and process of the criminal justice system, and the role of court staff in interfacing with the public
3. Demonstrate an understanding of the investigative process by providing a thorough overview of the fundamentals of criminal investigation and by showing its application to many major felonies
4. Discuss the changing roles and goals of corrections; the variety of ways society punishes people who break criminal laws; and the impact of our corrections policies
5. Demonstrate an understanding of contemporary concepts and practices for first line supervisors in law enforcement, with an emphasis on character, motivation, teamwork, and conflict resolution
6. Identify and analyze the pertinent concepts and theories of law, ethical issues that arise, and the principles of legal reasoning
7. Demonstrate a foundation of computer and information systems knowledge, technical skills, and a basic understanding of computer applications

8. Demonstrate proficiency with English composition, including the ability to use appropriate style, grammar, and mechanics in writing assignments and to conduct academic research
9. Identify and apply fundamental math concepts for operations and problem solving and apply basic statistical concepts and tools in order to correctly interpret the results of statistical analyses

A career in this field may require students to meet certain licensing, training, and other requirements that may vary by vocation and state. Students should check with their state, local government, and/or licensing board to research the requirements that may be applicable in their state.

Bachelor of Science in Early Childhood Education

Program Description

The Bachelor of Science in Early Childhood Education program is designed to provide students with in-depth instruction in the principles and procedures of supervising and educating children from newborn to age eight. The program lays the foundation for a broad base of knowledge with general education courses in a variety of subject areas. In addition, specialty courses such as child development, early childhood literacy, curriculum development, cultural diversity, and exceptional children focus on preparing students for careers within the field of early childhood education.

Program Objectives

1. Describe at a fundamental level how children learn, how teachers work with children and their parents, what is taught, and where the teaching takes place
2. Examine childhood development by observing physical and psychosocial factors that lead to cognitive, language, and literacy development according to a child's age
3. Apply the guidance and discipline concepts applicable to children's behavior in preschool and primary school classrooms
4. Discuss the special needs of children with developmental disabilities, and how to implement programs that include these children in an early childhood classroom

5. Develop and implement appropriate curriculum for young children, fostering creativity and emotional, social, and verbal competence within the curriculum
6. Demonstrate an understanding of the partnerships with parents and others that teachers must create in order to achieve the best results for children in their classroom
7. Demonstrate proficiency with English composition, and apply fundamental processes, theories, and methods to business communication in the workplace
8. Demonstrate a foundation of computer and information systems knowledge, technical skills, and a basic understanding of computer applications
9. Identify and apply fundamental math concepts for operations and problem solving and apply basic statistical concepts and tools in order to correctly interpret the results of statistical analyses

A career in this field may require students to meet certain licensing, training, and other requirements that may vary by vocation and state. Students should check with their state, local government, and/or licensing board to research the requirements that may be applicable in their state.

Bachelor of Science in Healthcare Management

Program Description

The Bachelor of Science in Healthcare Management program is designed to provide students with knowledge and skills that they can apply in a variety of healthcare-related career settings. The program lays the foundation for a broad base of knowledge with general education courses in a variety of subject areas. In addition, specialty core courses within the program discipline focus on the managerial, financial, logistical, and ethical aspects of healthcare, enabling students to become well-rounded professionals in their chosen field.

Program Objectives

1. Demonstrate proficiency with English composition and apply fundamental processes, theories, and methods to business communication in the workplace
2. Demonstrate a foundation of computer and information systems knowledge, technical skills, and a basic understanding of computer applications

3. Identify and apply fundamental math concepts for operations and problem solving and apply basic statistical concepts and tools in order to correctly interpret the results of statistical analyses
4. Demonstrate knowledge of medical terminology, medical office management, and proper coding of diagnoses and medical procedures
5. Examine the fundamentals of healthcare system information management including electronic health records

6. Analyze the components, current issues, trends, and limitations of healthcare services in the United States and evaluate the ethical and legal issues relevant to healthcare delivery
7. Analyze the social science perspective of the health service delivery system and the roles, values, and sociocultural influences that affect the medical treatment of patients
8. Apply economic, financial, and accounting principles to healthcare institutions
9. Examine the role that human resource management plays within the healthcare industry and develop leadership and teambuilding skills

Degree Plan: BS Healthcare Management

*If students expect to complete a bachelor's degree, MA240 is required.

Bachelor of Science in Management

Program Description

The Bachelor of Science in Management program is designed for students seeking to acquire a concentration of management knowledge within a broad base of business concepts. Students will acquire insights into management theories and the cutting-edge management techniques needed by managers. In addition to developing management competencies, students will gain the skills needed to integrate marketing, accounting, and financial programs to produce effective business strategies.

Program Objectives

1. Describe the nature and process of management within modern organizations and explain how to successfully apply management theories and principles to the situations and challenges that typically occur in managing a business
2. Describe the foundational tools of business finance and their applications to controlling the firm's financial environment and to making financial business decisions in an analytical manner
3. Demonstrate knowledge of the strategic management process and an ability to assess industry attractiveness and the competitive environment
4. Discuss strategic considerations that marketers are facing related to technology and technology implementation
5. Identify and analyze the pertinent concepts and theories of law, ethical issues that arise, and the principles of legal reasoning
6. Identify and apply fundamental math concepts for operations and problem solving and apply basic statistical concepts and tools in order to correctly interpret the results of statistical analyses
7. Utilize the tools and methodologies needed to solve marketing problems, including developing marketing plans and the use of various marketing strategies
8. Demonstrate a foundation of computer and information systems knowledge, technical skills, and a basic understanding of computer applications
9. Demonstrate proficiency with English composition and apply fundamental processes, theories, and methods to business communication in the workplace

Bachelor of Science in Marketing

Program Description

The Bachelor of Science in Marketing program is designed for students seeking to acquire a concentration of marketing knowledge within a broad base of business concepts. Students will acquire insights into the marketing process and the cutting-edge marketing techniques needed by marketing managers. In addition to developing marketing skills, students will gain the knowledge needed to

integrate marketing strategies and programs with other important business functions focused on achieving the organization's business objectives.

Program Objectives

1. Demonstrate a foundation of computer and information systems knowledge, technical skills, and a basic understanding of computer applications
2. Demonstrate proficiency with the managerial applications of Internet technology, including the application of management principles to business-to-consumer, business-to-business, and intrabusiness commercial venture
3. Utilize the tools and methodologies needed to solve marketing problems, including developing marketing plans and the use of various marketing strategies.
4. Explain how effective leaders use their interpersonal skills to promote change, communicate vision, provide a sense of direction, and inspire employees
5. Demonstrate proficiency with English composition, and apply fundamental processes, theories, and methods to business communication in the workplace
6. Identify and analyze the pertinent concepts and theories of law, ethical issues that arise, and the principles of legal reasoning
7. Identify and apply fundamental math concepts for operations and problem solving and apply basic statistical concepts and tools in order to correctly interpret the results of statistical analyses
8. Demonstrate knowledge of the strategic management process and an ability to assess industry attractiveness and the competitive environment
9. Fully explain the elements of marketing employed by most business organizations, with emphasis on the integration of the marketing function into the strategic direction of the firm

Bachelor of Science in Psychology

Program Description

The Bachelor of Science in Psychology program is designed to provide students with strong expertise in the concepts, principles, and applications of general psychology. The program lays the foundation for a broad base of knowledge with general education courses in a variety of subject areas. In addition, specialty courses such as Biological Psychology, Cognitive Psychology, Learning Theories, Psychology of Personality, Abnormal Psychology, and Industrial/Organizational Psychology focus on providing students with the enhanced communication, collaboration, and reasoning skills that result from a deeper knowledge and understanding of the field of Psychology.

Program Objectives

1. Demonstrate an understanding of psychology, including biology and behavior, psychopharmacology, and relationships between the environment and behavior
2. Summarize research and apply trends in social psychology, organizational/industrial psychology, multicultural psychology, and abnormal psychology
3. Discuss the major issues in human relations, the science of emotion, and the factors that shape personality
4. Outline the phases of psychological research, including the process of hypothesis testing and the limitations of statistical results in psychological studies
5. Describe how information flows through the cognitive system and how observational learning and operant conditioning can interact to determine an individual's behavior
6. Illustrate the influence of psychological theories, including how social, economic, and political forces have influenced the development of psychology throughout history
7. Demonstrate proficiency with English composition, and apply fundamental processes, theories, and methods to business communication in the workplace
8. Demonstrate a foundation of computer and information systems knowledge, technical skills, and a basic understanding of computer applications
9. Identify and apply fundamental math concepts for operations and problem solving and apply basic statistical concepts and tools in order to correctly interpret the results of statistical analyses

Course Descriptions

Undergraduate Course Listing and Descriptions

(Listed alphanumerically by course code)

A01 Introduction to Accounting
Introduction to Accounting introduces basic concepts of accounting using a balance of theory and practice. Topics covered include double entry bookkeeping, the accounting cycle for service and merchandising enterprises, notes and interest, bad debts, merchandise inventory, and accounting for fixed assets.
Credit Hours: 3

A02 Principles of Accounting I
Principles of Accounting I introduces basic concepts of accounting using a balance of theory and practice. Topics covered include current liabilities and payroll, sales, and cash receipts, purchases and cash payments, merchandising operations, bad debts, receivables, merchandise inventory, plant assets, and intangibles.
Credit Hours: 3

A03 Principles of Accounting II
Principles of Accounting II expands on what the student learned in Accounting I. It focuses on corporate accounting. This course discusses how corporations are structured and formed, with an emphasis on corporate characteristics. Stocks, bonds, notes, purchase investments, and analysis of financial statements are included, as well as an in-depth look at managerial accounting.
Statements of cash flow, budgets, and budget management are also examined.
Credit Hours: 3

A04 Intermediate Accounting I
This course expands upon concepts learned in Principles of Accounting by presenting the accounting for complex transactions in a business environment. Students learn how to analyze these transactions, think critically about financial instruments and their role in business, and report on all of these complexities according to generally accepted accounting principles. In Intermediate I, the student should begin to see the relationship between the various introductory accounting, finance, and economic concepts they have learned in previous courses.
Credit Hours: 3

A05 Accounting Spreadsheet Fundamentals
This course teaches students how to use spreadsheet software (Microsoft Excel) to record a variety of business transactions, analyze the financial data of a business and prepare its financial reports. Students learn how to enter and edit spreadsheet data, work with spreadsheet formulas, formats, and functions, incorporate charts, and use model-building techniques.
Credit Hours: 3

A06 Intermediate Accounting II
This course complements Intermediate Accounting I by continuing the professional-level accounting topics in financial reporting and analysis. Students examine the complex transactions present in the global economy and explore how these transactions affect a company's financial statements. Also

discussed is the effect of regulations that vary by jurisdiction on the outcome of financial reporting and learn to critically evaluate this reporting.
Credit Hours: 3

AN310 Cultural Anthropology
This course is an introduction to the foundations of cultural anthropology. It examines how these foundations apply to interactions between culture, technology, and social organizations. This course examines how people behave within the context of individual culture and social structures, and how people forge solutions to issues such as resource distribution, ethics and morality, family structures, and politics. This course also studies the unique impact of technological advancement on society and culture and evaluates both the costs and benefits that various aspects of technology carry for society.
Credit Hours: 3

AR300 Art History
This course is an entry-level survey of Art History. Students examine the visual arts, including painting, sculpture, printmaking, photography, and architecture, from prehistory to the present. While emphasis is placed on the arts of Europe and the United States, those of Latin America, Africa, and Asia are also discussed. The course begins with Primitive Cave Paintings from Lascaux, France, and progresses to 20th- century art from around the world. The course offers students an introduction to the elements of art and provides an opportunity to practice these techniques. Through readings and visual examination of art, students gain a better understanding of art and the impetus for artistic creation.
Credit Hours: 3

B01 Introduction to Construction
This course reviews the processes, players, and practices in the construction industry. The history of construction; owners, the design team, and the contracting team; the sequence of a project; and communications and documentation in construction are also discussed.
Credit Hours: 3

B02 Construction Materials and Methods
This is an introduction to the materials and methods used in constructing commercial buildings. Topics covered include foundations, using wood in construction, exterior and interior finishes, brick masonry, stone and concrete masonry, masonry load-bearing wall construction, steel frame construction, site-cast and precast concrete framing systems, roofing, glass, windows and doors, cladding systems, interior walls and partitions, ceilings, and floors.
Credit Hours: 3

B03 Drawings Specifications
This is an introduction to reading construction blueprints. Topics include lines of construction, scales, types of surveys, off-site and site improvements, foundations and below-grade construction, the structure above grade, plumbing, mechanical, electrical, commercial blueprints, construction offices, manufacturing facilities, and warehouses.
Credit Hours: 3

B04 Safety Planning and Administration
This is an introduction to the role of safety in the construction industry. Topics include the cost and causes of accidents, ethics and safety, workers' compensation, OSHA compliance, safety and health programs and policies, job safety and hazard analysis, accident reporting and record keeping,

emergency response plans, total safety management, workplace violence, blood-borne pathogens, workplace stress, environmental safety, and ISO 14000.
Credit Hours: 3

B05 Construction Surveying Fundamentals
This course introduces the use of surveys in commercial, residential, and road construction. Topics include fundamentals of surveying, distance measurement, leveling, angles and theodolites, total stations, traverse surveys and computations, geomatics, global positioning systems, control surveys, highway curves, highway construction surveys, municipal street surveys, pipeline and tunnel surveys, culvert and bridge surveys, building construction surveys, and quantity and final surveys.
Credit Hours: 3

B06 Cost Estimating
This is an introduction to the process of estimating the full cost of construction projects. Topics include contracts, bonds, insurance, specifications, overhead and contingencies, labor, equipment, excavation, concrete, masonry, metals, wood, thermal and moisture protection, doors and windows, finishes, electrical, plumbing, heating, ventilating, air conditioning, profit, and other estimating methods.
Credit Hours: 3

B07 Project Scheduling
This course introduces planning and scheduling a construction project. The course introduces Gantt charts, basic networks, the critical path method, precedence networks, resource allocation and leveling, schedule updating and project control, schedule compression, reports and presentations, and construction delay claims.
Credit Hours: 3

B08 Construction Management
This course discusses managing a construction project which provides in-depth coverage of project delivery systems, responsibility and authority, resident project representative's office responsibilities, records and reports, electronic project administration, specifications and drawings, teamwork, and communication. Also reviewed is construction law and labor relations, construction safety, meetings and negotiations, risk allocation and liability sharing, preconstruction operations, planning for construction, scheduling, construction operations, value engineering, measurement and payment, materials, and workmanship, change orders and extra work, claims and disputes, and project closeout.
Credit Hours: 3

BM350 Marketing Management
Marketing Management reviews the bedrock principles and theories of marketing, including strategic planning, marketing research, the marketing mix, building brands, and communicating value. Specialized fields such as service marketing and business marketing are presented. Credit Hours: 3

BM380 Marketing Research
Marketing Research explores the significance of marketing research to the field of marketing. It explains how marketing research answers a variety of questions to facilitate effective decision- making. In this course, students learn the process of marketing research to better understand when marketing research is used by marketers to make better, more informed decisions to satisfy customer needs. This course introduces its purposes, processes, and all of its elements. It also emphasizes the

interrelationships between the elements because decisions made at one stage in the process have important consequences at other stages.
Credit Hours: 3

BM410 Sales Management and Practices
The Sales Management and Practices course provides an analysis of professional selling practices with emphasis on the selling process and sales management, including the development of territories, determining potentials and forecasts, and setting quotas. Included is a discussion of sales ethics, legal regulations that affect the sales environment, and how a sales manager can model ethical behavior effectively within the sales force.
Credit Hours: 3

BM440 Internet Marketing
The course begins with an overview of e-business, e-commerce and e-marketing, a review of traditional marketing practices, and a history of the Internet and the World Wide Web. The course then examines electronic resources and their strategic and tactical uses, the tools and software available for electronic marketing, consumer behavior online, social media, integrated marketing communications, and the use of knowledge management metrics. The concepts of product and price in an online environment are discussed, as well as using the Internet as a distribution channel. The course concludes with a detailed exploration of Customer Relationship Management (CRM), providing an overview of the purpose and process of building a company's relationship capital through CRM.
Credit Hours: 3

BU310 Fundamentals of Management
Fundamentals of Management is designed to help students understand the major functions of management (planning, organizing, leading, and controlling) and the significance of each function in relationship to the existence of the company. This course describes how companies use management to set and accomplish goals through individuals, groups, and other types of resources. It also analyzes communication and ethics in the organization. Other topics include decision making, change, employee development, organizational structures, management control, leadership, conflict resolution, information security, and globalization.
Credit Hours: 3

BU320 Marketing Principles
This course is designed to engage the student in the fundamentals of marketing, including explanation of rudimentary concepts, description of market selection, analysis of various marketing and management strategies, and integration of the marketing mix. Students will focus on concepts that teach them how to create value in a product or service for their customers and build relationships with customers for the purposes of retention and maximization of marketing growth. In addition, students learn what is important to consumers and consider the different environments in which they must operate.
Credit Hours: 3

BU330 Accounting for Managers
The primary focus of this course is to show how successful managers use the tools and techniques of managerial accounting to make decisions about both day-to-day operations and long-term tactics and strategies. The course explores a range of innovative systems that managers in our value-centered

economy use to investigate a variety of business issues related to product quality, customer service, and long-term relationships.
Credit Hours: 3

BU340 Managerial Finance I
Financial management integrates concepts from economics, accounting, management, and other business disciplines to forge a sound basis on which the firm can predict risk, return, and cash flows for operating and strategic decisions. This enables financial managers to manage the firm's resources and maximize return to the firm's shareholders, a central goal of most corporations. Topics include financial management, the time value of money, interest, stocks, and bonds. Credit Hours: 3

BU350 Organizational Behavior
This course is designed to provide students with an opportunity to explore the behavior of individuals, groups, and organizations within today's dynamic work environment. Specific topics include communications, motivations, leadership, power structure, and organizational culture. Credit Hours: 3

BU360 Social Impact of Business
In this course students examine broad social, ethical, and technological themes and trends that affect business operation. Some of the broad effects and implications of business-society interactions relating to public issues, ethics and social responsibility, and the process of globalization are explored. The course also examines issues of technology, development, the environment, culture, and diversity.
Credit Hours: 3

BU440 Managerial Finance II
This second course in the financial management sequence applies the concepts and tools learned in Managerial Finance I to specific decisions that must be made concerning financing the firm's long- and short-term assets. In this course, students learn how to apply specific models to capital structure and policy, tactical financing decisions, working capital management, and how entrepreneurs and firms raise funds for growth and development.
Credit Hours: 3

BU450 Leadership Skills
This course explores the leadership skills required in business, government, and society by looking at the relentless change and escalating uncertainties that define our times. Leadership has little to do with title or position; it is a way of acting that involves the influence of people to inspire change toward a mutually desired outcome. The courses address how effective leaders embrace the inevitability of constant change and diversity and use their interpersonal skills to promote change, communicate vision, provide a sense of direction, and inspire employees. Credit Hours: 3

BU460 Electronic Commerce
E-commerce explains how businesses operate over the Internet, the Web, and on mobile applications. This course offers students an opportunity to learn about the countless platforms, interfaces, and services available to them, as well as society, through E-commerce. With this rapidly expanding market, this course presents the basics of E-commerce and its impact on everyday life.
Credit Hours: 3

BU470 Strategic Management
In this course, students explore the strategic management process and learn to assess industry attractiveness and the competitive environment. Skills are developed in matching firm capabilities with opportunities, building competitive advantages, and responding to shifts in the comparative advantage. Further, the course discusses corporate strategy, global strategy, and strategy for the small-business and not-for-profit (NFP) sectors. Finally, students learn how to design organizations for advantage, organize for and sustain advantage, as well as how to instill long- term value through corporate governance.
Credit Hours: 3

BU480 e-Business Strategy
This course addresses the new technological environment that marketers are facing by exploring strategic considerations related to technology and technology implementation. The course also examines the basics of the marketing exchange by utilizing the information highway, multimedia techniques, database marketing, interactive telecommunications, and other e- business techniques.
Credit Hours: 3

BU490 Business Ethics
In this course, students are given the opportunity to examine Business Ethics from a stakeholder perspective, discussing the application of various ethical approaches to decision making. Among these perspectives is the notion of justice and fairness; utilitarianism as a consequentialist approach; and the role of personal relationships in an "ethic of care." The course examines internal ethical business practices, investigating the moral responsibilities of various functional areas within the organization. Through examining corporate responsibility, the course also looks at the topics of environmental responsibility, global ethics, advertising ethics, and the responsibility of business as it relates to the natural environment.
Credit Hours: 3

BZ380 Management Information Systems
This course focuses on understanding information systems that today's managers use to make decisions and analyze production and performance in a business environment. Students learn to identify the challenges facing firms today, understand the technologies that help them meet these challenges, design business processes to take advantage of the technologies, and describe management procedures and policies to implement the required changes. The course explains the role of information systems concerning project and global management.
Credit Hours: 3

BZ400 Strategic Information Technology
This course helps improve decision-making in regard to technology. Students learn to identify major technologies that can increase competitive advantage and how to avoid some of the implementation traps that can lead to failed projects with careful planning. Students are taught how to diagnose choice technologies, organize their thinking about technology in helpful ways, and then analyze them in ways to help make technology a valuable strategic differentiator.
Students discuss how laws such as Sarbanes-Oxley are forcing organizations to align business processes with technology.
Credit Hours: 3

BZ420 Human Resources Management
This course is designed to familiarize students with the basic principles of human resources management. The course begins with an overview and legal aspects. Work analysis and workforce planning, recruiting, staffing, training, and performance management are also evaluated. This foundation is used to synthesize how the human resources professional manages careers, compensation, labor relations, safety and health of employees, and discipline and procedural justice. The course concludes by evaluating related concepts in a global context.
Credit Hours: 3

BZ440 Quality Control
This course is a study of quality management processes from teams to organization-wide systems and the behavioral and analytical tools that support fully integrated quality management. Emphasis is given to the commitment of management and the organization to make the cultural changes necessary to implement quality improvements through the organization to ensure long-term competitiveness.
Credit Hours: 3

BZ450 Being an Entrepreneur
This course provides a strong foundation in the theory, process, and practice of entrepreneurship, including gaining a better understanding of planning, organizing, executing, and risk-taking. Students explore the history of entrepreneurship, the challenges of new venture startups, the factors that typically underlie new venture success, and the emerging use of Internet marketing for entrepreneurial firms. Students further learn the most common approaches entrepreneurs use to implement a strategic plan and the transition that occurs in the movement from an entrepreneurial style to a management style. Students should leave this course with the necessary knowledge to participate in, or independently begin, an entrepreneurial venture.
Credit Hours:3

BZ460 Project Management
In this course, students first learn about project management, including the project manager's responsibility to the project. Topics discussed include the role of the project manager in managing the project life cycle, including defining tasks, scheduling, allocating resources, monitoring, and controlling. Tools, techniques, and tips for project management are presented. Once this is accomplished, students delve into the detailed requirements of project planning.
Credit Hours: 3

BZ480 International Management
This course deals with the issues affecting multinational corporation managers in a global business environment. Its primary focus is on understanding, respecting, and working within the parameters of a variety of cultures affecting the outcomes of all dimensions of business and management operations. These dimensions include, but are not limited to, business communication and negotiation, management decision making and strategy formulation and implementation, organizational structure and control, staffing, training, and compensation for global operations, and motivation and leadership from a multinational, multicultural set of perspectives.
Credit Hours: 3

C01 Introduction to Business
This course identifies concepts, principles, and operations of the private enterprise system. Students compare and contrast sole proprietorships, partnerships, and corporations, and they learn the

advantages and disadvantages of each. This course also discusses the functions of modern business management, marketing, and ethics, and social responsibility. Human resource management and employee motivation are described. Bookkeeping, accounting, financial management, and financial statements are also examined.
Credit Hours: 3

C02 Business English
This course examines the fundamental processes, theories, and methods that can enhance and improve the overall writing initiative. Students examine the process of prewriting, drafting, editing, and revising various types of content, including sentences, paragraphs, and business documents and review standard English grammar, punctuation, and style. They gain information on how to structure negative, positive, persuasive, and informational writing as well as how to design document layouts. Students also learn the business practices of writing application letters, resumes, and interview follow-up letters. All of these skills provide them with the tools necessary
for writing in today's business environment.
Credit Hours: 3

C04 Introduction to Psychology
Introduction to Psychology provides a general survey of psychology, including the relationship between biology and behavior. Other topics introduced in the course include learning, memory, cognition and language, intelligence, motivation and emotion, gender and sexuality, psychological disorders and their treatments, and research methods.
Credit Hours: 3

C05 Business Communication
Business Communication is a practical course that examines principles of communication in the workplace. It introduces common formats, such as the memo, letter, and report. Students review their writing skills to gain greater mastery of grammar, mechanics, and style. More importantly, it introduces students to the strategies successful business professionals employ for a variety of situations. Techniques for writing informational, persuasive, sales, employment, good news, and bad news communications are discussed. Students learn information on internal and external communication situations and practice audience analysis and gain information on the technological tools available to business communicators today. Students are introduced to the exciting communication possibilities offered by personal computers, cell phones, videoconferencing, desktop publishing, and other cutting-edge technology.
Credit Hours: 3

C06 Business Ethics
Business Ethics provides an introduction to business ethics. Part philosophy and part business, the course covers a wide array of ethical issues arising in contemporary business life. Major theoretical perspectives and concepts are presented, including ethical relativism, utilitarianism, and deontology. The lessons explore employee issues and responsibilities, leadership and decision making, morality, diversity, discrimination, and ethics in marketing and advertising. Corporate social responsibility is also examined, as are the topics of environmental responsibilities, global ethics, and regulation concerns in an era of increasing globalization.
Credit Hours: 3

C07 Personal Finance
Personal Finance equips students to understand, plan, and manage financial affairs. It focuses on the development of practical methods of organizing financial information, interpreting personal financial position and cash flow, developing achievable and worthwhile goals, and implementing actionable plans and risk management techniques to meet those goals. Specific topics covered include money management, insurance, and investing.
Credit Hours: 3

C08 American Government
In this course, you'll explore how the founders formed the government, how it's structured, and how it operates. You'll consider how civil liberties and civil rights are affected by federalism. You'll examine the three branches of government that comprise the system of checks and balances —legislative, executive, and judicial. You'll also learn about the political system of parties and interest groups and how they influence public opinion and participate in the government. You'll find that although the Constitution, in principle, grants certain rights and liberties to the people, many groups still need to be allowed those rights in practice and have had to fight for them. The nature of the US government means that the people have a voice and that the Constitution is a living document because it can be adapted and amended to change with the times.
Credit Hours: 3

C09 Principles of Finance
Principles of Finance offers a broad overview of corporate finance, including the goals of financial management. Students examine how the information contained in financial statements is used in analysis and forecasting. The topic of valuation is introduced, with a focus on valuing stocks and bonds. Students review the financial manager's role in estimating risk and return, computing cost of capital, evaluating capital structure policies, making investment decisions, and raising capital. Other topics include financial securities and derivatives, long-term and short-term planning, and innovations in corporate finance.
Credit Hours: 3

C10 Introduction to Computers
Introduction to Computers provides students with foundational skills and knowledge needed for today's technology-based careers. Students learn the components of systems—from the CPU and memory to input devices and peripherals—and how these components interact with an operating system to perform critical tasks. Keeping current with fast-changing computer technologies, this course discusses the computer technologies today that are allowing the creation of a virtualized mobile workforce. It explores how computers connect to the Internet, what services can be found online, and what dangers exist in the form of viruses, Trojans, and other malware. The course also familiarizes the student with the basics of today's office productivity applications and help establish a foundation for working with these applications, including spreadsheets, word processors, and presentation-creation tools.
Credit Hours: 3

C11 Macroeconomics
This course will cover the topic of macroeconomics, which is the study of the economy as a whole. It analyzes economy-wide phenomena, including inflation, unemployment, and trade deficits.

Macroeconomic information shows up daily in news articles and broadcasts because its implications are important to the quality of our lives. For instance, why is income high in some countries and very low in others? Why do production and employment expand in some years and contract in others? These questions and many others can be addressed by macroeconomic analysis. Studying macroeconomics can help you better understand how the condition of the overall economy affects us all. You often hear about things like average prices rising at a particular rate (inflation) and the imbalance of trade between the United States and the rest of the world (the trade deficit). This information and several other statistics are compiled and monitored by the economists who study the macro economy.
Credit Hours: 3

C12 Business Law
Business Law is designed to familiarize students with various kinds of laws, key elements of the American Constitution, and the concepts of the various schools of jurisprudence. Ethics, values, morality, law, and the various ethical theories are compared and contrasted, and the need for promoting corporate social responsibility is discussed. The elements of tort law, the basic elements of a contract, the sources of laws governing contracts, and the conditions for an offer to be valid are examined. Topics include reality of consent, capacity of minors, consequences of illegal agreements, assignment of rights, transfer of title, and the rights of third parties. Delivery of goods, right to inspection, acceptance and revocation of contract, the remedies available to buyers and sellers, and the nature of property are also discussed.
Credit Hours: 3

C13 Microeconomics
This course will provide a survey of the economic behavior on an individual human and business level. You'll learn the basic concepts of the economic perspective needed to work with the principles of economics. In addition to the basic concepts of supply and demand, market structures, consumer behavior, government regulation, resource markets and modern issues in microeconomics will be explored in this course.
Credit Hours: 3

C14 Income Tax Fundamentals
Income Tax Fundamentals introduces the basic concept and calculation of Federal income tax and explains the forms for filing federal income taxes. Much of the lesson is devoted to the Form 1040 Individual Income Tax filing return and its accompanying schedules. Students learn how to calculate adjusted gross income, how and when to itemize deductions, how to treat capital gains, business income, and passive income, and how to calculate certain tax credits. Students are also introduced to payroll taxes, partnership taxation, and corporate taxation–though each of these topics could be an entire course on its own.
Credit Hours: 3

C15 Principles of Management
Principles of Management is designed to help students understand the major functions of management (planning, organizing, leading, and controlling) and the significance of each function in relationship to the existence of the company. This course describes how companies use management to set and accomplish goals through individuals, groups, and other types of resources. It also analyzes communication and ethics in the organization. Other topics include decision-making, change, employee development, organizational structures, management control, leadership, conflict resolution, information security, and globalization.
Credit Hours: 3

C16 Principles of Marketing
This course covers the principles of marketing. Topics covered include assessing, analyzing, understanding, and targeting the marketplace as well as the creation, capture, delivery, and communication of value. Students will learn how to develop a marketing plan; use social and mobile marketing effectively; integrate ethics into marketing strategies; influence the consumer decision process; perform market research; perform SWOT and STP analyses; make decisions concerning branding, packaging, and developing new products; price products and services fairly; set advertising objectives; and more.
Credit Hours: 3

C17 College Mathematics
College Mathematics focuses on the fundamental math concepts through the use of real-world scenarios and step-by-step instruction. Students perform operations and problem-solving with whole numbers, fractions, percentages, and decimals. Units of time, weight, capacity, length, and mass are applied to mathematical calculations, and basic geometric shapes are categorized. Statistical values for mean, median, mode, and standard deviation are determined, and basic statistical graphs are created. Other topics include ratios, proportions, U.S. Standard and Metric
units of measure, algebraic expressions, and equations.
Credit Hours: 3

CJ310 Introduction to Criminal Justice
Introduction to Criminal Justice examines the past, present, and future of the American criminal justice system. Topics discussed include how laws are created: the history and types of law enforcement; structure of the court system; and the changing philosophies of the American correctional system. Students also examine the role of legal precedent, the death penalty, prison life, and the juvenile justice system.
Credit Hours: 3

CJ320 American Constitutional Law
This course is designed to introduce students to the underlying political structure of the American judiciary and to explore the political and legal foundations for constitutional law in the American political system. This course is based on the premise that judges are political actors and courts are political institutions; both are integrally connected with other branches of American government, and federal and state governmental relationships are key because our system is based on the “rule of law.”
Credit Hours: 3

CJ330 Criminal Law and Procedure
This course introduces students to the legal foundations and limitations of criminal law and criminal procedure. The elements of criminal liability, including complicity and vicarious liability, are reviewed. Categories of crimes are discussed, along with the defenses to criminal liability. Once these categories and concepts are discussed, we focus on criminal procedure as it relates to search and seizure, interrogation, identification, pretrial, charging and pleading, trial, sentencing, and appeal.
Credit Hours: 3

CJ340 Criminology
This course is an examination of classic theories and current developments in theory, research, and policy with regard to such issues as mass and serial murder, hate crimes, drugs and crime, career criminality, terrorism, and new forms of organized and white-collar crime.
Credit Hours: 3

CJ350 Judicial Process
This course explores the structures of both federal and state criminal courts. The roles and duties of key players are examined, as well as the constitutional rights of defendants. The history of juries and development of criminal law are explored as well. The entire trial process, including pretrial procedures, plea bargains, appeals, and differential treatment of offenders are studied in depth.
Credit Hours: 3

CJ360 Criminal Investigation
In this course, students thoroughly examine the investigation process and situations in which police officers apply specific investigative and information-gathering techniques to meet the evidentiary requirements of specific crimes.
Credit Hours: 3

CJ370 Correctional Practice and Policy
This course is a comprehensive study of the context, practices, and special interests of corrections. Topics include the early history and current trends of correctional thought and practice, jails and other short-term facilities, intermediate sanctions, the prison experience, women in prison, institutional management, educational/treatment programs, prisoners' rights, and race/ethnicity challenges.
Credit Hours: 3

CJ380 Probation and Parole
This course examines the theory and practice of probation and parole, including presentence investigation, supervision of probationers, parole administration and services, treatment theory, parole officers, juvenile services, and new concepts (such as community-based corrections, the justice model, and determinate sentencing) that have impacted traditional probation and parole theory.
Credit Hours: 3

CJ390 Victimology
This course explores the concept of victimology, its history, and evolving role in the criminal justice system. The roles and duties of victims' advocates and victims' services providers are also examined. Victims' rights, restitution, hate crimes, intimate partner violence, abuse and sexual victimization of children, special victim populations, and victimology at the international level are studied in depth.
Credit Hours: 3

CJ400 Ethics in the Justice System
This is an examination of a wide range of ethical issues in policing, the practice of law, sentencing, corrections, criminal justice research, and crime control policy. Course discussion includes the utilitarian and deontological approaches to criminal justice ethics, morality of the death penalty, privatization of corrections, and the myths that influence public opinion toward crime and crime control.
Credit Hours: 3

CJ410 Leadership in Law Enforcement
This course takes a close look at the structures, leadership, and behaviors found in a typical police agency. Lessons devoted to human resource management and on-the-job stress include a discussion of Employee Assistance Programs (EAPs). This course also examines the impact that severe budget cutbacks and a culture of violence have had on law enforcement agencies across the nation. Legal issues are highlighted throughout the course.
Credit Hours: 3

CJ420 Juveniles in the Justice System
This course presents the structures, procedures, and philosophies of juvenile justice agencies in the United States. The course compares juvenile court to adult court and includes a discussion of seminal U.S. Supreme Court cases that address juvenile offenders. Important issues, debates, and the challenges facing juvenile justice agencies are also covered.
Credit Hours: 3

CJ430 Police and Community Relations
This course provides a study of proactive community-oriented policing and problem solving (COPPS) in the context of changes in police departments and communities. Emphasis is placed on the evolution of community policing, the relationship of the police and the community in the community policing philosophy, the implementation of COPPS in a culturally diverse society, the impact of various types of crimes on policing approaches, and methods of evaluating COPPS initiatives.
Credit Hours: 3

CJ440 White Collar Crime
This course is designed to introduce students to an examination of white-collar crime. This includes a review of the forms, causes and consequences, relevant social scientific theories, and the mechanics of this type of crime. How the schemes work, who perpetrates them, and the relationship to the environment in which they are perpetrated are also reviewed. This includes a closer look at consumer fraud, unsafe products, environmental crime, and institutional corruption, including religious-affinity fraud, securities fraud, corporate fraud, fiduciary fraud, crimes by the government, corruption, healthcare fraud, and computer-related crime.
Credit Hours: 3

CJ450 Private Security
This is an examination of private security from a historical and philosophical perspective. Topics include the evolution of private security, basic security goals and responsibilities, investigation, deterrence theory, loss prevention through risk management, how to recruit, select, and train security personnel for an organization, and current challenges facing the security profession. This course examines private security. It explores in depth the history of security, civil and criminal law, and the changes that have occurred in homeland security and the policing landscape of the U.S. since the events of 9/11.

Terrorism and cybercrimes are covered in detail. Retail security concerns and the ongoing threat of workplace violence are studied. Throughout, job opportunities for security professionals are addressed.
Credit Hours: 3

E01 Careers in Early Childhood Education
The foundations of early childhood education, current trends, and the importance of educating young children from birth to age eight are discussed. Students learn how to meet the needs of every child in every area of development, background, and ability.
Credit Hours: 3

E02 Child Development
This course examines childhood development by observing physical and psychosocial factors that lead to cognitive, language, and literacy development according to a child's age.
Credit Hours: 3

E03 Curriculum Development
This course focuses on the purpose of curriculum, the elements to consider when developing curriculum, and how to meet the needs of all children in the classroom.
Credit Hours: 3

E04 Guidance and Discipline
This course delves into discipline, its foundations, philosophies, and approaches. Reasons behind a child's behavior are presented. Students explore why a "one-size-fits-all" approach is rarely effective in the classroom.
Credit Hours: 3

E05 Children's Literature
Literature is a core component of an early childhood curriculum. This course teaches students how to evaluate appropriate resources and how to use these resources in a classroom to meet specific educational objectives.
Credit Hours: 3

E06 Creative Expression and Play
Play is a core component of an early childhood curriculum. This course reinforces the importance of play and teaches students how to integrate play into the art, music, movement, and drama curricula. This course also analyzes the connection between play and creativity and demonstrates techniques for fostering creativity.
Credit Hours: 3

E07 Art and Creative Development
This course teaches the student the importance of art and creativity in developing the whole child. Students understand the child's artistic development and how to provide developmentally- appropriate art experiences through a variety of sources. Students learn research-based practices to create a complete early childhood art program.
Credit Hours: 3

E08 Health, Safety, and Nutrition
Students learn how the topics of health, safety, and nutrition are interrelated, how to assess children's health, how to plan for safety and attend to children's injuries, and how to foster nutritious eating habits.
Credit Hours: 3

E09 Home, School, and Community
This course is an introduction to the partnerships between the child, family, and community that must be created in order to achieve the best results for children in the classroom and society. Among the topics covered are the challenges to creating partnerships with families, relationship- building with the parents and children, and the community's role in socializing the child. Credit Hours: 3

E10 Exceptional Children
In today's classroom there is an array of children with many different needs and abilities. It is important for teachers to be prepared to meet each child's individual needs while making each child feel like a vital part of the learning community. This course is an introduction to the special needs of children with developmental disabilities, and how to implement programs that include these children in an early childhood classroom. Inclusion is not only beneficial for the child with special needs; it is beneficial for all the children in the classroom as they develop a sense of community and an acceptance of diversity.
Credit Hours: 3

E11 Movement and Music
Young children explore the world around them and learn about themselves essentially by moving about and using their senses. Movement is a key component of all children's development. Thus, movement is an essential part of an early childhood curriculum. Children also love music, and rhythm is directly related to movement, making it an essential part of an early childhood curriculum as well. This is a broad-based course in physical education for children, which emphasizes the development of fundamental motor skills through child-centered activities that often involve the use of music.
Credit Hours: 3

E12 Cultural Diversity
When working with children, it is important to realize that the environment and family a child is growing up in directly affects the way the child thinks, learns, and behaves. This course is a sociological overview of the ways cultural diversity influences children's behavior, communication, and learning styles; it also gives suggestions for teachers in working with children from diverse backgrounds.
Credit Hours: 3

E13 Early Childhood Literacy
Language Arts in the early education classroom covers a variety of topics. The development of a child's listening, speaking, writing, and reading skills is discussed in this course, as well as practical guidelines for setting up a classroom to address all children and meet their developmental needs.
Credit Hours: 3

EC310 Introduction to Early Childhood Education
This course reviews the foundations of early childhood education, current trends, and the importance of educating young children from birth to age eight. Students discuss how to meet the needs of every child in every area of development, background, and ability.
Credit Hours: 3

EC320 Child Development
This course examines childhood development by observing physical and psychosocial factors that lead to cognitive, language, and literacy development according to a child's age.
Credit Hours: 3

EC330 Health, Safety, and Nutrition
Students learn how the topics of health, safety, and nutrition are interrelated, how to assess children's health, how to plan for safety and attend to children's injuries, and how to foster nutritious eating habits.
Credit Hours: 3

EC340 Guidance and Discipline
This course delves into discipline, its foundations, philosophies, and approaches. Reasons behind a child's behavior are presented. Students explore why a "one size fits all" approach is rarely effective in the classroom.
Credit Hours: 3

EC350 Creative Expression and Play
Play is a core component of an early childhood curriculum. This course reinforces the importance of play and teaches students how to integrate play into the art, music, movement, and drama curricula. This course also analyzes the connection between play and creativity and demonstrates techniques for fostering creativity.
Credit Hours: 3

EC360 Movement and Music
Young children explore the world around them and learn about themselves essentially by moving about and using their senses. Movement is a key component of all children's development. Thus, movement is an essential part of an early childhood curriculum. Children also love music, and rhythm is directly related to movement, making it an essential part of an early childhood curriculum as well. This is a broad-based course in physical education for children, which emphasizes the development of fundamental motor skills through child-centered activities that
often involve the use of music.
Credit Hours: 3

EC370 Early Childhood Literacy
Language Arts in the early education classroom covers a variety of topics. The development of a child's listening, speaking, writing, and reading skills is discussed in this course, as well as practical guidelines for setting up a classroom to address all children and meet their developmental needs.
Credit Hours: 3

EC380 Art and Creative Development
This course teaches the student the importance of art and creativity in developing the whole child. Students learn the child's artistic development and how to provide developmentally appropriate art experiences through a variety of sources. Students review research-based practices to create a complete early childhood art program.
Credit Hours: 3

EC390 Children's Literature
Literature is a core component of an early childhood curriculum because learning to read and write are fundamental skills that young children explore in a classroom setting. Children's literature may also be used to enrich math, science, and social studies curricula, with a focus on character and social development. This course teaches students how to evaluate appropriate resources and how to use these resources in a classroom to meet specific educational objectives. Literature is a core component of an early childhood curriculum. This course teaches students how to evaluate appropriate resources and how to use these resources in a classroom to meet specific educational objectives.
Credit Hours: 3

EC400 Early Childhood Math and Science
This course focuses on incorporating the fundamental concepts of math and science into education programs for young children. It provides strategies for teaching children how to apply these concepts in problem-solving and scientific investigation.
Credit Hours: 3

EC410 Cultural Diversity
When working with children, it is important to realize that the environment and family a child is growing up in directly affects the way the child thinks, learns, and behaves. This course is a sociological overview of the way's cultural diversity influences children's behavior, communication, and learning styles; it also gives suggestions for teachers in working with children from diverse backgrounds.
Credit Hours: 3

EC420 Exceptional Children
In today's classroom there is an array of children with many different needs and abilities. It is important for teachers to be prepared to meet each child's individual needs while making each child feel like a vital part of the learning community. This course is an introduction to the special needs of children with developmental disabilities, and how to implement programs that include these children in an early childhood classroom. Inclusion is not only beneficial for the child with special needs, it is beneficial for all the children in the classroom as they develop a sense of community and an acceptance of diversity.
Credit Hours: 3

EC430 Curriculum Development
This course focuses on the purpose of curriculum, the elements to consider when developing curriculum, and how to meet the needs of all children in the classroom.
Credit Hours: 3

EC440 Creating Learning Environments
This course is designed to help students explore early childhood environments and curriculum that enhances the learning and development of young children. It focuses on creating healthy, safe, and emotionally supportive environments that facilitate and promote learning in a variety of areas – literacy, math, science, art, music, play, etc.
Credit Hours: 3

EC450 Home, School, and Community
This course is an introduction to the partnerships between the child, family, and community that must be created in order to achieve the best results for children in the classroom and society. Among the

topics covered are the challenges to creating partnerships with families, relationship- building with the parents and children, and the community's role in socializing the child.
Credit Hours: 3

EN120 English Composition I
This course begins with an overview of the writing process and prewriting techniques and then progresses to discuss different types of paragraphs, including illustration, narration, description, process, definition, comparison, contrast, classification, cause/effect, and persuasion. Students explore ways to organize paragraphs and understand the use of coherence, transitions, consistency, parallel structure, and sentence variety.
Credit Hours: 3

EN130 English Composition II
This course is a continuation of English Composition I. It begins by offering tips on college writing, active reading, and study strategies at the college level. Students explore the framework for drafting a college essay, including elaborated explorations for finding a topic, assessing an audience, and determining the purpose of an essay as students identify their essay's thesis and craft a thesis statement. Students are introduced to strategies for finding and using sources. The balance of this course is devoted to the specifics of reading, analyzing, and writing college-level essays, including description, narration, illustration, process analysis, comparison and contrast, classification and division, definition, cause and effect, argument, and business applications.
Credit Hours: 3

EN360 Technical Communication
This course examines the process of technical communication with an emphasis on preparing professional communications such as correspondence, proposals, reports, instructions, and manuals. Topics include audience and workplace analysis, the research and writing processes, ensuring usability, and visual forms.
Credit Hours: 3

F01 Money and Banking
This course focuses on the economics of money, banking, and financial markets. Detailed explanations of money, interest rates, and financial hazards explain how this medium of exchange changes value with economic fluctuations. The banking industry, including the Federal Reserve System, and national and international monetary policy, and monetary theory, are also a focus of this course. Students learn how money, its policies, and its uses affect their short-term and long- term spending and saving.
Credit Hours: 3

F02 Financial Institutions and Markets
In this course, students take a detailed look at the various types of organizations that make up the financial industry and the markets within which these organizations operate. Complete coverage of Federal Reserve monetary policy, bonds and interest rate risk, money markets, mortgage markets, equity markets, derivatives markets, international markets, commercial banking, international banking, thrift institutions, finance companies, insurance companies, pension funds, investment banking, venture capital, investment companies, and hedge funds. Credit Hours: 3

F03 Financial Statement Analysis
In this course, students are introduced to three major financial statements: the balance sheet, the income statement, and the statement of cash flows. Each statement presented facilitates an understanding of the source of the statement's financial information and information concerning the applicability and analysis of its financial information. An emphasis on both accounting and finance is included to present guidelines and commonly accepted practices.
Credit Hours: 3

F04 Investments
This course offers students an in-depth coverage of investment alternatives, securities markets, risk/return tradeoffs, portfolio theory and selection, and asset pricing models. Common stock valuation and analysis, economy/market analysis, technical analysis, bond yields and prices, options, futures, portfolio management, and evaluation of investment performance is also presented. Students can expect to apply concepts relating to the world of investing with an emphasis on the art and science of decision making.
Credit Hours: 3

G01 Consumer Buying Behavior
This course is an introduction to the world of consumer behavior, investigating how perceptions, learning, memory, personality, and attitudes all influence purchase decisions and buying behavior. Group dynamics and the influence of culture and subculture on consumer consumption preferences are also addressed.
Credit Hours: 3

G02 Principles of Professional Selling
This course is an introduction to the world of personal selling. Students take a close look at developing customer relationship strategies and product strategies. Strategies for sales presentations, closing the sale, and servicing the sale are also explored. Finally, students review the many facets of sales management.
Credit Hours: 3

G03 Principles of Retailing
Principles of Retailing reviews management of a retail business, with extensive coverage of the types of retailers, marketing and financial strategies, retail locations, human resource management, supply chain management, merchandise management, and store management. Credit Hours: 3

G04 Integrated Marketing Communications
Integrated Marketing Communications covers all methods of promotion. This includes corporate image and brand management, advertising management, advertising design, media selection, promotions, public relations, and an introduction to Internet market and social media.
Credit Hours: 3

G05 Internet Marketing
Internet Marketing provides a focused look at using the Internet as a marketing tool. E-business models, strategic planning, e-marketing research, the Internet consumer, pricing online, customer relationship development and management, and social and regulatory issues, including consumer data privacy and intellectual property, are addressed.
Credit Hours: 3

G06 International Marketing
This course offers complete coverage of the global marketing environment, including social and cultural considerations, political and regulatory issues, global market segmentation and targeting, imports and exports, pricing decisions, global marketing communications, and global product distribution methods.
Credit Hours: 3

GE350 World Geography
This course explores four geographic components specific to each chapter of your text. Environment, Society, and Sustainability focuses on climate, weather patterns, landforms, soil formation, and regional plant and animal ecology. History, Economy, and Territory explores regional history, economic systems, and human-defined territories. Culture and Populations outlines and discusses varying cultural patterns, including regional languages and differing religions in the context of demographic profiles, such as population growth and migration patterns within and across regions. Finally, Future Geographies addresses the fact that specific countries and regions confront challenges that will impact their futures, recognizing and differentiating trends which may or may not be promising as we contemplate humanity's uncertain future.
Credit Hours: 3

H01 Medical Office Management I
This course provides students with an introduction to the administrative activities of a private medical practice, hospital office, or clinic department. Students learn how to schedule appointments, follow OSHA standards and universal precautions, differentiate between government and commercial health insurance programs, maintain patient records, ensure HIPAA compliance, perform billing and coding duties, and follow typical office management procedures.
Credit Hours: 3

H02 Medical Office Management II
This course provides students with an introduction to the clinical competencies required of medical assistants in various healthcare settings. Students learn about infection control, vital signs, physical examinations, medical specialties, life span specialties, minor surgery, and medical emergencies. They also learn about the clinical laboratory, microbiology, urinalysis, phlebotomy, hematology, pulmonary function, physical therapy and rehabilitation, pharmacology, patient education and nutrition, mental health, and career opportunities.
Credit Hours: 3

H03 Medical Terminology
This course familiarizes students with the medical terminology they will encounter in their studies and their career. Lessons are organized based on the systems of the human body.
Credit Hours: 3

H04 Anatomy and Physiology I
This course builds on previously acquired knowledge about the human body to provide students with a clear understanding of how each system works and how the systems work together. As a foundation, the student is introduced to the chemistry of the human body, an analysis of the structure and function of cells, tissues, and membranes, and a description of how disease affects systems of the body. The integumentary, lymphatic, skeletal, muscular, and nervous systems are explored in detail.
Credit Hours: 3

H05 Anatomy and Physiology II
A continuation of Anatomy and Physiology I, this course explores in detail the senses, blood, and heart, along with the endocrine, circulatory, lymphatic, respiratory, digestive, urinary, and reproductive systems. Topics such as immunity, metabolism, development, and biochemistry are also covered.
Credit Hours: 3

H06 Health Records Management
This course introduces most of the records used in a medical office and health information management. Students see examples of these records, study their contents, and learn how these records are used, shared, and stored by health information management professionals. Students also learn about the relationships among these records and medical care, legal, insurance or billing concerns, and the fundamentals of health information systems.
Credit Hours: 3

H07 Medical Coding I
This course introduces students to the skills needed for correct billing in hospital outpatient clinic, inpatient, and physician office settings. Topics include the proper use of forms and billing guidelines to evaluate medical necessity. Students are also introduced to various reimbursement methodologies and the claims billing process.
Credit Hours: 3

H08 Medical Coding II
This course introduces students to the skills needed for correct coding in the hospital outpatient clinic, inpatient, and physician office settings. Topics include ICD-9, ICD-10, CPT and HCPCS coding and electronic claims processing.
Credit Hours: 3

HE310 Survey of Healthcare Management
This course provides students with a comprehensive education about the healthcare industry. Students build strong critical thinking and analytical skills that students will need as a future healthcare administrator. This course examines the full scope of responsibilities associated with the position of healthcare administrator. Topics of discussion include finance, human resources, risk assessment, crisis management, compliance, internal and external audits, and quality assessment/control, and performance improvement, as well as legal and ethical concerns as they relate to the healthcare industry.

HE320 Medical Sociology
This course analyzes social factors in relation to health and disease. Consideration is given to definitions of health, illness behavior, the formal and informal organization of health professions and institutions, and the expanding role of government in the health field. Use is made of both theory and current research. Social issues and health care are also examined and include poverty and health delivery systems, abortion, euthanasia, child abuse, and old age.
Credit Hours: 3

HE330 Healthcare Delivery Systems
This course provides a current and comprehensive overview of the basic structures and developments of the U.S. health system. The historical origins, resources, individual services, cost, and quality are explored. The topics covered include the continuum of care, concepts methods and theories in healthcare delivery systems, and computer applications in healthcare.
Credit Hours: 3

HE350 Healthcare Human Resource Management
This course is designed to familiarize students with the basic principles of healthcare human resources management. The course begins with an overview of human resources within a healthcare organization. Training, compensation, recruiting, staffing, training, and performance management are examined. This foundation is used to examine how the human resources professional manages careers, compensation, labor relations, safety and health of employees, and discipline and procedural justice.
Credit Hours: 3

HE360 Healthcare Economics
This course provides a step-by-step examination of the basic principles of economics as they apply to health systems. It focuses on how healthcare costs are determined, how supply and demand impact healthcare, and how effective healthcare delivery maximizes resources. Important information is given on the healthcare reforms currently faced at the state, national, and international levels as well as updated organizational models. Students will develop a useful framework to understand many current public health and healthcare issues.
Credit Hours: 3

HE380 Managed Healthcare
This course presents an overview of major issues related to the design, function, management, regulation, and evaluation of health insurance and managed care plans. It provides a firm foundation in basic concepts pertaining to private and public sector health insurance/benefit plans, both as provided by employers and government agencies such as Medicaid and Medicare.
Credit Hours: 3

HE400 Cultural Diversity in Healthcare
This course presents cultural perspectives about health care practices. Many diverse cultures are described in rich detail with respect to their similarities and differences. Their individual perspectives on such topics as worldview of health, illness etiology, religion, and health promotion are presented. Health barriers and the Affordable Care Act are described to provide ways to effectively communicate and treat people from different cultures.
Credit Hours: 3

HE420 Healthcare Finance & Accounting
This course presents a comprehensive analysis of financially managing a healthcare organization. Students are introduced to financial terminology and how it is used in organizational analysis. Evaluation of financial statements provides insight as to necessities of effective planning, staffing, inventory management, budgeting, and benchmarking. Lastly, the benefits of electronic record implementation are explored along with how it is being supported by the World Health Organization.
Credit Hours: 3

HE450 Leadership in Healthcare
This course explores the leadership skills required in the healthcare industry by looking at how effective leaders embrace the inevitability of constant change and diversity. Master leaders use their interpersonal skills to promote change, communicate vision, provide a sense of direction, and inspire employees. In this course, students gain insight into various models for leadership and leadership styles. Students also learn how the medical field is shaping a new community- based approach to care that supports patient satisfaction.
Credit Hours: 3

HE470 Medical Law and Ethics
In this course, students learn how medical law and ethics are interwoven and help define and strengthen healthcare delivery. Students learn how both providers and patients have rights and work together to provide optimal health. In addition, students learn about workplace safety, protection of medical records, ethical considerations, and future trends and benefits in the healthcare environment.
Credit Hours: 3

HE490 Healthcare: Research Study
This course requires students to synthesize the knowledge gained throughout their program and demonstrate mastery of the concepts, theories, and practices through a comprehensive research paper. The student acquires research skills in design, methodology and writing. The research paper must not only describe current trends within the chosen topic area but should demonstrate how the topic relates to the broader field of healthcare management. The student fulfills the requirement for the course through the submission of written assignments and submission of a scholarly research report.
Credit Hours: 3

HS150 World Civilizations I
World Civilizations I describe world civilizations in-depth, tracing the development of human history from the earliest cuneiform writings through the development of philosophy, religion, politics, art, and science in Middle Eastern, Indian, Chinese, Greek, Roman, and European civilizations. Students are expected to, at the successful conclusion of this course, describe the outstanding features of the civilizations discussed, compare various civilizations to one another, identify major artistic, legal, philosophical, and religious achievements of each civilization, and discuss how new civilizations in a geographic area emerged from previous civilizations.
Credit Hours: 3

HS250 World Civilizations II
World Civilizations II provides a basic, foundational background to world history, from the Age of Exploration to the present. The required readings, exams, and written assignments enables students to increase their understanding of the historical events of the time period in question and, additionally, comprehend historical themes that run throughout the course. The design of the course establishes a baseline for the major themes of modernity and connects these themes to historical events through a framework of continuity and change. The design encourages students to think creatively and analytically, making connections throughout the course and incorporating and building on major themes from one week to the next.
Credit Hours: 3

J01 Introduction to Criminal Justice
Introduction to Criminal Justice examines the past, present, and future of the American criminal justice system. Topics discussed include how laws are created: the history and types of law enforcement; structure of the court system; and the changing philosophies of the American correctional system. Students also examine the role of legal precedent, the death penalty, prison life, and the juvenile justice system.
Credit Hours: 3

J02 Criminal Law
This course examines criminal law in the U.S. It offers an overview of the criminal court system. The course provides a foundation in criminal law, as well as defenses that are available to those accused of committing criminal acts. Terrorism and crimes involving multiple offenders are also highlights of this course. Throughout, early common law is compared to modern law.
Credit Hours: 3

J03 Criminal Procedure
Criminal Procedure provides procedures used to lawfully investigate, apprehend, and prosecute individuals suspected of and accused of violating criminal laws.
Credit Hours: 3

J04 Policing
This course provides an introduction to the responsibilities of police officers, providing examples and applications of theory, including topics such as patrol techniques, use of discretion, and describing how police departments are organized and managed, and how they are responding to modern challenges.
Credit Hours: 3

J05 Corrections
This course provides students with an introduction to federal and state correction facilities in the U.S. The course explores the history of prisons, including the use of inmates as laborers. The course examines how prisons operate today and consider alternatives to incarceration. The privatization of prisons and the Constitutional rights of offenders are also highlights of this course. The course concludes with a look at the unique needs and challenges female inmates confront and pose to corrections staff.
Credit Hours: 3

J06 Ethics in Criminal Justice
This is an examination of a wide range of ethical issues in policing, the practice of law, sentencing, corrections, criminal justice research, and crime control policy. Course discussion includes the utilitarian and deontological approaches to criminal justice ethics, morality of the death penalty, privatization of corrections, and the myths that influence public opinion toward crime and crime control.
Credit Hours: 3

J07 Private Security
This course examines private security. It explores in depth the history of security, civil and criminal law, and the changes that have occurred in homeland security and the policing landscape of the U.S. since the events of 9/11. Terrorism and cybercrimes are also covered in detail. Retail security concerns and the ongoing threat of workplace violence are studied. Throughout, job opportunities for security professionals are addressed.
Credit Hours: 3

J08 Domestic Violence
This course examines the history of domestic violence here in the U.S. and on a global level, including an examination of patriarchal societies, theories that attempt to explain criminal behavior, child abuse, elder abuse, batterer intervention programs, and the roles of law enforcement and the courts in responding to domestic and family violence.
Credit Hours: 3

J09 Juvenile Justice
This course provides a look at juvenile delinquency, including the historical treatment of wayward adolescents and the theories that attempt to explain their criminality, as well as taking a look at the current justice and corrections systems in the United States.
Credit Hours: 3

J10 Criminal Investigation
In this course, students thoroughly examine the investigation process and situations in which police officers apply specific investigative and information-gathering techniques to meet the evidentiary requirements of specific crimes.
Credit Hours: 3

J11 Report Writing
This course examines the report writing skills required of criminal investigators. The course explores in depth arrest and crime reports, the rules of narrative writing, including interviews, search warrants, and special issues encountered in this type of writing. Probable cause and the chain-of-custody issues are given special attention.
Credit Hours: 3

K01 Windows Operating Systems
In this course, students learn how to Navigate Windows 10, work with files and folders, and conduct Google searches in Microsoft Edge. Students discover Windows apps, including Windows Entertainment, Information, and Productivity apps. Students also learn about viruses and spyware, along with strategies to protect their computer. Lastly, students are provided with the knowledge needed to practice advanced file management.
Credit Hours: 3

K02 MS Office Applications I
Microsoft Office 2019 allows people to create documents, spreadsheets, presentations, and databases. This course will teach you how to use three popular tools from the MS Office Suite— MS Word, MS Excel, and MS PowerPoint. In this course, you'll learn how to use MS Word to create and edit text documents, insert figures and tables, and format pages for a variety of uses. You'll then learn how to use MS Excel to organize and format data, including charts, formulas, and more complex tables.

Next, you'll learn how to use MS PowerPoint to create and deliver slide shows. Finally, you'll complete a graded project, which will test the skills acquired in Word, Excel, and PowerPoint.
Credit Hours: 3

K03 MS Office Applications II
This course will teach you how to use Word, Excel, and PowerPoint, in conjunction. These three programs can be used together to create dynamic presentations, detailed spreadsheets, and informative documents. You'll complete a project combining all of the portions of the software suite, which will test the skills acquired in these three applications. Microsoft Access is a relational database management system. Access is used to manage and analyze data. You'll learn about the features of Access and how they're used to produce databases that can be sorted, filtered, queried, and analyzed. You'll also learn about database design and how to organize data for the most effective analysis. Learning how to use Access will give you a greater range of professional skills and help you have a better understanding of databases in general. In this course, you'll learn various features of programs and applications that help you collaborate with others. For Microsoft Outlook, you'll learn different settings that can be used for email, your calendar, contacts, tasks, notes, and folders. You'll learn the basics of using OneNote to take and organize Notes. You'll explore the details of storing information and collaborating on documents with OneDrive, SharePoint, and Microsoft 365.
Credit Hours: 3

K04 Computer Hardware Management
In this course, you'll become familiar with computer hardware basics. You'll learn about the internal workings of a computer system and be able to identify and explain the function of motherboards, memory, hard drives and other components and connectors. At the completion of this course, you'll be able to select and configure an appropriate system for yourself or a computer.
Credit Hours: 3

K05 Computer Software Management
This course will give you an in-depth instruction on the Windows (OS) operating system. You will learn about important networking software tools and Windows administrative utilities. The popular MAC and Linus operating systems are introduced as well as common commands used with the CLI (Command Line Interface) and scripting. Important network security concepts are covered.
Credit Hours: 3

K06 Local Area Networks
This course presents the basic concepts of networking, options for cabling and wireless networking, communications and protocols, architectures, and operations. It also provides instruction for designing a network, offering administration and support, and solving network problems.
Credit Hours: 3

K07 Computer Programming I
Computer Programming I is the first of two courses designed to familiarize students with computer programming and Visual C#. In this initial course, students are exposed to fundamental programming concepts and are introduced to object-oriented programming by way of the C# development language. Computer Programming I is an ideal choice for business and systems analysts, as well as those simply wishing to learn a programming language.
Credit Hours: 3

K08 Computer Programming II
Computer Programming II is the second of two courses designed to familiarize students with computer programming and Visual C#. In this course, students are exposed to the foundations of the Internet and Web development. The lessons focus on a variety of critical elements, including arrays and structures; styles and validator controls; ASP.NET; the Visual Studio Environment; reading from and writing to data files; the concepts behind object-oriented programming and more.
Credit Hours: 3

K09 Web Site Design
This course provides an introduction to the effective use of Web page design principles, the basics of HTML coding, Web site strategies, and how to maintain Web pages.
Credit Hours: 3

K10 Programming in JavaScript
This course is an introduction to the process of adding interactivity to Web pages using JavaScript. Projects give students hands-on opportunities to practice what they are learning.
Credit Hours: 3

K11 Database Processing
This is an introduction to the design and development of databases, using data modeling tools, normalization, structured query language (SQL), database application design, and Internet technology.
Credit Hours: 3

K12 Systems Analysis and Design
Systems Analysis and Design offers students a thorough examination of the design and development of information systems following the four phases of the systems development life cycle (SDLC) model. In this course, students learn how to gather information, structure data, and build and implement information systems of all sizes. They learn the ins and outs of project management, and they'll understand the risks project managers take when they skip steps in the interest of saving time or resources. Additionally, students learn how to communicate strategically, collaborate effectively, and solve problems collectively while working as an active part of a project team.
Credit Hours: 3

M01 Human Resource Management
This course is designed to familiarize students with the basic principles of human resources management. The course begins with an overview and legal aspects. Work analysis and workforce planning, recruiting, staffing, training, and performance management are also examined. This foundation is used to examine how the human resources professional manages careers, compensation, labor relations, safety and health of employees, and discipline and procedural justice. The course concludes by analyzing related concepts in a global context.
Credit Hours: 3

M02 Total Quality Management
A study of quality management processes from teams to organization-wide systems and the behavioral and analytical tools that support fully integrated quality management. Emphasis is given to the commitment of management and the organization as a whole to the cultural changes necessary to implement quality improvements throughout the organization to ensure long-term competitiveness.
Credit Hours: 3

M03 Organizational Behavior
This course is designed to provide students with an opportunity to explore the behavior of individuals, groups, and organizations within today's dynamic work environment. Specific topics include communications, motivations, leadership, power structure, and organizational culture.
Credit Hours: 3

MA140 Business Analysis
In Business Analysis, students use mathematics to analyze, problem solve, and make business decisions. Electronic banking, simple and compound interest, credit, loans, taxes, insurance, depreciation schedules, statistics, and present and future value of money are covered providing the basis for solving future business problems. Quantitative analysis using models help students critically analyze business data and determine acceptable outcomes.
Credit Hours: 3

MA240 College Algebra
This course is a graphical and numerical approach to algebra that incorporates the use of technology. Emphasis is on solving algebraic application problems, and results are solutions- oriented. The concept of a function as a tool to model real-world data plays a central role. Emphasis is placed on the study of equations and inequalities, graphs, matrices and determinants, conic sections and sequences, induction, and probability.
Credit Hours: 3

MA260 Statistical Analysis I
Statistics surround us: in the newspaper, on the Internet, and on television. They provide people with information that allows them to make educated and pivotal decisions. Whether consumers are purchasing cars, searching for a new health care provider, or looking for financial investments, the science of statistics remains a valuable tool providing support to make the best decision based on information presented to them. This science is not absolute but provides insights and research relevant to whatever decision students are attempting to make. Statistics fascinate us because they support decisions in finding a good car value, a qualified and respected health care provider, and even as a guide in choosing mutual funds with a desired rate of return. In this course, students can expect to acquire a basic understanding of statistics to critically analyze data to determine how to make sound decisions in all aspects of their lives. Statistical terminology is introduced in a way that supports success in this course and in all future applications of statistics.
Credit Hours: 3

MA270 Statistical Analysis II
This course prepares the student for making sound business decisions based on the science of statistics with associated confidence levels. Statistics are everywhere and understanding and projecting the meaning of data gathered is a critical first step in developing an appreciation of this topic. In today’s business climate, young professionals are required to understand and communicate statistics easily to remain competitive in any market.
Credit Hours: 3

OR090 College Prep
The course provides a framework for students to become oriented with higher education, while also polishing academic and life skills to support and foster future collegiate success. This is a foundational course to develop cognitive and behavioral strategies. Topics in this course include financial planning, learning styles, goal setting, Math and English fundamentals, critical thinking, problem solving, and more.
Credit Hours: 3

OR110 Achieving Academic Excellence
This course helps students sharpen skills that help in achieving maximum learning as they complete their degree programs. Taking this course unlocks students' undiscovered potential and helps them discover their multiple intelligences and best ways to learn. This course also helps students uncover strengths and build from them, as well as explore the areas where they might change behaviors to ensure college success.
Credit Hours: 3

P01 Introduction to Paralegalism I
This survey course provides an introduction to the paralegal profession. Career opportunities are be examined, as well as the training and educational requirements demanded of the paralegal. Civil litigation and criminal law are explored. The entire trial process – from filing a complaint to the appeals process are studied in depth. The history of American laws and the structure of the U.S. court system are also highlights of this course.
Credit Hours: 3

P02 Introduction to Paralegalism II
The paralegal's role in investigation and interviews highlights the beginning of the course. Legal research and writing are examined throughout. Then this survey course moves into specific legal subjects. Torts, property law, including intellectual property (IP), contracts and e- commerce, family law, and labor law are explored in depth.
Credit Hours: 3

P03 Torts
This course introduces basic areas of law dealing with civil wrongs, with coverage of intentional torts, negligence, malpractice, defamation, joint and vicarious liability, auto insurance, and workers' compensation.
Credit Hours: 3

P04 Civil Litigation
This course teaches assisting the law office with matters concerning jurisdiction, venue, preparing basic pleadings, discovery documents, pre-trial and post-judgment motions, managing the case file, attending to service of process, and assisting in the courtroom.
Credit Hours: 3

P05 Criminal Law and Procedures
This course examines the fundamentals of substantive criminal law and procedure unique to criminal cases, including an examination of the practical aspects of prosecution and defense, the constitutional rights of the accused, plea bargaining, and the unique aspects of a criminal trial.
Credit Hours: 3

P06 Real Estate Law
This course covers real property and common types of real estate transactions and conveyances. Preparation of legal instruments including deeds, contracts, leases, deeds of trust, and mortgages are also discussed.
Credit Hours: 3

P07 Law Office Management
This is an introduction to legal forms of business ownership, expenses, timekeeping, fee structures, billing, administrative reports, and miscellaneous administrative procedures. Credit Hours: 3

P08 Family Law
This course emphasizes substantive law and overview of common procedures related to domestic relations law, including the formation and dissolution of marriage, marital property, child custody and support, and related matters.
Credit Hours: 3

P09 Legal Research and Writing
This is an intensive introduction to legal research tools and techniques, including retrieval of case and statutory authority, use of encyclopedias, legal periodicals, treatises and other secondary authority, proper case citation form, and the drafting of internal and external documents, letters, memoranda, and other written materials.
Credit Hours: 3

P10 Wills, Trusts, and Estates
This is an examination of the jurisdiction of probate courts, probate administration, the forms of wills and trusts, applicable legal and equitable principles, intestacy, and tax returns related to the estate.
Credit Hours: 3

PS302 History and Systems of Psychology
This course provides a comparative overview of the major fields within psychology, the theories and approaches to understanding human behavior. It covers the historical roots of the discipline, as well as the major current perspectives and lead theorists in modern psychology, from Sigmund Freud to Abraham Maslow, from BF Skinner and Jung to Carl Rogers and Albert Ellis. Students explore career alternatives regarding positions psychology majors can aspire to as they look at their own careers as professionals on the human side of the workplace.
Credit Hours: 3

PS350 Biological Psychology
This course explores the ongoing interaction between behavior and biology in humans, beginning with an overview of the history of biological psychology and the function of the brain and neurons. The different types of body systems, including the sensory and motor systems are explored. The concepts of behavior, with a specific focus on human behavior are also covered. Finally, learning and the various aspects of psychological and biological disorders that can interfere with learning and communication are presented.
Credit Hours: 3

PS370 Research Methods in Psychology
This course explores research methods used in psychological research. The underlying concepts, as well as specific strategies, are presented to introduce students to the empirical processes of the scientific method that are utilized in psychological studies. Topics covered include measurement, statistical analysis, correlation, hypothesis testing, field research using APA style, and research design. Examples from a wide variety of psychology subdisciplines are provided to illustrate the concepts presented throughout the course.
Credit Hours: 3

PS380 Multicultural Psychology
Students examine academic viewpoints regarding cross-cultural psychology and review key theories, approaches, and research methods. Principles of critical thinking are introduced and applied to cross-cultural psychology by identifying common errors and providing useful antidotes. The course also focuses on the diagnosis, treatment, and explanation of psychological disorders from cross-cultural perspectives and addresses the advantages, challenges, and opportunities presented by a diverse workplace and society.
Credit Hours: 3

PS390 Statistical Reasoning in Psychology
This is an introductory course that covers the statistical methods commonly used in the study of psychology. Topics presented in this course include frequency tables and histograms, mean, standard deviation, Z scores, the normal curve, the t test, the basics of one-way analysis of variance, correlation, and chi-square. This course provides explanations regarding how to perform these basic statistical methods, when and why these statistical methods are performed in psychological studies, and how to interpret statistical results in one's own studies, as well as those encountered in scholarly journals.
Credit Hours: 3

PS400 Cognitive Psychology
Students learn the fundamentals of cognitive psychology, including its five core concepts. They also learn about the nature of perception and attention, the various models of memory systems, and the ways in which we perceive or misperceive remembered events. Students gain an understanding of the dynamics of memory distortions. Further along in the course, the course teaches about the mental processes as they relate to visual imagery and knowledge representation and explore the possible origins and the observable dynamics of language acquisition and development. This course also provides a guide to the processes of problem solving and focuses on reasoning and decision making.
Credit Hours: 3

PS420 Learning Theories
This course introduces students to the specific branch of psychology that deals with how people and animals learn, as well as how their behaviors are later changed as a result of learning. Throughout this course, students are exposed to some of the most important theories, controversies and experiments that have arisen from learning psychology. At the completion of this course, students should have an understanding of basic psychological learning concepts and demonstrate the ability to integrate concepts into the applied field of behavior modification.
Credit Hours: 3

PS450 Industrial Organizational Psychology
This course provides an introduction to industrial/organization psychology, or the study of human behavior in work settings. The theoretical underpinnings of the field are explored, while providing a clear link to how they are applied to real-world workplace situations. The topics covered in the course include job analysis, employee screening and selection, employee training, the performance appraisal process, worker motivation, job satisfaction, worker stress, communication in the workplace, group processes in the workplace, leadership and power, and organizational structure and development.
Credit Hours: 3

PS460 Psychological Tests and Measurements
Psychological Tests and Measurements provides an introduction to the nature and practical applications of psychological testing and measurement. The course presents topics such as measurement and assessment, the different types of tests used and interpretation procedures involved, and assessment strengths and limitations.
Credit Hours: 3

PS490 Psychology: Research Study
This course requires students to synthesize the knowledge gained throughout their program and demonstrate mastery of the concepts, theories, and practices through a comprehensive research paper. Students acquire research skills in design, methodology and writing. The research paper must not only describe current trends within the chosen topic area, but should demonstrate how the topic relates to the broad field of psychology. The student fulfills the requirement for the course through the submission of written assignments and submission of a scholarly research report.
Credit Hours: 3

PY360 Ethics in Technology
The purpose of this course is to help students better understand the nature of information technology controversies and ethical dilemmas and to provide practical guidelines for forming responses to moral problems related to technology. The course examines some of the reasons why computers and the Internet have given rise to special ethical problems that did not exist before the arrival of computer software and the Internet.
Credit Hours: 3

R01 Employment Law
This course surveys the key issues in employment law, describing the relationship between employers and employees, describing the scope of laws protecting employees from unlawful discrimination on the job, and introducing other employment matters such as workers' compensation and union agreements.
Credit Hours: 3

R02 Training and Development
Employee training takes place in every business. In some organizations, employee training is a formalized process that continues throughout an employee's entire career. In other organizations, employee training is an informal event used to introduce new employees to the basic skills they'll need to complete their tasks. Your current or future employer will approach training by some combination of the two methods. This course will help you make employee training a more efficient and effect process. After completing this course, you should be a valuable asset to any employer.
Credit Hours: 3

R03 Compensation and Benefits
This course examines how compensation practices may be an advantage or disadvantage for enterprises in competitive environments, the criteria used to evaluate employees' compensation and benefits, and the challenges faced by human resource management professionals in designing compensation and benefits practices in the future.
Credit Hours: 3

R04 Human Relations
In this course, you'll learn concepts and theories about communication. . You'll begin by studying intrapersonal communication, or how you view and talk to yourself. You'll learn how personality and self-concept influence how you work with others. You'll also look at interpersonal communication, including concepts such as conflict and criticism, and learn how these concepts influence not only relationships but also productivity at work. Finally, you'll study leadership: what makes a "good" leader; how leadership is "good" under differing circumstances; and how a leader can create trust in group members. You'll learn about the value of networking and how to network. In addition, you'll learn about cultural differences and diversity in the workplace.
Credit Hours: 3

R05 Labor Relations
This course examines labor relations between management and workers. The course explores wages and other job concerns, union formation, collective bargaining, unfair labor practices, and the use of arbitration to resolve labor disputes. The course concludes with a look at the ways in which globalization has impacted labor relations in the United States.
Credit Hours: 3

S01 Introduction to Psychology I
This course explores introductory concepts in psychology. This course helps students to think like psychologists and understand why scientific and critical thinking is so important to the decisions they make in their own lives. This course provides an overview of psychology that emphasizes critical thinking, gender, and culture.
Credit Hours: 3

S02 Introduction to Psychology II
This course builds on Introduction to Psychology I. That foundation included topics such as defining psychology, exploring the brain and nervous system, becoming familiar with sensation and perception, learning and conditioning, and the ways by which behavior is shaped by social and cultural influences. Students gain insights into an array of topics that include the basics of psychological research, genetics and evolution, sensation and perception, different types of consciousness, learning theories, thinking and intelligence, memory, motivation, theories of personality, emotions and stress management, development over the lifespan, an overview of psychological disorders and, finally, an exploration of treatments and therapies for addressing the various kinds of psychological disorders.
Credit Hours: 3

S03 Human Growth and Development I
This course is designed to provide knowledge and insight into the development across the life span. From DNA to prenatal development and associated heredity and environmental factors, the changes in life are determined by a multitude of factors. Progressing through the infant, child, and adolescent

stages provides the student with a comprehensive knowledge base to understand physical, cognitive, and social changes during these periods of growth and development.
Credit Hours: 3

S04 Human Growth and Development II
This course explores the exciting physical, cognitive, intellectual, personality, and social developments focusing on middle childhood, adolescents, and adults. This course also describes the process of death, dying, and grief across the life span.
Credit Hours: 3

S05 Social Problems
This course presents an overview of social problems with emphasis on sexual variance, alcohol and drugs, crime and delinquency, violence, poverty, family problems, physical and mental illness, war, population, aging, urban problems, and environmental destruction.
Credit Hours: 3

S06 Social Psychology
In this course, students are introduced to concepts related to the behavior of individuals as members of the larger society as expressed in varying beliefs, norms, attitudes, and attitude changes, along with basic ideas and concepts related to group influence and persuasion. Proceeding from this foundation, students explore the nature of group dynamics, cultural influences, conformity, attraction and intimacy, aggression and its sources, prejudice and its effects and sources, as well as the opposition of altruism and conflict in social life.
Credit Hours: 3

S07 Abnormal Psychology
In this course, students become familiar with the distinctions between normal and abnormal behavior. Students gain an understanding of the role of clinicians as they assess, diagnose, and attempt to treat a wide variety of psychological disorders. Students will learn about various disorders, including obsessive-compulsive disorders, somatic dissociative disorders, bipolar and depressive disorders, substance-related and addictive disorders, feeding and eating disorders, and gender dysphoria, sexual dysfunctions, and paraphilic disorders.
Credit Hours: 3

S08 Psychology of Personality
This course enables students to understand the basics of personality psychology. Students differentiate among the primary concepts of personality psychology such as personality traits, psychoanalysis, cognitive-behavioral, and motivation theories. Emphasis is placed on the importance of learners recognizing principal systems and underlying beliefs innate in various personality paradigms that accurately reflect their own personal perspectives. Additionally, students learn to recognize strategies and approaches in psychology that reflect identified personality theories as a foundation and how to apply concepts to events in day-to-day life.
Credit Hours: 3

SC140 Elements of Chemistry
This course is designed for non-chemistry majors who have little or no chemistry background. The first half of the course presents the origins and basic tenets of chemistry as they relate to the environment. Atomic elements, the periodic table, bonding, and acids and bases are examples of such chemistry

principles. Issues such as global warming, energy conservation, and acid rain are also discussed. The second half of the course explores energy sources, organic chemicals, drug designing, composition of foods, and provides an explanation of genetic engineering.
Credit Hours: 3

SC160 Basic Biology
Basic Biology introduces the student to a world of exciting biological discoveries. Included in these discoveries are: biological organization, prokaryotic and eukaryotic cells and ecosystems, chemistry, Darwin's theory of natural selection, and fungi, plant, and animal phyla and kingdoms. In addition, students discover how biology impacts their lives and its relationship with technology and how it is differentiated from other disciplines. The evolution of animals, vertebrates, and invertebrates is described in rich detail.
Credit Hours: 3

SC260 Introduction to Ecology
Introduction to Ecology exposes students to the many interdependencies that exist within and among various ecosystems. Students begin to understand how the climate, species, ecosystems, landscape, and sustainability factors all participate in diversity of plant and animal life. The goal of this course is to take the fundamental principles and biological concepts of the science of ecology and provide clear evidence of research approaches used in various areas of ecology.
Credit Hours: 3

SO115 Essentials of Sociology
This course is an introduction to the essentials of sociology, primarily on American society; however, much attention is also given to global issues. Students learn about social groups, formal organizations, social stratification, deviance, racial prejudice and discrimination, and social inequalities related to gender issues. Insight is provided into economic and social disparities between Western nations and developing or undeveloped states like those found in Southeast Asia and Africa.
Credit Hours: 3

SO245 Social Impact of Technology
This course provides an overview of technological advances over the span of hu man history. Topics include the interrelationship of technology and culture; ethics and morals as they relate to technological progress; energy; ecology; demography; war and politics; the unintended consequences of globalization, including social inequality, climate change, and global warming.
Credit Hours: 3

SP180 Principles of Public Speaking
This course teaches students fundamental principles while emphasizing skills development in the practice of public speaking. It covers purposes, methods, and steps in preparing speeches, develops communication skills in listening, speech criticism, audience analysis and writing, and provides effective delivery techniques to present a variety of speeches.
Credit Hours: 3

T01 Introduction to Security Management
This course is an introduction to security operations and management. Students take a close look at various types of security and the various types of security firms that provide such security. Students also examine how individuals, organizations, and nations can minimize loss of life and property. Throughout the course, students discuss the ways in which security needs have changed since 9/11.
Credit Hours: 3

T02 Introduction to Terrorism
This course discusses weapons of mass destruction, emergency management, incident response procedures, chemical, biological, and nuclear incidents, mass casualty decontamination, and crime scene operations.
Credit Hours: 3

T03 Incident Command Systems
This course examines management of response operations for mass casualty and high impact incidents, including EMS (Emergency Medical Services) operations, functions, and logistics; communications management; community threat assessment; and significant coverage of EMS response in the real world.
Credit Hours: 3

T04 Aviation Security
This course provides students with an overview of how airports and airlines operate and generate revenue to make a profit, but its primary focus is aviation security. The course explores the history of aviation security, including events that have brought about changes in policies and regulations. In particular, the course examines how the tragic events of September 11, 2001 radically changed national and global aviation security procedures. The course concludes with a look at the ways in which terrorists are adapting to heightened security measures.
Credit Hours: 3

T05 Criminal Behavior
This is an introduction to criminal behavior. The course includes coverage of theories that help explain criminal behavior and delinquency. It also discusses the victims of crimes and how crimes impact their lives.
Credit Hours: 3

T06 Cyber Security
This course presents the procedures used in criminal cases that involve the use of computers and cyberspace. It also examines the history of computer-based crime and how technology has created new avenues to commit traditional crime as well as all-new opportunities for criminal behavior. This course discusses a wide range of modern-day cybercrime, including hacking, malicious software, digital piracy, online fraud, sex crimes, cyberbullying, and cyberterrorism. It looks at key theoretical perspectives, legal challenges, and perspectives on the future.
Credit Hours: 3

VT311 Employment Law
This course examines laws that affect the workplace. The course explores in depth employer/employee relationships, permissible testing in the workplace, discrimination and Affirmative Action, Title VII, unions, and injuries that take place within the course and scope of employment.
Credit Hours: 3

VT312 Business Law
This course is designed to familiarize students with various kinds of laws, key elements of the American Constitution, and the concepts of the various schools of jurisprudence. Ethics, values, morality, law, and the various ethical theories are compared and contrasted, and the need for promoting corporate social responsibility is discussed. The elements of tort law, the basic elements of a contract, the sources of laws governing contracts, and the conditions for an offer to be valid are examined. Topics include reality of consent, capacity of minors, consequences of illegal agreements, assignment of rights, transfer of title, and the rights of third parties. Delivery of goods, right to inspection, acceptance and revocation of contract, the remedies available to buyers and sellers, and the nature of property are also discussed.
Credit Hours: 3

VT320 Marketing Principles
In this course you will examine broad social, ethical, and technological themes and trends that affect business operations. You will explore some of the broad effects and implications of business-society interactions relating to public issues, ethics and social responsibility, and the process of globalization. You will also examine in detail issues of technology, development, the environment, culture, and diversity.
Credit Hours: 3

VT330 Accounting for Managers
The primary focus of this course is to show how successful managers use the tools and techniques of managerial accounting to make decisions about both day-to-day operations and long-term tactics and strategies. The course explores a range of innovative systems that managers in our value-centered economy use to investigate a variety of business issues related to product quality, customer service, and long-term relationships.
Credit Hours: 3

VT350 Organizational Behavior
This course is designed to provide students with an opportunity to explore the behavior of individuals, groups, and organizations within today's dynamic work environment. Specific topics include communication, motivation, leadership, power structure, diversity, and organizational culture.
Credit Hours: 3

VT420 Human Resources Management
This course is designed to familiarize students with the basic principles of human resources management. The course begins with an overview and legal aspects. Work analysis and workforce planning, recruiting, staffing, training, and performance management are also evaluated. This foundation is used to synthesize how the human resources professional manages careers, compensation, labor relations, safety and health of employees, and discipline and procedural justice. The course concludes by evaluating related concepts in a global context.
Credit Hours: 3

VT450 Leadership Skills
This course explores the fascinating role of leadership in business, government, and society. The need for strong leaders is critical during the constant change and escalating uncertainties that define our times. Leadership has little to do with title or position; it is a way of acting that involves the influence of people to inspire change toward a mutually desired outcome. This course explores how effective leaders embrace the inevitability of change and diversity and use their interpersonal skills to promote change, communicate vision, provide a sense of direction, and
inspire employees.
Credit Hours: 3

VT470 Strategic Management
Strategic management may sound uninteresting on the surface, but as you'll see in this course, there are many interesting aspects to strategic management and knowing how a firm can have a competitive advantage in the marketplace! This course is designed to provide students with an understanding of the concepts, models, and theories of strategic management by looking at case analyses, analyzing external environments, evaluating internal capabilities, and exploring useful strategies. The emphasis of the course is on the successful implementation of strategies in different types of firms across industries to gain an advantage over all their competitors.
Credit Hours: 3

VT490 Business Ethics
In this course the student will have the opportunity to examine Business Ethics from a stakeholder perspective, discussing the application of various ethical approaches to decision making. Among these perspectives will be the notion of justice and fairness; utilitarianism as a consequentialist approach; and the role of personal relationships in an "ethic of care." The course will examine internal ethical business practices, investigating the moral responsibilities of various functional areas within the organization. Through examining corporate responsibility, the course also will take a look at the topics of environmental responsibility, global ethics, advertising ethics, and the responsibility of business as it relates to the natural environment.
Credit Hours: 3

Career Program Choices

Ashworth College offers students Career Diplomas and Career Certificates.

Career Diploma

Career Diploma programs provide students with an instructional course of study designed to impart the requisite knowledge required to obtain entry-level employment in a specific career or allow graduates to provide professional services to clients as proprietor of a small business. The programs can be completed in approximately four months.

Career Certificate

Career Certificate programs provide students with an instructional course of study designed to provide instruction focused on specific subsets of knowledge related to a vocational or professional career. Career Certificate programs are typically shorter in duration than Career Diploma programs. The certificates are valuable in training students who already have some familiarity in this area of study and often assist students with career development and advancement.

Special Note: Students should be aware that programs are developed to provide foundational knowledge and/or skills. Because state regulations vary, students should contact their state agencies to determine if their chosen course is appropriate for their career goals.

Career Programs

Diploma Programs

- Administrative Assistant
- Bookkeeping
- Forensic Science
- Tax Preparation

Certificate Programs

- Child Development Associate (CDA) Credential Preparation

Career Diploma Programs

Career Diploma programs provide students with an instructional course of study designed to impart the requisite knowledge required to obtain entry-level employment in a specific career or allow graduates to provide professional services to clients as proprietor of a small business. The programs can be completed in approximately four months.

Special Note: Students should be aware that programs are developed to provide foundational knowledge and/or skills. Because state regulations vary, students should contact their state agencies to determine if their course is appropriate for their career goals.

Administrative Assistant

Program Description

The program is designed to provide the student the knowledge and skills required for entry- level work as an administrative assistant. The program focuses on the development of both technical and professional proficiencies. It will prepare students to perform basic office procedures such as good time management, maintaining a filing system and scheduling appointments. This program will provide

useful tools for positive communication with supervisors, co-workers and clients or visitors. Writing Workshops throughout the program will provide activities designed to improve writing and grammar skills that are essential in the administrative assistant profession.

Program Objectives

- Understand the role of organizational structures and compare and contrast the responsibilities of supervisors and employees
- Demonstrate the essential skills required for effective working relationships, such as team, collaborative, personal, and interpersonal skills
- Prepare for a successful employment search
- Explain the importance of prioritizing, planning, and managing for results
- Communicate effectively by telephone and in writing
- Perform common office tasks, such as file setup and maintenance, financial management, scheduling appointments, and maintaining calendars
- Plan meetings and conferences and make travel arrangements
- Prepare for future professional challenges

Course Number	Course Title
Lesson 1	Learning at Ashworth
Lesson 2	Concepts in Small Business and Self-Employment
Lesson 3	Entering the Workforce
Lesson 4	Becoming a Professional
Lesson 5	Managing and Organizing Yourself
Lesson 6	Working Ethically
Lesson 7	Understanding the Workplace Team
Lesson 8	Developing Customer Focus
Lesson 9	Improving Communication Skills
Lesson 10	Communicating with Technology
Lesson 11	Developing Presentation Skills
Lesson 12	Planning Meetings and Events
Lesson 13	Managing Physical Records
Lesson 14	Managing Electronic Records and Mail
Lesson 15	Coordinating Business Travel
Lesson 16	Understanding Financial Documents
Lesson 17	Seeking Employment
Lesson 18	Leading with Confidence

Bookkeeping

Program Description

In the Bookkeeping program students will learn the basics of bookkeeping and accounting practices that analyze, verify and post details of financial transactions for small companies or as part of an accounting department in larger companies. Program coverage includes instruction on the accounting

equation, accounts payable, accounts receivable, payroll, purchasing, inventory, budgets, and the controls and records management required to maintain accurate and compliant company accounts.

Program graduates are prepared to take the National Bookkeepers Association (NBA) Uniform Bookkeeper Certification exam, leading to the Bookkeeper Certification designation.

Program Objectives

After completing the Bookkeeping program, students will be able to:

1. Understand the role and duties of a bookkeeper within the framework of required accounting activities in a business setting.
2. Explain and apply the concepts of cash and accrual accounting, double entry bookkeeping and debits and credits.
3. Prepare payroll transactions ranging from paying wages to depositing and reporting taxes.
4. Make appropriate and accurate accounting entries for a variety of financial records.
5. Define fixed assets, depreciation, and amortization, including different methods of calculating depreciation for book and tax purposes.
6. Assist in using basic internal controls to prevent theft, embezzlement, or check and credit card fraud by employees, vendors, or customers.
7. Prepare required documents for budgeting, internal controls, and record retention.

Course Number	Course Title
Lesson 1	Learning at Ashworth
Lesson 2	Oriientation to Bookkeeping
Lesson 3	The Accounting Equation
Lesson 4	The Books of Accounting
Lesson 5	Assets, Liabilities, and Owner's Equity
Lesson 6	Revenue, Expenses, and Trial Balance
Lesson 7	Financial Reports
Lesson 8	Accounting for Cash and Payroll
Lesson 9	Accounting Systems
Lesson 10	Wholesale Accounting
Lesson 11	Assets and End of the Month Activities
Lesson 12	Microsoft Excel
Lesson 13	Microsoft Excel Graded Project
Lesson 14	Introduction to QuickBooks
Lesson 15	QuickBooks for Banking and Business Transactions
Lesson 16	QuickBooks for Inventory and Payroll
Lesson 17	QuickBooks Financial Reports Project
Lesson 18	Bookkeeping Project

Forensic Science

Program Description

The forensic science program shows students how to identify, collect, and analyze forensic evidence for use in capturing criminal perpetrators. Program topics include the history and development of forensic science, common types of physical evidence, legal considerations at the crime scene, forensic toxicology, arson and explosives, and the history of fingerprinting.

Program Objectives

- Explain the career opportunities available to forensic investigators and describe the characteristics of professionals in this field
- Describe what the term criminalistics encompasses and the significance of individual and class characteristics in the context of criminal investigations
- Explain the purpose of securing, documenting, and processing the crime scene and outline the considerations involved in the collection of physical evidence, including legal and safety precautions
- Describe the typical procedures followed in the crime lab and in areas such as biometrics, microscopy, fingerprint development, drug screening, serology, firearms investigations, trace evidence analysis, DNA profiling, and crime scene reconstruction
- Describe common tools, processes, and evolving technologies in areas such as biometrics, microscopy, fingerprint development, drug screening, serology, firearms investigations, trace evidence analysis, DNA profiling, and crime scene reconstruction
- Explain how forensic scientists use the scientific method during evidence examination and analysis and describe the factors that influence the selection and use of various analytical techniques.

Course Number	Course Title
Lesson 1	Learning at Ashworth
Lesson 2	Introduction to Legal and Criminal Justice Careers
Lesson 3	Introduction to Forensic Science and Crime Scene Investigation
Lesson 4	Crime Scene Reconstruction and Death Investigation
Lesson 5	Fingerprints
Lesson 6	Forensic Biometrics
Lesson 7	The Microscope, Firearms, Impressions and Matter
Lesson 8	Hairs and Fibers
Lesson 9	Drugs and Forensic Toxicology
Lesson 10	Metals, Paint, and Soil
Lesson 11	Forensic Serology and DNA Analysis
Lesson 12	Fire and Explosion Investigation and Document Examination
Lesson 13	Forensic Science Today and Tomorrow

Tax Preparation

Program Description

Students learn the standard practices used for the preparation and filing of federal tax returns for individuals and small businesses. The program provides the skills necessary to accurately complete common tax forms and schedules in compliance with all applicable tax codes and requirements.

Program graduates are prepared to take the National Bookkeepers Association (NBA) Uniform Tax Certification exam, leading to the Tax Certification designation.

Program Objectives

- Recognize and describe laws and regulations related to taxation for both individuals and small businesses, and apply these appropriately to the preparation of tax forms
- Calculate gross income and identify those elements of income that are included and excluded when making this calculation; identify common itemized deductions, including medical expenses, charitable contributions, and others; identify and calculate tax losses; identify and calculate deductible business expenses
- Apply capital gains and losses to property transactions
- Accurately complete a basic Form 1040 Individual Tax Return with typical itemized deductions for a family

A career in this field may require students to meet certain licensing, training and other requirements that may vary by vocation and state. Students should check with their state, local government and/or licensing board to research the requirements that may be applicable in their state.

Lesson 2	Concepts in Small Business and Self-Employment
Lesson 3	Career and Tax Overview and Filing Status
Lesson 4	Income, Part 1
Lesson 5	Income, Part 2
Lesson 6	Income, Part 3
Lesson 7	Deductions, Part 1
Lesson 8	Deductions, Part 2
Lesson 9	Returns for Self-Employment and Small Business
Lesson 10	Tax Calculation, Payment and Filing

The following Career Diploma programs are no longer accepting new enrollments:

Basic Electronics

Program Description

The Basic Electronics program provides instruction covering the fundamental information required for understanding the theory of AC and DC electricity and electronics, including sources of electricity, basic circuits and components, and their application to practical devices.

Program Objectives

After completing the Basic Electronics program, students will be able to:

1. Describe the scientific principles that apply to the basic flow of electricity and explain the function of various materials used as conducting, semiconducting, and insulating devices in the construction of standard electrical/electronic circuits.
2. Identify the basic tools and test equipment used to construct, troubleshoot, and maintain standard electronic circuits and systems.
3. Explain the construction and application of standard circuit configurations and identify the component types and connections used to build functioning electronic circuits.
4. Describe the appearance and general operating principles of multiple electronic components and electrical devices such as capacitors, resistors, inductors, semiconductors, integrated circuits (ICs), generators, motors, and transformers.
5. Identify and describe several important electrical concepts used in consumer electronic

Dental Office Assistant

Program Description

The Dental Office Assistant program is designed to provide the student the knowledge and skills required for entry-level work performing the administrative functions of a dental assistant. The program focuses on the development of both technical and professional proficiencies. It will prepare students to execute the necessary activities that are performed daily, weekly, and monthly in running a successful dental office. The intent of this program is to develop the comprehension students need to be prepared for the activities that occur every day within a dental office.

Program Objectives

After completing the Dental Office Assistant program, students will be able to

1. Perform as dental practice front office assistants
2. Identify daily, weekly, and monthly activities required for general office procedures
3. Define requirements for managing a dental front office
4. Effectively convey information for the proper completion of dental insurance filing, coding, and billing
5. Identify proper finance and accounting procedures for the dental front office
6. Demonstrate a high standard of professional ethics
7. Identify key skills and attributes for successful employment
8. A career in this field may require students to meet certain licensing, training and other requirements that may vary by vocation and state. Students should check with their state, local government and/or licensing board to research the requirements that may be applicable in their state.

Electronic Health Records Management

Program Description

Students learn the basics of health information management from a technological perspective. Topics include the content, structure, management, analysis, and processing of health information, as well as issues surrounding quality, confidentiality, and compliance. Special emphasis is placed on electronic information processing. Students receive hands-on training with two cloud-based EMR systems. Graduates are prepared for the Electronic Health Records Specialist Certification exam from the National Health career Association, with the potential to earn the Certified Electronic Health Records Specialist (CEHRS™) credential.

Program Objectives

After completing the Electronic Health Records Management program, students will be able to:

1. Describe the career opportunities available to trained medical records clerks, explain the typical job functions and ethical responsibilities related to this work, and contrast the role against that of accredited record technicians and registered records administrators.
2. Identify and define commonly used medical terms and explain how to use word elements to interpret unfamiliar medical terminology.
3. Identify the different components of the medical record, describe the standards for maintaining medical records and loose documents, and explain JCAHO requirements for medical records documentation.
4. Describe the major medical insurance programs and explain how to complete an insurance claim form using the Current Procedural Terminology (CPT) manual to code for procedures and services and the International Classification of Diseases (ICD-10-CM) manual to code for diagnosis.
5. Describe the typical electronic health record (EHR) system; summarize the categories of data maintained on this type of system, and outline standard processes involved with entering, storing, manipulating, and retrieving patient information.
6. Summarize the portions of the HIPAA Privacy Rule dealing with protected health information (PHI), confidentiality, and disclosure, and describe the circumstances under which information may be released without patient consent.
7. Navigate cloud based EMR software systems and use them to enter new patient information, encounter notes, physician information, insurance claims, and charting information.

Event Planning

Program Description

Students will learn about the role and obligations of professional event planners and the techniques and processes used to design and execute a variety of family and work-related social activities based on client needs and input. The program provides instruction on the basic structure of popular life, social, and corporate events as well as the basic business and self-employment skills necessary to operate an event planning business.

Program Objectives

After completing the Event Planning program, students will be able to:

1. Outline the role of the event planner and explain the importance of the interview process in determining the budget, size, and style of events.
2. Identify the various events associated with event planning, including birthdays, silent auctions, religious celebrations, and showers, and describe the processes that must be followed to successfully schedule and plan these events.
3. Describe the responsibilities associated with planning and organizing an event, including working with vendors and selecting venues.
4. Summarize the important business considerations involved in running an event planning business, such as financial management, business planning, marketing, and staff considerations.

Heating and Air Conditioning

Program Description

The Heating and Air Conditioning program is a comprehensive collection of lessons that provide the knowledge necessary for students to understand HVAC/R theory, identify typical systems and components used for heating and air conditioning residential and commercial buildings, and understand the standard procedures for installation, troubleshooting and maintaining HVAC/R installations and commercial refrigeration. This program offers students the opportunity to complete the EPA 608 certification exam as offered by the ESCO Institute.

Program Objectives

After completing the Heating and Air Conditioning program, students will be able to:

1. Identify the common tools and work procedures required to work safely and effectively as heating and air conditioning technicians.
2. Describe the basic theory of the refrigeration cycle and explain the basic scientific principles that apply to the refrigeration cycle.
3. Identify standard refrigerants used in common commercial applications and the outline the accepted procedures for safe handling and disposal of common refrigerants.
4. Describe the basic components present in heating and cooling systems and outline the standard techniques used to troubleshoot systems and identify faulty components.
5. Identify the standard forms and functions of popular residential heating systems and describe the basic troubleshooting and repair procedures used foreach.
6. A career in this field may require students to meet certain licensing, training and other requirements that may vary by vocation and state. Students should check with their state, local government and/or licensing board to research the requirements that may be applicable in their state.

Home Health Adie

Program Description

The Home Health Aide program teaches students how to help the elderly, the disabled, and people in ill health to maintain their quality of life and independence at home. Focus is on safety and universal precautions; moving and lifting patients; cleanliness and infection control; caring for children, the elderly, and the dying; and patient health, hygiene, and nutrition. Students learn how to check and report on vital signs, handle special situations, and perform emergency procedures.

Program Objectives

After completing the Home Health Aide program, students will be able to

1. Describe the role of the home health aide, outline the responsibilities involved in caring for home-bound patients, and differentiate the home health aide's role from other care providers.
2. Explain how to create a safe environment for the home health aide and the patient by identifying and describing OSHA regulations and other safe care requirements.
3. Identify and describe proper communication skills with patients, families, other healthcare providers, and insurance companies.
4. Describe typical duties and care responsibilities for patients of all ages and levels of health, with a focus on identifying issues and care concerns for specific populations.
5. Identify credible sources of dietary information and describe how to plan, purchase, store, and serve food to patients with different dietary restrictions and health concerns.
6. Identify and describe specific care regimens performed by the home health aide.

7. Identify and describe exercises designed to help patients gain and maintain strength and flexibility.
8. Explain how to take and record vital signs and collect bodily specimens for testing.
9. A career in this field may require students to meet certain licensing, training and other requirements that may vary by vocation and state. Students should check with their state, local government and/or licensing board to research the requirements that may be applicable in their state.

Medical Billing and Coding

Program Description

Students learn the fundamentals of medical billing and coding and are prepared to take the Certified Billing and Coding Specialist (CBCS) exam from the National Health career Association, the Certified Professional Coder (CPC®) exam from the American Academy of Professional Coders (AAPC), and the Certified Coding Associate (CCA®) exam from the American Health Information Management Association (AHIMA). Program topics include medical terminology; insurance plans; medical ethics; HIPAA; diagnostic and procedural coding; coding compliance and auditing; physician and hospital billing; Medicare, Medicaid, and TRICARE; EOBs, refunds, and appeals; workers' compensation; and electronic claims processing. Students receive in-depth training on ICD-10-CM/PCS, CPT, and HCPCS code assignment.

*Ashworth covers the cost of the CBCS exam within the tuition. Candidates for the CBCS and CCA must be High School graduates. Additional requirements such as membership and applications can be found with each certifying agency. CBCS, CPC®, CCA®

Program Objectives

After completing the Medical Billing and Coding program, students will be able to:

1. Outline the typical responsibilities of a medical biller/coder, describe the personal and professional ethics required for success in this profession, and describe the career opportunities available to appropriately trained personnel.
2. Describe how to build a strong base of medical terminology and use this terminology to accurately identify and describe body planes, anatomical directions, and the major structures, functions, and pathologies of all body systems.
3. Describe the purpose and impact of the Health Care Portability and Accountability Act (HIPAA) and explain how professionals can learn about changes to the laws and regulations that affect them.
4. Compare and contrast the major types of government and commercial insurance health plans, including Medicare, Medicaid, Health Maintenance Organization (HMO), Preferred Provider Organization (PPO), and Point-of-Service (POS)plans.
5. Describe the typical billing guidelines for inpatient medical, inpatient/outpatient global surgery, medical/surgical, and minor surgical procedures.
6. Summarize the life cycle of a typical insurance claim and explain the processing steps that must be completed before claims and other forms can be submitted to the insurance company.
7. Explain the purpose of medical coding and accurately code diagnoses and procedures using industry-standard coding systems published by the World Health Organization (WHO) and the American Medical Association (AMA).
8. Accurately assign ICD-10-CM/PCS, CPT, and HCPCS codes for diagnoses, procedures, and medical services as part of the insurance reimbursement process.

Medical Office Assistant

Program Description

The Medical Office Assistant program is designed to provide the student the knowledge and skills required for entry-level work performing the administrative functions of a medical assistant. Students learn how to schedule appointments, maintain patient records, perform billing and coding duties, assist physicians with examinations, prepare patients for laboratory and diagnostic imaging procedures, and administer medications. Graduates are eligible to sit for the Certified Medical Administrative Assistant (CMAA) exam administered by the National Health career Association (NHA).

Program Objectives

After completing the Medical Office Assistant program, students will be able to:

1. Outline the typical responsibilities of a medical office assistant, describe the personal and professional ethics required for success in this profession, and explain how medical office assistants are impacted by HIPAA and other healthcare-related regulations.
2. Describe how a medical front office is typically managed, focusing on administrative processes and procedures.
3. Explain the procedures to follow to create and maintain accurate medical documentation, especially with regards to patient records, procedural and diagnostic coding, insurance claim forms, and other healthcare documentation.
4. Demonstrate knowledge of medical insurance by outlining typical claims processing procedures and explaining the difference between government and commercial health insurance plans.
5. Using standard medical terminology, explain the structures and functions of the human body, including the senses and body systems.
6. Identify and describe the medical office assistant's role in standard patient interactions in the medical office, including in-office diagnostic tests and procedures, specimen sampling, medication administration, and the preparation of patients for examination.
7. Describe universal precautions and explain how to maintain a safe environment in the medical office, even during emergency situations.

Medical Transcription

Program Description

The Medical Transcription program is designed to provide the student the knowledge and skills required to transcribe various types of healthcare documents. Students are introduced to the healthcare record, transcription technology, standard practices, and style perspectives. Students learn to transcribe documents related to all medical specialties, including family practice, internal medicine, cardiology, urology, obstetrics and gynecology, gastroenterology, orthopedics, neurology, and pathology. Special attention is paid to HIPAA regulations, confidentiality, and professional issues related to employment.

Program Objectives

After completing the Medical Transcription program, students will be able to:

1. Explain the personal and professional skills required for success in this profession, outline the job duties associated with this work, explain how medical transcriptionists are impacted by HIPAA and other ethical regulations, and describe the employment opportunities available to trained personnel.
2. Describe how to build a strong base of medical terminology and use this terminology to accurately identify and describe body planes, anatomical directions, and the structures and functions of all major body systems.

3. Identify and describe basic concepts related to examination procedures and positions, laboratory tests, radiography techniques, and pharmacology.
4. Identify common problems and errors that occur during dictation or dictation conversion and explain when the transcriptionist should consult the Physicians' Desk Reference (PDR), the dictionary, style guides, or other reference materials.
5. Explain why medical records are confidential and describe how transcriptionists participate in the maintenance of patient confidentiality.
6. Transcribe various types of reports accurately from a variety of medical specialties and proofread this work both for accuracy and compliance with standard rules of grammar and style.

Paralegal Studies

Program Description

This comprehensive program provides a foundation in the basic principles of paralegal studies. Students will learn about the legal system, the litigation process, tort law, contracts, legal research, wills, and ethics. Students will also learn techniques that paralegals use to obtain employment, training, and continuing legal education.

Program Objectives

After completing the Paralegal Studies program, students will be able to:

1. Outline the career opportunities available to trained paralegals, describe typical job responsibilities, and explain the advantages and disadvantages of different types of work environments.
2. Describe the personal and professional qualities of competent paralegals, given the ethical considerations, rules, and supervisory requirements currently governing the practice of the profession.
3. Explain the importance of legal research and writing skills for paralegals, describe how to conduct effective legal research using both traditional and technology-based tools, and explain how to draft a variety of legal documents.
4. Describe the history and origins of the American legal system, with an emphasis on the sources of American law.
5. Explain the difference between criminal and civil law and describe various categories of civil law, such as torts, contract law, corporate law, property law, family law, and wills and estates.
6. Outline the structure of the federal and state court systems and identify the processes followed by courts in all phases of criminal and civil litigation.
7. Identify the two basic types of jurisdictions and explain the requirements for personal jurisdiction and subject matter jurisdiction.

Payroll Clerk

Program Description

The Payroll Clerk program will provide instruction on the basic requirements and practices used to accurately compute and maintain records and reports related to the distribution of wages and employee benefits. Program coverage includes basic management principles for the payroll process, time tracking, deductions for benefits and taxes and the payment process. Students will also learn about the accounting practices required for accurate reporting and record keeping, as well as processes used for outsourcing payroll functions.

Program graduates are prepared to take the National Bookkeepers Association (NBA) Uniform Payroll

Certification exam, leading to the Payroll Certification designation.

Program Objectives
After completing the Payroll Clerk program, students will be able to:

1. Properly classify workers, differentiating employees and private contractors based on the common law rule.
2. Track employee time and differentiate between types of employee compensation.
3. Identify, track and account for all required employee deductions associated with benefits and all required wage taxes.
4. Explain how payroll interacts with the accounting system and the associated record keeping, controls and measurements.
5. Explain the payroll outsourcing process and the pros and cons of outsourcing payroll.

Personal Financial Planning

Program Description
The Personal Financial Planning program provides students with instruction on practices for budgeting, evaluating investments, planning for retirement, building good credit and other important areas of personal finance.

Program Objectives
After completing the Personal Financial Planning program, students will be able to:

1. Explain the importance of financial planning, identify the socioeconomic and financial influences that impact personal finances, and create a personal financial plan to achieve a set of goals.
2. Identify important financial statements and describe how and why they are created and used in the development and management of a realistic budget.
3. Describe the U.S. system of taxation, identify the different types of taxes that must be paid, and describe the advantages and disadvantages of various personal taxation strategies.
4. Identify two major types of financial institutions and compare and contrast their services.
5. Explain consumer credit, analyze the advantages and disadvantages of using different types of credit, and describe the importance of protecting one's consumer credit score.
6. Describe strategies to use when considering major purchases, such as motor vehicles and real estate.
7. Define risk, explain how it is mitigated via insurance, and describe coverage and cost options of common insurance policies, such as auto, homeowners, renters, health, and life.
8. Compare and contrast stocks, bonds, mutual funds, real estate, and other investment options, and describe basic investment strategies and techniques.

Describe the importance of retirement planning, explain how to assess retirement needs, and describe how to create a realistic plan to meet these needs

Pharmacy Technician

Program Description
Students learn the fundamentals of pharmaceutical dispensing and are prepared to take the Certified Pharmacy Technician (CPhT) certification exam delivered by the National Health career Association (NHA), and the Pharmacy Technician Certification Exam (PTCE) administered by the Pharmacy Technician Certification Board (PTCB). Program topics include dosage forms, routes of administration, measurements and calculations, infection control, medication safety, prescription reading, and pharmacology. Students will complete a 160- hour externship in a retail pharmacy setting. A student of

the Pharmacy Technician program must attain the age of 18 years prior to enrollment and submit proof of a High School diploma or its equivalent within the first 90 days of enrollment. See the Admission Requirements section in this catalog for more details.

Program Objectives
After completing the Pharmacy Technician program, students will be able to:

1. Outline the typical responsibilities of a pharmacy technician and describe the personal and professional ethics required for success in this profession.
2. Describe the roles and responsibilities of the pharmacy technician and the pharmacist, explain the differences between these two roles, and outline the regulations imposed on both by state and federal law.
3. Demonstrate the standard techniques and procedures required of pharmacy technicians for pharmacy operations, including aseptic operations, medication transcriptions, metric/apothecary conversions, drug dispensation, recordkeeping, and patient profiling.
4. List and explain all major classifications of drugs and understand their indications, therapeutic effects, side effects, dosing recommendations, routes of administration, and mechanisms of action.
5. Interact with pharmacists, customers, and business associates, displaying professional skills, appearance, and ethics in a work-experience setting.

Property Management

Program Description
The Property Management program is designed to teach students how to evaluate and select investment properties, establish favorable leasing terms and conditions, and screen and select tenants. Students learn to identify maintenance concerns, hire employees and contractors, manage legal and financial issues, establish healthy tenant relationships, and enforce rent due dates. Special topics include specific housing markets, affordable housing, and continuing education.

Program Objectives
After completing the Property Management program, students will be able to:

1. List the personal and professional characteristics of successful property managers.
2. Outline the general scope of authority and duties of property managers.
3. Determine when to retain property management personnel and when to hire skilled tradespeople and contractors.
4. Define business concepts related to property management, including advertising, marketing, record-keeping systems implementation, profit and loss, operating budget, and return on investment.
5. Describe how to target and screen for reliable tenants and how to handle tenant- related issues, such as obtaining security deposits, collecting rent, enforcing occupancy rules, and performing evictions.
6. Explain the importance of risk management and appropriate security for property and outline the steps to follow to assess liability and secure adequate liability insurance.

Retail Management

Program Description
Students learn the basics of retail management and merchandising as they relate to contemporary retail environments. Topics include retailing formats and locations, organizational structure and key positions, growth and expansion, consumer communication, brands and private labels, productivity

measures, inventory valuation, pricing and planning, and merchandise layout and presentation. Students are presented with real-world examples featuring popular large- and small-scale chain retailers and specialty stores.

Program Objectives

After completing the Retail Management program, students will be able to:

1. Define retailing, describe the different types of retailers, and outline some of the characteristics of successful retail managers, including entrepreneurs/small business owners and department store managers.
2. List and explain essential retail management concepts, such as buyers and vendors; customer service, customer loyalty, and consumer behavior; retail planning processes and electronic retailing; retail strategy, pricing strategy, assortment planning, branding strategy, and global growth strategy; niche marketing and market personalization; and information systems and supply chain management.
3. Compare and contrast different location opportunities and outline the factors that affect retail demand in a region or trade area.
4. Describe how retailers build a sustainable competitive advantage through human resource management, and identify related issues, challenges, and trends, including employee motivation, evaluation, and compensation.
5. Outline the customer relationship management process, describe how retailers collect customer data, and explain how that data is used to gain strategic advantages, support communication programs, and develop customer loyalty.
6. Describe how retailers make international sourcing decisions and identify common ethical and legal issues involved in the purchase and sale of merchandise.

Small Business Management

Program Description

This program teaches students the theory and skills required to own and operate a small business. Lesson coverage includes critical concepts such as business plan development, sales and marketing basics, and fundamentals of small business accounting and finance. Students will also learn about basic management techniques required to recruit and hire employees, to purchase and control inventory, and how to use technology resources to improve business results.

Program Objectives

After completing the Small Business Management program, students will be able to:

1. Describe some of the current opportunities, trends, and challenges related to small business ownership and describe the characteristics of successful entrepreneurs.
2. Identify the different forms of legal ownership for small businesses and describe the advantages and disadvantages of each from a variety of perspectives— including ownership, taxation, and organization.
3. Describe how different types of businesses operate within the legal, regulatory, and tax environments in the United States.
4. Describe the essential components of a profitable business—including strategic and operational planning, tax and estate planning, profit planning, human resource management, physical facility management, inventory management, and management information systems—and create a sample business plan that includes all required components.
5. Explain why equity and debt financing are required, identify common sources of financing, and describe the roles that equity and debt financing play in the capital structure of a small firm.

6. Describe issues related to developing, marketing, and distributing products, including finding a niche, managing inventory, working within the product life cycle, developing effective marketing strategies, and identifying appropriate channels of distribution, including e-commerce.
7. Explain how small businesses find and manage human resources, including growth planning, employee recruitment strategies, managing to performance standards, and ensuring employee safety.

Social Services Assistant: Substance Abuse

Program Description

Students will learn about the role of substance abuse counselors and the skills needed to work with a variety of different clients. Students will learn how to adhere to professional and ethical standards of behavior, work with clients and health care professionals, use counseling techniques that are appropriate for each client, and create professional written records for each client.

Program Objectives

After completing the Social Services Assistant: Substance Abuse program, students will be able to:

1. Identify the skills and knowledge required for success as a substance abuse counselor.
2. Recognize and adhere the professional and ethical standards of behavior for substance abuse counselors.
3. Recognize systematic substance-disorder screening and assessment procedures to determine an individual's eligibility for addiction-related services, even in crisis situations.
4. Work collaboratively with clients and other members of the health care team to develop written treatment goals with measurable, time-sensitive action steps toward outcomes.
5. Identify administrative, clinical, and evaluative activities that facilitate the
6. client's ability to focus on identified issues and needs.
7. Identify counseling techniques that are both sensitive to the client's needs and considerate of the client's cultural norms, societal norms, and family situation.
8. Recognize how to create professional written records that include all treatment information and data, such as screening and intake results, assessment and treatment notes, clinical reports, progress notes, and discharge summaries.
9. Identify how to create and professionally present information on substance abuse, prevention, and treatment to clients, families, and community groups.
10. Develop a professional portfolio that demonstrates educational and professional steps in the pursuit of substance abuse training.

A career in this field may require students to meet certain licensing, training and other requirements that may vary by vocation and state. Students should check with their state, local government and/or licensing board to research the requirements that may be applicable in their state.

Sterile Processing

Program Description

The Sterile Processing program is designed to provide the student the knowledge and skills required for entry-level work as a sterile processing technician. The program focuses on introductory sterile processing concepts and professional proficiencies. It will prepare students to execute the necessary activities that are performed daily in the sterile processing department. The program is designed to develop the comprehension learners need to sit for the Certified Registered Central Service Technician (CRCST) exam through the International Association of Healthcare Central Service Materiel Management (IAHCSMM)*.

*The CRCST certification requires that you pass the certification exam and complete 400 hours of hands-on experience in a sterile processing department. These hours can be completed before testing or within 6 months of passing the exam. For more information, visit the IAHCSMM website: https://www.iahcsmm.org.

Program Objectives
After completing the Sterile Processing program, students will be able to:

1. Recognize the fundamental practices and procedures of aseptic technique.
2. Identify common pathogens found in the medical setting and the precautionary measures healthcare workers take to minimize the risk of contracting diseases.
3. Identify HIPAA privacy rules and regulations and patient information commonly maintained by a healthcare facility.
4. Recognize the duties and requirements of the sterile processing technician in the healthcare setting.
5. Identify basic concepts of anatomy, physiology, microbiology, microorganisms, and medical terminology related to the duties of sterile processing technicians.
6. Identify industry regulations and best practice standards common in the sterile processing field and the organizations responsible for setting the regulations and standards.
7. Identify common and complex surgical instruments, industry approved practices for decontamination and sterilization of medical supplies and equipment, and the proper ways to transport equipment.
8. Identify procedures for effective inventory control and tracking of instruments, equipment, and supplies.
9. Recognize quality assurance practices and workplace safety procedures.
10. Identify the importance of teamwork, workplace communication, and customer relations in the sterile processing setting.
11. Identify basic concepts of technology, writing, communication, and math skills used in the workplace.

Career Certificate Programs

Career Certificate programs provide students with an instructional course of study designed to provide instruction focused on specific subsets of knowledge related to a vocational or professional career. Career Certificate programs are typically shorter in duration than Career Diploma programs. The certificates are valuable in training students who already have some familiarity in this area of study and often assist students with career development and advancement.

Special Note: Students should be aware that programs are developed to provide foundational knowledge and/or skills. Because state regulations vary, students should contact their state agencies to determine if their course is appropriate for their career goals. This applies particularly to para-professional careers such as law, education, and health related fields.

Child Development Associate (CDA) Credential Preparation Certificate

Program Description
The Child Development Associate Certificate (CDA) Credential Preparation program provides students with the knowledge to start or further their careers in the education field. Each lesson in this online program aligns with the professional childcare competency areas required for the Child Development

Associate (CDA) Credential™. Lessons show students how to understand a child's development process, recognize similarities and differences in young children, handle issues related to child behavior, create a safe and effective classroom environment, and place age-appropriate learning activities.

Program Objectives

- Recognize the many roles of a teacher and describe the tools they use to enhance teaching skills
- Summarize the role of the National Association for the Education of Young Children (NAEYC) and outline the tools it makes available to early childhood professionals
- Apply the essential elements to create meaningful lesson plans that will enrich the learning outcomes of every child
- Describe the evolving definition of family and explain the impact on the classroom
- Identify the requirements necessary to obtain the Child Development Associate (CDA) Credential™ and prepare a plan to meet those requirements.

Course Number	Course Title
Lesson 1	Learning at Ashworth
Lesson 2	Introduction to Early Childhood Education
Lesson 3	Foundations of Teaching
Lesson 4	Understanding and Guiding Behavior
Lesson 5	Observing and Assessing Children
Lesson 6	Environments and Schedules
Lesson 7	Curriculum
Lesson 8	Team Teaching
Lesson 9	Collaborating with Families
Lesson 10	The Dynamics of Diversity

The following Career Certificate programs are no longer accepting new enrollments:

Advanced Medical Coding

Program Description

Students learn the essential skills needed for abstracting, assigning, and arranging diagnosis and procedure codes using industry-standard coding manuals. Program topics include ICD-10-CM coding; CPT/HCPCS coding, including the assignment of modifiers and evaluation and management (E/M) codes; and ICD-10-PCS procedure coding. Students receive thorough instruction on the Official Guidelines for Coding and Reporting (OGCR) and CPT Guidelines as they relate to each subspecialty.

Program Objectives

After completing the Advanced Medical Coding program, students will be able to:

1. Outline the typical responsibilities of a medical biller/coder, describe the personal and professional ethics required for success in this profession, and describe the career opportunities available to appropriately trained personnel.
2. Describe the purpose and impact of the Health Care Portability and Accountability Act (HIPAA) and explain how professionals can learn about changes to the laws and regulations that affect them.

3. Explain the purpose of medical coding and accurately code diagnoses and procedures using industry-standard coding systems published by the World Health Organization (WHO) and the American Medical Association (AMA).
4. Accurately assign ICD-10-CM/PCS, CPT, and HCPCS codes for diagnoses, procedures, and medical services as part of the insurance reimbursement process.

Medical Office Assistant: Administrative Procedures

Program Description

The Medical Office Assistant: Administrative Procedures career certificate program provides students with an introduction to the administrative activities of a private medical practice, hospital office, or clinic department. Students learn how to schedule appointments, follow OSHA standards and universal precautions, differentiate between government and commercial health insurance programs, maintain patient records, ensure HIPAA compliance, perform billing and coding duties, and follow typical office management procedures.

Program Objectives

After completing the Medical Office Assistant: Administrative Procedures certificate program, students will be able to:

1. Outline the typical responsibilities of a medical office assistant with an administrative focus, describe the personal and professional ethics required for success in this profession, and explain how medical office assistants are impacted by HIPAA and other healthcare regulations.
2. Describe how a medical front office is typically managed, focusing on administrative processes and procedures.
3. Explain the procedures involved in creating and maintaining accurate medical documentation, especially with regards to patient records, procedural and diagnostic coding, insurance claim forms, and other healthcare documentation.
4. Demonstrate knowledge of medical insurance by outlining typical claims processing procedures and explaining the difference between government and commercial health insurance plans.

Appendix A

Intellectual Property

The following policy is excerpted from Ashworth's internal policy manual.

Intellectual Property Policy

This policy provides guidance regarding the use and creation of intellectual property at Ashworth College. While the definition of intellectual property, very broadly, means the legal rights which result from intellectual activity in the industrial, scientific, literary, and artistic fields, this policy is focused on products related to course and program development and instructional practices in the online learning environment. It is the responsibility of all faculty, staff, students, and anyone using the facilities or resources of Ashworth College to read, understand and follow this policy.

Definitions

Copyright: The exclusive right of an author to reproduce and create derivative works from original works of authorship that are fixed in a tangible medium which are not in the Public Domain and thus, protected under United States Copyright Law Title 17 of the U.S. Code.

Covered Individuals: All individuals employed or under contract by the College, enrolled at the College, attending courses at the College, and/or using the facilities or resources of the College are subject to this policy.

Intellectual Property: Includes, but is not limited to, any works of authorship, computer software, invention, discovery, creation, know-how, trade secret, technology, scientific or technological development, research data, regardless of whether subject to legal protection such as copyright.

Public Domain: The status of work that are not protected by copyright.

Work Made for Hire: Work prepared by an employee within the scope of employment, or work under contract that specifies the product to be a work for hire.

Compliance with Copyright and Intellectual Property Law

Anyone who believes that any faculty, staff, or student at the College has infringed on their rights as a copyright owner should contact the Head of Academic Services with the following information:

- Complete name, mailing address, email address, phone, and fax numbers;
- Information about the copyrighted material (URL, book title, etc.).
- The URL of the College site which has the infringing material; and
- Any other information supporting the claim.

Ashworth College will apply measures to protect against unauthorized access (e.g., limiting transmission to students enrolled in a particular course) and requires that only lawfully acquired copies of copyrighted works are used.

Appendix B

Student's Guide to Avoiding Plagiarism

A Student's Guide to Avoiding Plagiarism

Plagiarism is a violation of the Academic Honesty Policy. Whether it is intentional or not, plagiarism is cheating; it is both illegal and a breach of academic conduct. This guide briefly addresses definitions and examples of plagiarism and provides instructions on how to avoid plagiarism in your assignments.

As a student you will often need to present the ideas and opinions of professionals in your own words. Your instructor/grader expects you to use the work of others in your responses; there is no way to avoid this. However, to avoid plagiarism, simply cite the work of others correctly in APA format, every time. You should refer often to the APA Guidelines as well as to a printed or online APA style manual.

The following suggestions can be helpful in preparing your responses.

Avoiding Plagiarism

1. As you take notes, mark the material that is directly copied or paraphrased in a significant way, perhaps by using a different colored font or by changing the background color of the information (highlighting the information). When you finalize your paper, you can easily check to be sure that you have cited this information.
2. When you are paraphrasing information, read the information and then write it down from memory. This will help you to avoid using the sentence structure and words of others. Remember that a paraphrase must still be cited.
3. When quoting directly, copy the person's name that you are quoting into your notes next to the quote as you take notes and put quotation marks around the exact words that you copied. Use very few quotes in your papers, quoting only when the exact phrasing of the information is as important as the information itself.
4. Always put quotation marks around any direct statement from someone else's work (or indent and single-space extended quotations). Always give a footnote, endnote, or other form of citation for this quotation.
5. Cite any paraphrase or another writer's ideas of statements.
6. Cite any thoughts you obtained from a specific source in your reading.
7. Cite any material, ideas, thoughts, etc., you received from your reading that can't be described as general knowledge.
8. Cite any summary (even if your own words) of a discussion from one of your sources.
9. Cite any charts, graphs, tables, etc., made by others or any you made using other's information.
10. Cite any computer algorithm you incorporate into a computer program if you did not write or create the algorithm yourself. (Excerpt from the Logger, 1995, p.12. 9)
11. Consult your instructor if you have any questions regarding issues of plagiarism and academic honesty.

Information Which Must Be Cited

- Another person's idea, opinion, or theory regardless of the medium (magazine, book, newspaper, journal, song, email, lecture, TV program, movie, Web page, letter, advertisement, interview)
- Any facts, statistics, graphs, drawings—any pieces of information—that are not common knowledge
- Quotations of another person's actual spoken or written words

- Paraphrase of another person's spoken or written words

Information That Does NOT Have to Be Cited

- Generally accepted facts
    - One's own experimental results
    - One's own experiences, observations, insights, thoughts, or conclusions about a subject
- Common knowledge, including folklore, common sense observations, and shared information within your field of study or cultural group

APA Format

There are two ways to incorporate the work of others into your work: quoting and paraphrasing.
Use the APA Formatting resources at the bottom of the page for additional help.

- Quote – called a direct quote – is the use of others' exact words and must be enclosed in quotation marks. These citations should be presented exactly as they are written and must be attributed to the originator. Note the author names and date in parentheses in the following example.
- Scripts are defined as "formats for integrating visuals from a computer, projections, slides, film or videotape into a presentation by one or more persons" (Newsom & Carrell, 2001, p. 374).
- Paraphrase – or indirect quotes – is material from others' work, but it is presented in your own words. It too must be cited as in the following example.
- In general, there are two types of presentations: informational and persuasive (Newsom & Carrell, 2001).
